

Remember This About Cream Separators

No manufacturer of cream separators can drive farmers into buying his machine.

When a manufacturer's business grows to be the biggest of its kind in the world, it is because the farmers of the world prefer his machine above all others. The manufacture of

Sharples Tubular Cream Separators

is one of Canada's leading industries. Tubular sales easily exceed most, if not all, others combined. Tubulars probably replace more common separators than any one maker of such machines sells. This is because farmers, everywhere, consider Tubulars The World's Best.

We made the first cream separators manufactured on this continent. We know, and you can easily prove for yourself, that we are making the best now. Dairy Tubulars are different from and later than all others. No disks or contraptions in the bowl. Twice the skimming force of common separators.

Catalog No. 193 fully describes Tubulars. Write for it.

Like "The Kettle on the Hob"

of grandmother's time, the large Circle Water Pan of the "Good Cheer" Furnace supplies the moisture so necessary to the air we breathe.

The ordinary Furnace with its apology for a waterpan holding only a few quarts, is utterly unable to keep the air it heats half as humid as outdoor air. This dry air shrivels the wood work, loosens the joints of the furniture, dries and shrivels up the house plants, and worse still, affects your skin, throat and lungs in much the same way. That's why you catch cold so easily in winter.

The "Good Cheer" FURNACE with its new patented "Circle Waterpan"

supplies air like the breath of summer—air that is not only warm, but humid, like the air outdoors. You can live more comfortably in this humid, healthy "Good Cheer" atmosphere at 68° than you can at 72° or 75° in the dried-out air supplied by the average furnace. There's both health and economy in a "Good Cheer" Furnace. If you're building, arranging to build, or even thinking of building—make up your mind to install a "Good Cheer" Furnace. In applying, give experience (if any), age, married or single. State what territory preferred, wages expected.

THE FARMER'S ADVOCATE, LONDON, ONT.

Please Mention this Paper.

"BAKER" Wind Engines.

The "BAKER" Wind Engine is built for heavy duty. Neat and compact in design. Do perfect work because they are built on principles that are absolutely correct, and the best-running mill made.

The wheel is built on a hub revolved on a long stationary steel spindle. As a result there is less friction.

It has a large number of small sails without rivets. The small sails develop the full power of the wind.

The engine is so constructed that the gears cannot wear out of mesh.

Has ball-bearing turntable, and self-regulating device.

All working parts are covered with a cast shield, thus protecting same from ice and sleet. We make a full line of steel towers, galvanized steel tanks, pumps, etc.

All goods fully guaranteed. Write for catalogue No. 58.
