

Q. What do you say? A. We found we had a heavier construction than we required.

Q. You found you had put a heavier substructure into the Harlem elevator than was really required? A. Yes.

Q. What changes did you make following on what your Harlem work shewed you? A. We reduced the section of girder, and I think the shape of the columns somewhat.

Q. The shape of the columns under the girders? A. Yes, and some other features of the construction.

Q. These were all structural details which, as I understand it, did not affect the question of the patent invention? A. No.

Q. Except in the working out of it in the actual practical structure? A. Yes.

Q. Nothing else that you remember of in the way of change in this? A. No.

Q. This elevator was built, I understand, but not completed, until along in 1907? A. Some time in 1907, June or July, somewhere along 1907."

The contract for the construction of the Harlem elevator is produced. It is very specific and complete. The plans referred to, Exhibits 7a, 7b, 7c, were substituted so far as material of a portion of the work was concerned. These were approved on 30th January, 1906. It is clear and so contended that these plans were a complete disclosure of the invention, and the elevator was to be constructed according to the plans.

The specifications refer to various matters.

#### *Commencement and Completion.*

Contractor shall commence the work on being given possession of the site, and shall so conduct his work as to give the plant to the owner ready to operate at full capacity in receiving and shipping or cleaning of grain, on or before July 1st, 1906.

#### *Testing and Accepting Elevator Plant.*

Everything necessary to make the plant complete as hereinafter described having been put in place, the plant shall
