## WOMEN WITH WEAKNESS.

For all weakness when girls and women suffer, no surer remedy exists than Dr. Hamilton's Pills. They maintain that bracing health every woman so earnestly desires; they uproot disease, and bring strength that lasts till old age.

"No medicine could be more beneficial than 'Dr. Hamilton's Pills,'" writes Mrs. Mary E. Ayrton of Victoria. "I have been strengthened, my digestion is better, I have improved in color and feel considerably better since using Dr. Hamilton's Pills." Sold everywhere, 50c. per box of five boxes for one dollar.

## Fighting For Over \$1,500,000.

Toronto, Jan. 11.—A fight between the Dominion of Canada and the Province of Ontario is billed to commence in court on Jan. 21. It entails a dispute over a million and a half dollars expended in regard to Indian Treaty No. 2. The trouble is all over the treaty made by the Dominion with the Indians north of the height of land, north of Lake Superior, up to Rat Portage and for some distance eastward. The Dominion filed the claim in 1893 before the arbitrators for the payment of moneys advanced to the Indians, and with interest amounts to something like \$1,500,000.

## WHY THAT WEARINESS?

You're anxious, restless, without appetite. Still worse you are thin and fagged out. Work must be done, but where is the strength to come from?

Make your blood nutritious and you'll have lots of strength. Your only hope is Ferrozone, an instant blood-maker, blood-purifier, blood-enricher. It brings keen appetite, digests food and supplies nutrition for building up all the bodily tissues. Ferrozone makes muscle and nerve-fibre, increases your weight, instills a reserve of energy into the body that defies weariness or exhaustion from any cause. To find healthy vigor use Ferrozone, which all dealers sell in 50c. boxes.

## Respite of 30 Days.

Trenton, N. J., Jan. 11.—The New Jersey state board of pardons yesterday granted a reprieve of 30 days to Mrs. Antonette Tolia, the young Italian woman, who was sentenced to be executed on Friday for murder.

## Bisley Meeting, July 9.

London, Jan. 11.—(C. A. P.)—National Rifle Association meeting at Bisley begins on July 9.

## COLD SETTLES IN THE BACK.

It hits people in a tender spot and makes it mighty hard to brace up. Nervine takes that kink out of your spinal column in short order; it soothes, that's why relief comes so soon. Nervine penetrates, that's why it cures. Five times stronger than ordinary remedies, Nervine can't fail to cure lame back, lumbago, sciatica, and neuralgia. Nervine is instant death to all muscular pain. For nearly fifty years it has been the largest selling salve in Canada. Better try it.

## THE FOREST'S FRIENDS

Three or Four Hundred of Them Gather at the Capital.

Distinguished Men In Convention Impress Upon Canada the Need of Preserving Her Timber Resources For Years to Come—Earl Grey Delivered Opening Address—Expert Warning From the States.

Ottawa, Jan. 11.—The Canadian forestry convention, which had been called by Sir Wilfrid Laurier to consider the forests of Canada, their importance to the nation, and to discuss means by which the beneficial influences of the forest may be best preserved and perpetuated, opened yesterday in the Railway Committee room of the Parliament Buildings, which had been most tastefully decorated for the occasion. Three or four hundred delegates were in attendance from different parts of the Dominion. Among those at the opening session yesterday were: His Excellency Earl Grey, Sir Wilfrid Laurier, Mr. R. L. Borden, Hon. Messrs. Fisher and Oliver, E. Stewart, Dominion Superintendent of Forestry, and Gifford Pinchot, Chief of the Forest Service of the United States.

## To Avoid Barrenness.

In opening the convention, Earl Grey observed that although his experience in Canada had been comparatively short, it had been sufficient to impress him with the urgent desirability of focusing the best brains of the Dominion on the immediate consideration of what shall be done with regard to our forests, to protect the soil on which the maintenance of our agricultural prosperity depends. He had himself seen extensive tracts of country in India, Asia-Minor, Greece, and Italy, once inhabited by a strouous and numerous population, but now reduced to the misery of a barren desolation by the regulated deforestation of their lands by a mindless selfish generation which had no regard for posterity, and no eyes for anything but their immediate requirements. The object of this convention was to fix in the minds of the people of Canada the warning that these countries hold out to us.

In opening the convention he hoped it might be the means of averting the sad fate of the countries to which he had referred.

The Excellency referred with pleasure to the presence of distinguished American authorities on forest questions.

## Sir Wilfrid's Remarks.

Sir Wilfrid Laurier, as president of the Canadian Forestry Association, then addressed the convention, pointing out some of the questions to which it could with profit devote a share of its attention. Great loss had already resulted from wasteful methods of lumbering, but even yet it was not too late to take remedial measures. One of the first steps should be the establishment and preservation of large forest reserves. On no consideration should the Government allow the wastefulness of the present system to be continued. Where there have in any instance been already alienated, the Crown should effect their re-purchase without delay. The success of reforestation has already been fully demonstrated. Fine forests can be renewed by judicious tree-planting. If some steps are not taken the day will certainly come when there will not be a tree left of economic value for Canada. From the havoc that human hands have wrought in our forests, must be taken to safeguard them against the inroads of insect pests and fire. He was informed that the lumber cut by the Ottawa valley, which he said represented one per cent of what was destroyed by fire. The patrol service maintained by the lumbermen to keep down forest fires should be made much more thorough and efficient. Still worse you are thin and fagged out. Work must be done, but where is the strength to come from?

## Railways to Blame.

The railway locomotive, observed Sir Wilfrid, had been one of the greatest blessings of modern times, yet what more depressing spectacle could one imagine than to travel for hours through a region once covered by magnificent trees, but now marked only by the charred remains of magnificent forest giants. No doubt the railway companies have made attempts to minimize the danger of igniting fires from their locomotive sparks. It is a question, though, whether they should not be compelled to go further and patrol the portions of their lines that traverse forest areas.

## The French-Canadian was a good

man with his axe, but unfortunately he has not been careful enough to preserve the trees on his property. The Canadian Forestry Association was doing good work, but should not rest content till the people come to realize the necessity of covering with trees every rock hill and the banks of every running stream. Scatter the seed, and nature will do the rest.

## Conservators Will Help.

Mr. R. L. Borden promised that he and those who sat with him in Parliament would assist the Government to bring in any regulations for the accomplishment of the objects mentioned by the Premier. Canada was specially interested because of her great forest areas, and because of her inland waterways, the efficiency of which depended on regulation of the forests. After denouncing the indiscriminate destruction of trees Mr. Borden gave a European example of the value of forestry. Saxony had 400,000 acres of forests in rough, mountainous country. In 50 years ago, Canada has 400,000,000 acres of forest. State aid could be rendered in two ways by education and by direct control by state regulation. There should be continuity in any such policy. The timber should not be regarded as a crop to be destroyed, and one which would be renewed in 100 or 150 years, but as capital of the state,

## SURPRISE SOAP

A PURE HARD SOAP

We Tell Our Friends there isn't any soap made as good as "SURPRISE," which is "A Pure Hard Soap" that washes well and wears well. THE ST. CROIX SOAP MFG. CO., St. Stephen, N.B.

## on which private enterprises should not

be allowed unduly to trench. Hon. Mr. Oliver outlined the results thus far achieved toward the preservation of our tree wealth.

## Planted Five Million Trees.

The next address was by Henri Joly Lotbiniere, president of the Canadian Forestry Association, who reviewed what that organization had accomplished in its five years of existence. He testified also to the practical work done by the Federal Government in the way of forest tree planting on the plains of the west, protection of forest lands from fire, and creation of forest reserves. Since 1891 the Government had distributed 5,102,750 young trees to settlers, of which 85 per cent have thrived. After dwelling at considerable length on the forestry work in the several provinces, the speaker concluded by referring to the prospect that before long steps may be taken to organize a Canadian forestry school, where our young men may receive a forestry education suited to the needs of our country.

## Roosevelt's Chief.

Gifford Pinchot, chief of the forest service of the United States, brought to the convention a personal message of good-will from President Roosevelt, who added also an expression of his conviction of the good that will result to Canada from the work of this convention.

Mr. James Wilson, United States Secretary of Agriculture, desired also to express his high appreciation of the wisdom that prompted the calling of the Canadian Forestry Convention and his good wishes for the success of its work. Americans and Canadians have both seen enough to realize that the day will come when our extensive forest resources will be exhausted, unless steps are taken to preserve them from extinction. Agriculture is an absolute impossibility in the absence of forests. Moreover the same thing is true of mining and railway building. In the United States forestry was looked upon as a business proposition entirely aside from sentimental feelings, and it was pleasant to learn that by so doing a widespread interest has been developed therein.

## Need of Reserves.

Mr. Pinchot outlined the policy that had been adopted in his country of teaching the theoretical value of forestry in schools and of impressing it upon farmers and lumbermen by practical demonstrations and by setting aside forest reserves aggregating 100,000,000 acres. Canada was wise in forming such reserves before the property has passed into the hands of private owners.

## Dominion Timber Land.

At the afternoon session a paper was read by E. Stewart, superintendent of forestry, who said the total land area in control of the Dominion Government is 2,656,300 square miles, of which 1,406,200 square miles was of more or less wooded country.

Thomas Southworth, director of forestry for Ontario, was to have spoken on forest reserves, but on account of indisposition his paper was read by Prof. Clarke.

Aubrey White, Deputy Minister of Mines and Lands of Ontario, and Dr. Fernow of Cornell University discussed the papers.

At the night gathering in the Normal School Sir Wilfrid Laurier and Hon. Sydney Fisher delivered addresses, the latter on the necessity of preserving the forests for water power purposes.

## C. B. Smith of the Temiskaming

Railway read a paper on Water Powers.

## BEWARE OF OINTMENTS FOR CATARRH THAT CONTAIN

## MERCURY.

As mercury will destroy the sense of smell and completely damage the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Halls Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Halls Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price 75c. per bottle.

## Take Hall's Family Pills for constipation.

Diamonds are vulgar, especially if you haven't any.

Coughs, Colds, Hoarseness, and other throat ailments are quickly relieved by Cresoline Tablets, ten cents per box. All druggists.

Most women believe that if they were rich their chief object in life would be the care of the poor.

## ONTARIO'S DAILY WEAL

Aggregate Manufacture of Cheese, Butter and Bacon Reached the Enormous Total of \$35,000,000.

Peterboro, Jan. 11.—The constant arrival of delegates swelled the attendance at the 22nd Eastern Ontario Dairyman's convention to nearly 400 mark at yesterday afternoon's session. The speakers were: J. H. Grist, date of the Experimental Farm, Ottawa, Henry Glenister of Manilla, President Creelman, O. A. C. Hon. Nelson Monteth and others. Numerous questions were asked the different speakers. Addresses of welcome to the city were extended by Mayor Best, R. Hall, M. P., and T. E. Bradburn, M. P. P., and a suitable reply made by J. R. Dargavel, M. P. of Elgin.

The president, D. Derbyshire, M. P., in his opening address, said this had been the banner year in Ontario, both as to aggregate output of dairy products and the amount received. We made about the same quantity of cheese and our butter production had been the highest for the season just closed. Our butter exports for the season just closed were 2,111,101 boxes. The cheese exported in Canada at the close of navigation was 450,000 boxes, which would make 2,600,000 boxes, valued at \$22,000,000. Our butter exports from Montreal for the season just closed were 573,119 packages, and the estimated stock in Canada is 125,000 packages, so we made in the season 700,000 packages, valued at \$9,000,000. The bacon trade so closely allied with the dairy industry amounted to about \$15,000,000. Home consumption in 1905 was about 3,500,000 packages. We received about \$10,000,000 more in 1905 than in 1904, for cheese, butter and bacon. Our dairy men produced, excluding condensed milk, milk for our cities, towns, etc., cheese valued at \$22,000,000, butter, 2,000,000, bacon \$50,000,000, or a grand total of \$95,000,000. We are sending our goods not only to the mother country, but to the west and Japan as well, in increasing quantities each year.

## AUXILIARY DERAILLED.

Brakeman Dennis O'Brien Killed and Three Trainmen Seriously Injured.

Stratford, Jan. 11.—While on the way to Waterloo to replace an engine which was off the track, the Stratford auxiliary, was derailed at Reder's station, about 9 o'clock Tuesday night. One man is dead and three others were more or less injured.

The car containing the crew left the track and rolled down an embankment, imprisoning the men. Before they could be released, Hugh Bateman, car inspector, was badly burned by fire from the overturned stove, which fell on him, and Herbert Farr, brakeman, was also burned, but not seriously.

Dennis O'Brien, brakeman, received such serious injuries that he died in the afternoon at the Stratford hospital. It is supposed he was on the steps of the car when it left the track, and legs being almost severed. O'Brien was 27 years of age, and unmarried, and lived in Stratford with his mother.

The train was going at a good rate of speed on a down grade when the accident occurred, and it is supposed to have been caused by a broken car wheel.

## Falls 80 Feet to Death.

Midland, Jan. 11.—A shocking accident occurred at the new elevator on Tuesday by which Robert John Leitch, a young man, aged 24 years, was instantly killed. The roof was being placed on the tower, and the young man was walking on a scaffolding upon which props had been placed to support a portion of the roof. While the extra weight the scaffolding gave way, and the young man fell to his death eighty feet below. His head was badly smashed.

## Killed in Saw Works.

Sault Ste. Marie, Jan. 11.—An explosion at the blast furnace of the Algoma Steel Co. plant yesterday killed Wm. Auld and seriously injured two others, who will probably recover. Auld's death was caused by flying bricks, which killed him instantly.

## Gas Generator Burst.

Delhi, Jan. 11.—Yesterday morning quite a serious accident happened to Richard Lynes, caretaker of the Methodist Church. He was cleaning out the acetylene gas generator, which is situated in a small brick building about fifty yards in the rear of the church yard. After he had drawn out the slush he struck a match to see if it was all clear at the bottom, and instantly there was an explosion. There was a hole blown through the roof, and a twenty-five pound weight, which was on top of the generator to give more pressure, was found about a hundred yards from the gas building. Mrs. Lynes' face and top of his head were severely burned.

## Eight Lives Lost in Hotel Fire.

Minneapolis, Minn., Jan. 11.—Eight persons died of suffocation or of injuries sustained in leaping from a fire-proof hotel building, a score of persons injured and a building damaged \$25,000 by fire, smoke and water is an epitome of the carnage caused by a disaster which befell the West Hotel, Hennepin avenue and Fifth street yesterday, throwing 700 guests and employees into a panic. Fire Captain John Berwin fell from the fourth
