

FREE TO MEN UNTIL CURED.

The effect of Electricity upon the weak, debilitated man is the same as rain upon the parched field in summer. He may be debilitated from varicocele, losses, impotency; may have confusion of ideas; fear to act and decide; gloomy forebodings, timid and fretful; avoid friends and company; without confidence in himself to face the slightest responsibility, and let him properly apply Electricity for but a few hours and all these symptoms vanish. A few weeks to a couple of months' use of this treatment banish them forever, and make strong, confident, manly men out of the puniest weaklings. For nearly forty years I have treated and restored weak men through my world-famed invention, and am still doing so with greater success than ever. In fact, I do not expect to fail in any case of this kind, and therefore, as most men are more or less sceptical, I will continue to give my Hercules

Dr. Sanden Electric Belt Free Until Cured.

Not one cent is to be paid me in advance or on deposit. Call or write and get the belt, and use, say, for sixty days, and if cured pay me price of belt only—most

DR. C. F. SANDEN, 140 Yonge Street, Toronto, Ont.
Office Hours: 9 to 6. Saturdays until 9 p m. (51C) Largest and Oldest Electric Belt Establishment in the World.

cases low as \$4; if not cured return the belt and the deal is ended. But I know what the belt will do, and will take the risk of my pay when you are cured. I also give my belts on same terms in Rheumatism, Lamé Back, Stomach, Kidney and Liver Complaints, etc.

As the originator and founder of the electric belt system of treatment, my forty years' success is the envy of many, and my belts of course are imitated. (What good thing is not?) But my great knowledge to advise and direct my patients is mine alone, and free to all who use my belt until cure is complete.

What would you not give to have your old vim back again? What would you not sacrifice to feel as you did a few years ago; to have the same snap and energy; the same gladness, joyous, light-hearted spirit and the physical strength you used to have? You know you are not the same man, and you know you would like to be. You might as well be. It's easy. I am making men out of wrecks every day, and the above offer must convince you what I feel I can do for you.

Call or send to-day for my belt; or, if you want to look further into the matter, I have the best two little books ever written upon Electricity and its medical uses, and send them free, sealed, upon request.

We Will Buy

A 50c. Bottle of Liquozone and Give it to You to Try

We want you to know about Liquozone, and the product itself can tell you more than we. So we ask you to let us buy you a bottle—a full-size bottle—to try. Let it prove that it does what medicine cannot do. See what a tonic it is. Learn that it does kill germs. Then you will use it always, as we do, and as millions of others do. This offer itself should convince you that Liquozone does as we claim. We would certainly not buy a bottle and give it to you if there was any doubt of results. You want those results; you want to be well and to keep well. And you can't do that—nobody can—without Liquozone.

We Paid \$100,000

For the American rights to Liquozone. We did this after testing the product for two years, through physicians and hospitals, after proving, in thousands of different cases, that Liquozone destroys the cause of any germ disease.

Liquozone has, for more than 20 years, been the constant subject of scientific and chemical research. It is not made by compounding drugs, nor with alcohol. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are ex-

hilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquozone. It is the only way known to kill germs in the body without killing the tissues too. Any drug that kills germs is a poison, and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all the results of impure or poisoned blood. In nervous debility Liquozone acts as a vitalizer, accomplishing what no drugs can do.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is, and what it can do. In justice to your-self, please accept it to-day, for it places you under no obligation whatever.

Liquozone costs 50c. and \$1. **CUT OUT THIS COUPON,** for this offer may not appear again. Fill out the blanks and mail it to The Liquozone Company, 458-464 Wabash Ave., Chicago.

Any physician or hospital not yet using Liquozone will be gladly supplied for a test.

QUESTIONS AND ANSWERS. veterinary.

BLACKLEG.

In your issue of December 8th, 1904, I noticed directions for the cure of blackleg in cattle. A number of calves have died in this locality from what is called blackhip. Is it the same disease, and, if so, where can the vaccine points be obtained?
N. W. H.

Ans.—The disease is the same. It is called "blackleg," "blackquarter," "blackhip," and "symptomatic anthrax." The necessary antitoxin and instruments for injection, etc., can be obtained from Parke, Davis & Co., Detroit, Mich., or other manufacturing chemists.
V.

LUXATION OF PATELLA. ETC.

1. Two-year-old colt is stifled. Can it be cured?
2. I want to breed an aged mare that has never been bred. What can I do to ensure conception?
3. Give treatment for thrush. W. S.

Ans.—1. Of course, you mean partial dislocation of the bone. When a colt is really stifled, or has complete dislocation, he cannot lift the foot at all. You can help the condition, but cannot effect a perfect cure. Keep him as quiet as possible in a box stall and blister the front and inside of the joint, once every month for four or five months. Details for blistering are frequently given in these columns.

2. You cannot do anything more than keep her in good condition, neither very fat nor very lean, and breed her to a sire that is known to be a good producer.

3. Clean out the cleft of the frog thoroughly and put a little calomel in and work it down to the bottom with the back of your knife blade. Keep dry, and apply the calomel every second day, until cured.
V.

DEBILITY.

Fifteen-year-old mare raised foal last year. She had sunstroke, and got very thin. She is in foal again, but I cannot get her to gain flesh. Have fed oats, barley and flax, mixed, and changed to corn with good hay. She is hide-bound; hair long and dry, and skin itchy. I have had her teeth dressed. P. W. S.

Ans.—Have her mouth examined by a veterinarian, and her teeth properly dressed. Feed on rolled oats and bran, scalded, twice daily, to which add half a cupful of ground flaxseed. Feed dry oats, either whole or rolled, at noon; also a couple of carrots. Give her a reasonable amount of first-class hay. Get four ounces each of sulphate of iron, gentian, ginger, nux vomica and aniseed. Mix and make into 36 powders. Give a powder night and morning. If she will not eat it in her food, mix with one pint of water and drench her. Give regular exercise. Her coat will not improve until she sheds. A solution of corrosive sublimate, 30 grains to a quart of water, rubbed well into the skin once daily, will stop the itchiness.
V.

ITCHY SKIN. ETC.

1. Six light mares, due to foal in March, have an irritation of the skin, especially about the heels and thighs. Their coats are very long, and they have had no clothing in grooming all winter.
2. What food, and how much, should be given to blocky mares about 14½ hands, due to foal within a month?
STIRRUP.

Ans.—1. Skin irritation of this nature is often hard to account for, and is often due to local conditions and want of grooming. As the mares are pregnant, I would not resort to internal remedies, but depend entirely upon local treatment. Dress the itchy parts twice daily with a solution of corrosive sublimate, about 30 grains to a quart of water. Of course, the lotion must be rubbed well into the skin to be effective, and this is very hard to do when the hair is very long and contains dust, etc. I would advise clipping as soon as the weather becomes warm and the mares have foaled.

2. About eight pounds good clover hay per day in two feeds (morning and night), two quarts crushed oats in morning, a gallon of bran, with a little linseed meal at noon, also a carrot or two, and about two quarts of crushed oats again at night. See that they get regular and considerable exercise.
