

## City Comforts in the Country Home

Take the drudgery out of farm life. Replace it with genuine city comfort and efficiency by the installation of a

### Fairbanks-Morse Type "F" Electric Light Plant

—the plant that guarantees a 24-hour-a-day electric service on your farm. A Type "F" plant means all the lights you want in the home, stable and other buildings—all the comforts and convenience of the city. The ironing, the washing, the churning and many other household duties are made easier. The Type "F" operates 50, 65, 100 or 200 lights, according to the plant. It is complete, simple and easily installed. The engine is a separate unit and provides surplus power for other work while charging batteries, or its full power may be used to operate other farm machinery.

Write today for full particulars regarding this equipment for your country home.

## ALPHA GAS ENGINES faithful as a work-horse

**D**EPENDABILITY is the keynote of the Alpha. It RUNS when you want it to—chugs away all day and you never need to think about it.

It's always reliable; always ready.

Why?

Because it's so simply and sturdily designed and so expertly and honestly built.

There's nothing complicated about the Alpha—no electric batteries; no delicate attachments to "keep you guessing."

Just oil it; turn on the fuel—either gasoline or kerosene—and the Alpha does the rest.

It takes a whole lot of the drudgery out of farmwork, and, in addition, saves time and fuel.

### JUST ASK ANY ALPHA USER

Alpha Gas Engines are made in 12 sizes, 1½ to 28 H. P., and in stationary, semi-portable or portable style, with hopper or tank-cooled cylinder.

## TORONTO SILOS

### See the Hip Roof

It will put money in your pocket. Get tons more ensilage in a Toronto Silo than in any other silo costing about the same to erect. The hip roof lets you tramp down the ensilage right up to the top of the walls.

Now consider the construction of a TORONTO Silo. All woodwork is carefully selected spruce, thoroughly impregnated with hot tar and creosote. The wood cannot rot and is not affected by ensilage acids.

Then Toronto Silos are airtight because the staves are DOUBLE tongued and grooved—double protection against frost as well as air. The Toronto Silo booklet sent upon request.
