COMPANY NOTES

SWASTIKA.

The Swastika's Company has just circulated an interim report to shareholders, which states that levels are now opened at 100, 200, 300 and 400 feet. The main shaft has reached a depth of 420 feet, and for the present sinking will be discontinued. A station has been cut at 400 feet and the shaft timbered and the cages running to that level.

Development on the 300-foot level to the extent of 450 feet of cross-cutting and drifting has been done. Ore on this level has been developed for a length of approximately eighty feet.

On the 400-foot level a cross-cut has been extended

west to meet the ore body.

The directors feel that sufficient development work has now been accomplished to proceed with the erec-

tion of a 10-stamp mill, complete but without cyanide equipment. It is estimated that the cost of the mill when finished, including engine, will be about \$18,000. The directors expect milling to begin in September.

MOND NICKEL.

The accounts of the Mond Nickel Company, Ltd., show that the net profit for the year ended 30th April last amounted to £154,364, out of which the directors recommended a dividend of 16½ per cent. on the ordinary shares and 10s. 5d. per share on Deferred shares, placing £35,000 to reserve and carrying forward £41,381.

LE ROI NO. 2.

The directors of Le Roi No. 2, Ltd., have declared a dividend of 1s. per share, free of income tax.

STATISTICS AND RETURNS

B. C. COPPER.

The British Columbia Copper Co. reports its output of copper for the month of June at 996,000 pounds, which is an average production. Reports indicate that the production for the current month will be larger.

COBALT ORE SHIPMENTS.

The following table shows the Cobalt ore shipments for the past week and for the year to date:
