

THE McLAUGHLIN SIDE SPRING GEAR.

THIS Gear, which is so prominent in the preceding cuts, deserves a few words. It has now been thoroughly tested for about eleven years with the most satisfactory results, and the continually increasing demand is the best possible proof of its value. It surpasses all other Gears in durability and ease in riding, requires less repair and makes less noise than any. An evidence of its popularity is found in the fact that

We have Sold over 12,000 to other Carriage Builders,

and are still supplying them in large quantities. We make them in various sizes as follows:—

- NO. 1— $\frac{7}{8}$ or 15/16ths Fan Tail Steel Axles for two passengers and top, made for all styles of bodies. Unless otherwise mentioned in order, we ship them suitable for standard sizes of bodies, but make them, when desired, suitable for bodies from 22 to 25 inches wide and from 46 to 52 inches long.
- NO. 2—1 inch Fan Tail Steel Axles for Jump Seat Bodies, (also answers for Buggies for two very heavy passengers or three passengers and top.) This size, also made with rear body loop, reversed for Phaeton Bodies, as shown on page 13.
- NO. 3—Light Gear for one passenger Buggies, bodies from 19 to 22 inches, very easy riding, just the Gear for Physicians, etc.
