

IMITATION IS THE SINCEREST FLATTERY

De Laval Cream Separators

HAVE MANY IMITATORS

But way down in the heart of every informed Dairyman, he knows that

De Laval Cream Separators are Best.

AGENCIES EVERYWHERE.

THE DE LAVAL SEPARATOR CO., 173-177 William Street,
MONTREAL.

It's in the Clamp

The lasting strength of a wire fence rests mainly in the clamp that secures the crossing wires.

The famous Anchor clamp has a grip that never fails. Bending the wires slightly, it keeps them fastened in the one place steadily, in spite of storm and pushing animals. It cannot slip. Nor can the wires spread.

Made from one-inch steel—japanned or galvanised, the latter being proof against rust.

Anyone can put up an Anchor fence. But our agent will do it, if you like. There's no fencing so thoroughly satisfactory. Simple, reliable and wonderfully low-priced.

Write for free catalogue, showing pretty ornamental styles, also farm and garden gates.

Good, live agents wanted.

Fence Co.**
STRATFORD, Ont.

FARMERS ! LOOK !

"CHAMPION" SIDE RAKE

If you use a hay loader to harvest your hay crop, you need a Side Rake also; if you haven't a Loader you should get one, because you can soon **save**, in time and labor, the cost of both a Loader and Side Rake—that's a fact, and it is being proven every day by progressive farmers.

The "Champion" Side Rake is simple and does perfect work. It can be used under any conditions. Its motion is easy, and its three Rake Bars do not thresh ripe hay or clover. Equipped with two adjustable Caster Wheels.

Write at once for catalogue "F." Don't wait.

Last Mountain Valley Lands

We own thousands of acres of **Choice Selected Land** in this district, which is in the heart of the

GREAT WHEAT PLAINS

OF

SASKATCHEWAN

Ample TIMBER for All Purposes

Prof. Thos. Shaw, after personal inspection, writes: "This rich and beautiful farming section lying in the vicinity of Last Mountain Lake, embraces one of the finest areas in the Northwest. The land is undulating in this region, mostly open prairie. The soil is rich black vegetable loam, from one to two feet deep, and is underlaid with a clay subsoil. Frost, to injure the wheat, is virtually unknown. Being thus favored so highly by nature, it is not surprising that the production of wheat in this region is phenomenally high; in several instances forty to forty-five bushels per acre have been reaped. Oats, Barley, Flax and all small grains yield relatively as good as those of wheat. Potatoes grow most luxuriantly. Two or three years ago there were not more than thirty-five settlers in the entire area; now there are over a thousand, and others rapidly coming in."

Send 25c. for our beautiful new photographic souvenir, entitled "The Lake and Lands of Last Mountain Valley," which is not only a work of art, but a book of authentic information. We will also send Atlas of Canada, Maps, etc.
