

SIMPLE

The only piece inside Sharples Dairy Tubular bowls.

Manufacturers of common cream separators put 40 to 60 disks, or even worse contrivances, into an old-style bowl and call it simple and modern. The 52 disks shown on the sticks below are all from one such bowl. These contraptions must all be washed twice daily.

But Sharples Dairy Tubular bowls have nothing inside except the tiny, instantly removable piece shown above on the thumb. And Tubulars and out-class all other separators. That is because they are different—are the only simple, sanitary, modern separators made in the World's Best.

52 Disks from one Common Bowl.

The manufacture of Tubulars is one of Canada's leading industries. Oldest separator concern in America. Sales exceed most, if not all, others combined. Tubulars probably replace more common separators each year than any maker of such machines sells.

Write for circulars, stating what you want. Manufactured by **SALEM IRON WORKS, Winston-Salem, N. C., U.S.A.**

Pays for itself in fuel saved

Don't allow a few extra dollars to prevent you from taking the perfect-cooking, sure-baking, easily-regulated Pandora in place of a cheaper stove. In a season or two Pandora will pay the difference in the fuel it will save—and it will keep on saving until it has paid for itself.

Pandora special flue construction makes fuel do double duty. Wide fire box is another fuel-economizer. The steel oven heats quicker than a cast oven, thus saving still more fuel. Further economizing features will be explained by the McClary Agent.

The Favorite and the Best Value for the Money of Them All is

TOLTON'S NO. 1 DOUBLE ROOT CUTTER

POINTS OF MERIT:

1. To change from pulping to slicing is but the work of a moment.
2. There are two separate wheels, one for pulping and the other for slicing.
3. The united force of both wheels is always used in doing the work in either capacity.
4. The hopper is between the wheels and does not clog.

THE ONLY DOUBLE ROOT CUTTER MANUFACTURED. Fitted with Roller Bearings, Steel Shafting, and all that is latest and best in principle, material and construction. SEND FOR DESCRIPTIVE CIRCULAR AND PRICES.

TOLTON BROS., LIMITED, DEPT. F., GUELPH, ONT.

BEST RESULTS ARE OBTAINED FROM ADS IN FARMER'S ADVOCATE

THE "BT" LITTER CARRIER

Note the double purchase in lifting and the simplicity in construction.

No machine on the farm is used as many days in the year, or saves as much hard, disagreeable work as a Litter Carrier. A boy can fill, wind up and push out in a "BT" LITTER CARRIER four barrows of manure with ease, no matter how much mud or snow there is in the yard. The manure can then be dumped into a wagon or sleigh, and put directly on the land, with very little if any more labor and time than is required to pile it in the yard with the old method, where the greater part of the fertilizing value of the manure is wasted.

Write for free catalogue showing best method of erecting Litter Carriers, and telling why you should buy a "BT" LITTER CARRIER.

BEATTY BROS. FERGUS, ONT.
We also build Steel Stalls and Stanchions and Hay Carrier Goods.

With An American Saw Mill
Make Big Money This Winter
All Sizes

This simple, light running mill makes more and better lumber with less power, and less help than any other. You can set up and operate any American mill with the directions before you. If you have no timber, your neighbors have. Don't let your engine lie idle.

124-Page Book, Free

Containing valuable suggestions about the care of saws, fully describing the features that make our mills best, giving prices and guaranty and full information about our Wood Saws, Shingle Machines and other wood working machinery. Write for book today.

This Cylinder Shows Why The "EUREKA" Root Cutter

is the best on the market. See how it is designed. Grooved knives, with the grooves on one blade opposite the teeth on the next. Instead of slicing or pulping, the "Eureka" turns out roots in shreds—thin narrow strips—

suitable for any kind of feeding. The "Eureka" shreds from one to two bushels a minute, and turns so easily that a child can operate it. In the "Eureka" the feed is kept free from dirt, the feeder bottom being made with iron rods, thus allowing all dirt to drop out before it can reach the shredding cylinder.

The sloping form of the cylinder makes the machine a self-cleaner. Write for catalogue which explains fully.
