Synopsis of Canadian North-West Land Regulations.

THE sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or sub-Agency for the district. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-Agency) on certain conditions.

Duties—Six months residence upon cultivation of the land in each of three years. A homesteader may live within five miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$3.00 per acre.

Duties—Six months residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take expurchased homestead in certain districts Price \$3.00 per acre. **Duties**—Must reside six months out of three years, cultivate 50 acres an erect a house worth \$300.

The acres of cultivation is subject to reduction in case of rough, shrubby or any land. Live stock may be substituted for cultivation under certain conditions.

W. W. COREY, C. M. G.,
 Deputy of the Minister of the Interior

Fertilizer

It is hard to make most of the farmers realize that there is a great possibility of them not being able to get what commercial fertilizer they will require this spring. But never the less it is an absolute fact and the wise farmer will take home his fertilizer soon. As if you wait till spring you may not be able to get any. As even now it is very hard to get what you want as transportation is so bad we have only a few more cars of Basic Slag to sell.

WHY not give your lad the same training?

"When I was a growing lad, and came upon many words in my reading that I did not understand, my mother, instead of giving me the definition when I applied to her, uniformly sent me to the dictionary to learn it, and in this way I gradually learned many things besides the meaning of the individual word in question—among other things, how to use a dictionary, and the great pleasure and advantage there might be in the use of the dictionary. Afterwards, when I went to the village school, my chief diversion, after lessons were learned and before they were recited, was in turning over the pages of the 'Unabridged' of those days. Now the most modern 'Unabridged'—the NEW INTERNATIONAL—gives me a pleasure of the same sort. So far as my knowledge extends, it is at present the best of the one-volume dictionaries, and quite sufficient for all ordinary uses. Even those who possess the splendid dictionaries in several volumes will yet find it a great convenience to have this, which is so compact, so full, and so trustworthy as to leave, in most cases, little to be desired."—Arthur B. Cook, Ph.D., LL.D., Professor of the English Language and Literature, Yale Univ., April 28, 1911.

ENTOMOLOGISTS TO FIGHT BROWNTAIL MOTH HERE

(Morning Chronicle)
 Dr. C. Gordon Hewitt, Dominion Entomologist; Professor W. H. Brittain, Provincial Entomologist; L. S. McAlne, who has charge of the Moth Bureau in the Maritime Provinces for the Dominion Department; and Mr. L. H. Worthley, of the United States Bureau of Entomology were in the city yesterday, after having spent several days in the Annapolis Valley.

For a number of years the Dominion Entomologist Department, in co-operation with the Provincial Department, have been fighting the Brown Tail Moth, and they now have the pest practically under control. Mr. Worthley was brought here by the Department in order to show him what is being done in this Province to fight the pest.

A visit was made to certain sections of the Annapolis Valley, and the work of the Departments were shown Mr. Worthley. He spoke in terms of highest praise of the work done in this Province. "The New England States," he said, "spend one million dollars a year fighting the brown tail moth, and Nova Scotia is fortunate in keeping it under control."

Dr. Hewitt and Professor Brittain will show moving pictures of the work done in this Province, at Kentville next Thursday night, during the ploughing competitions held there. Mr. McAlne will accompany them, but Mr. Worthley will return today to the United States.

PARLIAMENT OF CANADA HAS BEEN DISSOLVED

Ottawa, Oct. 4.—At one o'clock today a proclamation was issued dissolving Parliament as from Saturday. Announcement of dissolution was made to a Canadian Press representative by the Prime Minister no date, had been fixed for the election. This will be decided later, although it is unlikely the election date will be before January.

There was a further addition to the cabinet in Hugh Guthrie, Liberal member for South Wellington. Mr. Guthrie takes the portfolio of Solicitor-General. Mr. Guthrie was sworn in shortly before one o'clock. Sir Robert Borden also stated that no further changes had so far been made in the cabinet.

He indicated that there would be no additional announcements just at present.

A cabinet council has, however, been called for this afternoon. Western Liberals will be in conference here tomorrow when the question of union Government will again be under consideration. Whether or not any Ministers of the Prairie Provinces will enter a union Government, states Hon. J. A. Calder, is still under consideration. From Vancouver comes the story that Hon. H. S. Brewster, Prime Minister of British Columbia, has been invited to

the Borden administration. Confirmation of the report is awaited. Opinion still varies as to the retirement of Sir Wilfrid Laurier from the Liberal leadership. Prominent members of the Liberal Party, still question his retirement at any rate before the close of the campaign. It is reasonably certain that the Opposition leader will take no definite step until after his consultations in Montreal and Toronto.

Denies Report

QUEBEC, October 4.—"Le Soleil," of under an eight column heading that it has official authority to state that rumors saying Sir Wilfrid Laurier will leave the leadership of the Liberal party are absolutely void of foundation.

BRITISH SCORE A BIG VICTORY

(By William Phillip Simms, United Press Staff Correspondent.)
WITH THE BRITISH ARMIES IN THE FIELD, October 4—British forces have advanced more than a mile deep into German lines in what today looked to be one of the war's greatest battles. Prisoners already taken reach into four figures. Several villages have already been taken.

The drive was still on this afternoon. Haig struck his blow early this morning that for days has had re-morning the climax to a whirlwind of artillery that for days has beat relentlessly, unceasingly on the German positions. In all respects the blow impresses one as among the biggest if not the biggest of all the battles of the greatest of all wars.

Fighting is on unprecedented scale of magnitude in men, munitions, guns and territory. At Zonnebeke alone, three enemy divisions (German division ordinarily contains 15,000 men) were ordered to attack and retake ground they lost in the first staggering impact of the British blow.

The Germans the whole three divisions, were caught in the British har- rage. The terrific fire literary churned the poor devils into a bloody loll.

DIED

At South Berwick, on Wednesday, September 26th, Abram Chute, in the 81st year of his age.

At Belcher Street, Cornwallis, on Friday, Sept. 28th, of pneumonia, Clayton Catheart-Cogswell, in the 60th year of his age.

BORN

At Maitland, Sept. 27th to Mr and Mrs Frank L. Godfrey of Wolfville, a daughter.

FOR RENTAL—Good Office Room in Advertiser Brick Block, Main Street. Hot water heating for winter and electric lights. Possession at once. H. G. Harris, Kentville.

WAR PREPARATIONS IN JERUSALEM

London, Oct. 3.—(Montreal Gazette Cable).—The Times says:—"We have received a communication on the position of Turkey by a gentleman who left Jerusalem in May and travelled for twenty-five days to Constantinople where he spent six weeks. The railway from Jerusalem to Aleppo is finished, so also are the tunnels through the Taurus mountains. Enver Pasha was at Aleppo on June 1, establishing headquarters for Falkenhayn, who is in full command of the Turkish troops. He certainly is preparing an offensive against Bagdad or Egypt. Turkey has only sixty per cent of the average acreage of wheat under cultivation. On account of the scarcity of fruit and figs are available, but they need bread and onions. The people are hungry and exhausted. Constantinople fish is canned by the Germans for their use alone. At the hotels fish is obtainable. Turkish soldiers often have no bread. There is no sympathy between the German and Turkish officers and soldiers, as the Turks see that the Germans are better provisioned than themselves. Enver asked for better treatment for his troops. One hundred Turkish piastres (paper) are now only worth thirty.

PORT HOPE, Ont., Oct. 1—Food controller Hanna evidently was not aware of the extent of the potato crop when he fixed the price at \$1.25 per bag. Potatoes are selling here at \$1.00 a bag and the chances are that they will be cheaper.

Oats or barley, one part, shorts and middlings, two parts, with some milk approximately, and with the two former meals most difficult to procure, some cheaper grain must be used in the finishing ration. Wheat middlings and shorts, even though high in price, (84.50 approximately), must be relied upon for the major part of the meal ration. At the above price middlings offers digestible nutrients at a low net cost per ton than any one of the grains previously mentioned. By net cost is meant the total cost of the digestible nutrients, less their manurial value.

At the present time feed wheat, as procurable in Western Canada, forms an excellent hog-feed, as has already been well demonstrated. Tothmore central and Eastern sections this particular feed is not generally available. In many localities, however, an elevator by-product known as buckwheat screenings, may now be purchased. Further information concerning the distribution of this material may be had C. E. Austin, Mgr. Government Terminal Elevator, Fort William, Ont., or the Live Stock Branch, Department of Agriculture, Ottawa.

ECONOMICAL HOG FEEDING
 (Dominion Chronicle)
 In choosing a ration for hogs, the farmer should consider the classes of stock. Where skim milk and meal are available, the use of these feeds and concentrates of high prices, be limited to the amount of feed derived from the farm. The amount of wheat middlings and shorts, good growth, should thus be produced. For a period, however, a more rapidly fattening ration is required. The swine feeder should, "How can I produce the best results at present feed conditions, middlings and shorts, even though high in price, (84.50 approximately), must be relied upon for the major part of the meal ration. At the above price middlings offers digestible nutrients at a low net cost per ton than any one of the grains previously mentioned. By net cost is meant the total cost of the digestible nutrients, less their manurial value.

Oats or barley, one part, shorts and middlings, two parts, with some milk approximately, and with the two former meals most difficult to procure, some cheaper grain must be used in the finishing ration. Wheat middlings and shorts, even though high in price, (84.50 approximately), must be relied upon for the major part of the meal ration. At the above price middlings offers digestible nutrients at a low net cost per ton than any one of the grains previously mentioned. By net cost is meant the total cost of the digestible nutrients, less their manurial value.

At the present time feed wheat, as procurable in Western Canada, forms an excellent hog-feed, as has already been well demonstrated. Tothmore central and Eastern sections this particular feed is not generally available. In many localities, however, an elevator by-product known as buckwheat screenings, may now be purchased. Further information concerning the distribution of this material may be had C. E. Austin, Mgr. Government Terminal Elevator, Fort William, Ont., or the Live Stock Branch, Department of Agriculture, Ottawa.

Analysis of this particular grade of screenings reveals the following constituents:—Wild buckwheat 58 p. c., broken wheat, oats and flax, 29 p. c., weed seeds, 9 p. c., chaff, 4 p. c. In view of the weed seeds present it should be as finely ground as possible.

Experimental evidence, as afforded by swine feeding tests, at the Central Experimental Farm, would go to prove that this material is of considerable value. During the winter of 1914-15, in an experiment calculated to throw light on the value as a hog-feed of elevator by-products, as represented by the various grades of screenings, buckwheat screenings compared favourably with a standard meal and milk ration. Two of the rations compared were as follows:—No. 1. Shorts, three parts; corn, 3 parts; oil meal, 1 part; plus skim-milk. No. 2. Finely ground buckwheat screenings plus skim-milk. Without entering into the details of this test (See Experimental Farms Report, Vol. 1, 1915) it may be stated that the pigs fed buckwheat screenings while not so fat as those fed the regular meal ration and standing therefore slightly lower in total gains, stood first in economical production per 100 pounds grain. With the meal ration valued at \$23.00 per ton (1915 prices) and the buckwheat screenings at \$14.00 (nominal) the cost per pound grain was 4.7 cents in the case of the pigs fed the former and 2.7 cents for those of the latter ration. On the actual prices paid or charged for meal, skim-milk and rotots, and figuring on the basis of total gain produced by the two lots, buckwheat screenings showed a comparative value of \$27.60 per ton.

The swine feeder would be well advised in making inquiry into this particular feed, the eastern distribution of which is controlled by the Live Stock Branch at Ottawa. From the latter source further announcements may be expected in the near future.
