THE COURIER.

WEDNESDAY, JUNE 26, 1850.

The highly important business transacted in the little Pedlington Parliament above is per-mitted to occupy so much space in our Provincial journals, that they are obliged to omit other things of vastly more consequence to Provincial interests. What is all the fass about the stupid Clergy Re-

some of the Executive members of the Government to communicate with Lord Stanley on matters of detail. He also r quested to be furnished with a slan on paper, stating the modus operand; proposed by the Deputation, and the name of the parties with whom the Government would negotiate on the subject.

with whom the Government would negotiate on the subject.

The result of the Deputation, headed by Lords Stanley and Monteagle, to the Frencher, has transpired, and the friends of the great project will be delighted to know that it quite realizes their most acquine expectations. What is the reason our local Governments exhibit such apathy and utter indifference to the measure? What has so paralyzed their enorgies, that only for private correspondence we should know nothing of the feeling with which this grand scheme is entertailed by the British Government? Now and again the public mind of this sity has been excited and aroused from its leftarry by some desperate effort of a solitary advocate of the measure, and anon, all is quite months to give it that prominency which it so eminently descrees, and two observe, with pleasure, that the population of the interior cherish the scheme with increased avidity. A correspondent of the Canadian Land and its lway Association continues to agitate the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a short time and the literature where the subject was a sh

Never at any previous period have the prospects of the enterprise apposed so promising. Let us then, one and all, in unity of purpose and action, respond, and that right worthly, to the sentiment which has dictated such as apprexion of opinion on the part of the First Lord of the Treasury. As far rs Nova Scotia is cancerned, we feel the utmost assurance that active intelligent men will be found on the whole line from the metropolis to the Missiquash, who will cheerfully en-operate in any general action to promote the measure, by calling simultaneous meetings. We, th refore, favite our brethren of the Press in New Brunswick and Canada to an expression of opinion on such a step as is thus proposed, and to a common effort, and shall be glud ourselves to lend our humble assistance in any and every reasonable way, as heatolone, to support and advocate this Trunk Line of Railrond.

ment that would ever give satisfaction to the country. He charged Mr. Baldwin with deserting the principles he had professed for years, and intimated a threat of going into opposition. The Ministry had injured themselves more by not taking up this question, and determining to stand or fall by it, than by any other question, not excepting the Indemnity Bill; by voting for which every Upper Canada Member had endangered his seat. He commented severely upon Mr. Baldwin's declaration, that he could not be bound by the will of his constituents. He denied the statement that this was got a test question at the last election; he knew it was in his constituency. If the Ministry were sincere in desiring the settlement of this question, why did they not introduce these Resolutions two years any? He cancided by threatening the Ministry with the consequences of their conduct at the next election.

Mr. Fint had always been opposed to the Clergy Reserves. He declared, on behalf of the Wesleyan Church, they did not desire a continuence of the £700 a year they receive f on this source.

Mr. Wilson believed, that all the denominations would be better without these funds. He had often seen a man with more many them he had himself, who was mak ag a bad use of it, and would have been better without at; but that did not give hims a right to take the man's money.

Mr. Hincks used a long speech, with a view to the effect out of doors of the parts that the several actors were playing in the tiouse. He eatered into a defence of Mr. Baldwin's detries and consistency, as well as of the conduct of the Cashnet, demying that any responsible promise was made less Session by the Government, to negociate with the House defence of the Conservative tacket, that Mr. Vansit art, is the County of Oxford, while canvasing the electors on the Conservative tacket, that Mr. Vansit art, is the County of Oxford, while canvasing the electors on the Conservative tacket, that is necessary to declare his readings to assist in taking these of the conduction, tha

ful sacrifice which this country has been made at table in order to obtain the "benefits of a cheap pound of supar." If we take, first, the present value of Wost India property, compared with what it was before the Fran-Traders were allowed to dictate Acts of Parliament, we find a falling off to such a degree as to be almost incredible, word the facts not enstained beyond the possibility of dispute—certates formerly worth £20,000 and £30,000 have been a drug in the market at £3000 and £30,000 have been a drug in the market at £3000 and £30,000 have been a drug in the market at £3000 and £30,000 have been a drug in the market at £3000 and £30,000 have been a fruit in the market at £3000 and £30,000 have been a fit in the Colonists, who were excellent austomers in the Home market, outhit not suffer to the extent without a corresponding effect being experienced in England. Had the exports continues equal to what they were in previous years, there might have been some ground for questioning the reality of the discress complained of i but, when it is known that there has been a falling of in the exports to the amount of more than £5,000,000, no same person can doubt the cause which had led to such a whange. But, andependent of the cost to the English antion, which its afforts to abulish Slavery have catalled upon it, there is the gross intensistency, of which he representatives have been justify, it giving encouragement to that traffic, upon which they look with so much hereor. A Beilah squidron is continually wasting he strongla has offensie ware assisted the Slave Trafe on the coast of Africa, whilst at consistent result, in reference to the West Indies, of the most abaurd commercial system ever promulgated by a great nation—a nation which acquired its power and wealth, it must never be forgotten, under a strictly protective industrial system at every period of its history in which competition existed with other nations. The West Indian question, then, though strictly bound up with the Free-Trade principle, is, nevertheless, so far a question of morals that is affords many honorable gentlement a pretext to alip off their bonds upon the whole question of our commercial policy. The division of Friday night, or rather of Saturday morning, has sufficiently evinced this disposition. The Government majority, after a most vigorous application of the whip, was only 41, including property on make against the street of the college of many through the college of many disposition. The Government majority, after a vigorous application of the whip, was only 41, including placement—324 voting for, and 275 against, the motion. The most interesting feature of the debate was the debat of the Hon. E. H. Stanley, the son of the Pretection to a product the conduct to the conduct tracks of the pretections.

be a noble building in its effects. At our point it is to have a dome of light sheet iron, 500 feet in diameter, with openings adapted for the exhibition of stained glass, and a circle of light from the centre. The effect, with the display beneath of the richest productions of the world, may be expected to prove truly magnificent. The subscriptions now amount to £61,705, more than one half of which have been relied in the Metropolis. Manchester has contributed £3,500, Liverpool £257, Bristol £706, and Bradford (Yorkshire) £1,405.

The Universities and University Reform are unce more brought before the public. Lord Brougham, the founder of the Landon University, and reputed antagonist of the Oxford and Cambridge seate of Bratning, has come forward as President of University College, and, in a latter

Relying on the circumstance that two of the learned Barons are known to be opposed to the opinion that the Judicial Committee of the Friey Council is the proper authority in matters of decirine, the Bishop of Exeter, it is usid, has resolved on trying his chance with the Court of Exchequer, by seeking there a prohibition against the institution of Mr. Gorbam to his living. In this event, it may yet take three or four weaks beforeste final decision of this long-contested case.

I had almost forgotten to mention that the Irish Franchice Hill has been read in the Lords a second time, without oppositions—the generalments being reserved for Commisses and that Mr. Fox's Education Bill has been thrown out of the Commons by the large unjority of 287 to the commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons by the large unjority of 287 to the Commons the Commons by the large union to the Commons by the large union to the Common the Commons by the large union to the Common th

The Electoral Bill has passed the French Logislative The Electoral Bill has passed the French Logislative Assembly by a large majority, and will shortly be acted upon in the lies Rhin, where there is a vecency caused by the uption of De Flotts, for Paris. M. E. de Girardin is the condition of the Socialist couchave, but his return is attremely doubtful, as he does not possess the confidence of the National (newspaper) party. France has relapsed into a state of tranquillity; the funds have improved, and the triumph of the Moderate party is complete. I fear the calm will be of short duration, and that the Reds are plotting secretly to recover the ground they have lost. A proposal by the Government to increase the Assembly, by which the beautoristic coolly received by the Assembly, by which the project has over exercised by the Assembly, by which the project has over exercised by the Covernment to the project has been made in composing the quarrel between the French and English Governments.
