WANTS BERGDOLL
JAIL FOR THIRTY YEARS
Still Sentence Asked for Alleged Rich
Deserter

NEW YORK, March 18—When the
court-martial of Grover Cleveland
Burdell, wealthy young Philadel-
phian charged with desertion because
of his alleged failure to report for
military service under the draft, was
resumed on Governor's Island today
his counsel announced that no defense
would be offered as it believed the
government had failed to establish
its case. The defense then read.
The announcement came as a great
surprise to the prosecution. D. C. Gh-
boney, chief counsel for the defense
asked the court to state the limit of
punishment in the event that the ac-
cused pleaded guilty but that the re-
quest was refused.
Lieut. Col. Charles C. Cresson, trial
judge advocate, in his argument to the
court, asked that a sentence of thirty
years imprisonment be imposed up-
on the defendant.

STARTING BEEKEEPING "SYRUP OF FIGS" IS LAXATIVE FOR CHILD

Suggested Outfit for the Apiary Novice.

Start With the Right Hive—The
10-Frame Langstroth is regarded
as the Best—How to Prevent
Swarming—Care of Freshening
Cows.

(Contributed by Ontario Department of
Agriculture, Toronto.)

EXTRACTED honey production
is the most satisfactory for
beginners. Start with three
colonies and sufficient up-to-
date equipment and then make the
bees pay their way. One colony does
not give the beginner an opportunity
to right mistakes or accidents profit-
ably. Three colonies can be managed
by devoting one evening weekly to
the apiary.

Avoid many troublesome pitfalls
by starting with the right hive. The
10-frame Langstroth hive has given
the best satisfaction in Ontario. All
beekeepers' supply houses carry this
hive and its parts in their regular
stock. Buy your first hives from a
good manufacturer. It is very neces-
sary to have all hive parts inter-
changeable so that they may be used
in any colony in the apiary. Uniform-
ity and accurate workmanship alone
can ensure this need.

One complete 10-fr. Langstroth
hive consists of:

1. A bottom board.
 2. A hive-body with self spacing
frames and wire.
 3. A telescoping metal roof cover.
- In addition the beginner should
provide for each colony one queen ex-
cluder; two extra hive-bodies com-
plete with frames; and 7 lbs. of Me-
dium Brood Foundation which runs
six sheets to the pound, to fill the
frames with a guide and foundation for
the future combs. All hive ma-
terial should be nailed, wired and
painted before the opening of the
spring rush.

It is advisable to commence with a
2-lb. package of bees and queen; a
swarm or a nucleus. Less danger
from disease attends the buying of
swarms than the buying of nuclei.
Swarms and nuclei, pound packages
may be secured for delivery from
May 1st to June 30th. Early pack-
ages will give a surplus if carefully
handled. Enquire of the Provincial
Agriculturist re disease in your locality
before buying swarms, nuclei or col-
onies. A small colony of bees is much
less vindictive than a full colony and
thus offers a better opportunity for
the beginner to grow with his bees.

The necessary equipment for the
beginner should consist of:

1. A veil of black cotton, tulle.
 2. A standard bee smoker.
 3. A hive tool.
 4. A spur wheel wire embedder.
 5. A hive knife.
 6. An uncapping box.
 7. A complete set of Department
literature, Bulletins 213, 233 and
256, and a good reference bee book.
 8. A small box extractor.
- With the exception of Nos. 6 and
8 it is advisable to acquire the ma-
terial needed from a supply firm at
once. The uncapping box can be
made at home, and the beginner could
probably co-operate with another bee-
keeper in securing the use of an ex-
tractor. With the increase of col-
onies to ten, he would then be advis-
able to provide a storage can to assist
in handling the crop.—W. A. Weir, O. A.
College, Guelph.

To Prevent Swarming of Bees.

June is the swarming month and
time of supering for the main honey
flow which begins between the 10th
and the 20th of the month, depend-
ing on the season and the latitude.
Be sure to give supering boxes. To
avoid any crowding which may cause
the bees to become discouraged, quit
work and swarm excessively. It
should be the beekeeper's aim to pre-
vent swarming as much as possible.
This is done by keeping young
queens, giving plenty of room and a
systematic examination of brood-
chambers to detect colonies which
are preparing to swarm. When queen
cells are found far advanced they
should all be destroyed and the queen
less removed. After the queen colony
has been queenless one week the
combs should again be examined and
all cells except one removed. This
one will provide them with a queen
and if only one is left they will not
swarm again. Where an improvement
of stock is desired the new queen
may be given instead of leaving one
queen cell.

Natural swarms should be hived
on the old stand after removing the
parent colony to one side. The
swarms should be given the supers
from the old colony. New swarms
work with great vigor because they
have no brood to care for during the
first week. Colonies held together
without swarming gather more honey
than those which swarm. It is the
beekeeper's patriotic duty to reduce
the cost of honey production and thus
increase the quantity he is called to
produce as greatly as possible. They
also cause the beekeeper less trouble
at unexpected times. This may be
done more by swarm prevention than
in any other way. Bulletin 233 takes
this matter up thoroughly and should
be carefully studied by all bee-
keepers. By mastering the methods
described it is quite possible to man-
age as many apiaries as there are
days in the week, barring Sundays
and rainy days.—W. A. Weir, O. A.
College, Guelph.

Care of the Freshening Cow.
This is the month when a large
number of cows freshen. Both fresh
cows and newly-born calves should
receive special attention. Cows ex-
pected to freshen should be placed
in a box stall for a few days before
and after freshening. Many valuable
cows and calves are lost by neglecting
to provide box stall accommodation.
This should be found in every dairy
stable; or else have a special barn
for the purpose.

The Montreal Tenants Protective
Association plans to build apartment
house on a co-operative basis.

DOCTOR WARD, The Specialist

SPECIALIST IN THE TREATMENT OF NERVOUS CONDITIONS, NERVE EXHAUSTION, BACKACHE, LUMBAGO, RHEUMATISM, STOMACH AND LIVER TROUBLES, ACNE, SKIN DISEASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS. The knowledge gained from many years' experience in treating diseases just like yours is of much benefit to you and assures the ailing man of prompt relief. When a man knows that he is again feeling well—that he is rid of his ailment—he feels that a heavy load has been lifted from his shoulders. I give every patient the benefit of the knowledge acquired through the long experience of a graduated, licensed and registered specialist, in order to bring about the most satisfactory results in the shortest possible time.

NERVE EXHAUSTION
A CONDITION AFFECTING MANY MEN—THE GREAT AMERICAN DISEASE—IT IS BROUGHT ON BY OUR MANNER OF LIVING—OUR WORRY AND HURRY—AMERICANS EXHAUST MORE NERVOUS ENERGY THAN ANY OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their nervous system. These men do not know what is the reason they don't feel right—why they can't work like they used to—why they tire so easily and why they are irritable, nervous, despondent, weak, pale and lack ambition. These conditions require the expert knowledge and treatment of a specialist who has had many years' experience in just such ailments. A specialist learns by experience to know just the right treatment at the right time so that the patient can be dismissed at the earliest possible time. Men affected with nervous exhaustion have no endurance—no ambition—everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable—they become irritable, cross and discouraged. They have pains and aches in various parts of the body and there is often indigestion and pains in the stomach. Sleepless, wakeful and restless nights follow.

RHEUMATIC AILMENTS
SCIATICA AND OTHER FORMS OF RHEUMATISM, LUMBA-GO, PAINS IN BACK, SWELLING, ACHING, PAINFUL CONDITIONS IN ANY PART OF THE BODY—INFLAMED AND SWOLLEN JOINTS OF LEGS AND ARMS—MANY OTHER SYMPTOMS.

Hundreds of men are suffering with some form of Rheumatism. Many of these men go from day to day suffering untold agonies thinking they cannot be cured. They have tried liniments, rubbing, massage, salts and other treatments without experiencing any relief, and they are now going through life thinking they are martyrs to that burden called Rheumatism. If these men could only know how easy it is to get rid of many rheumatic conditions I know they would not suffer another single day. Then all sufferers of rheumatism would be strong and healthy if they could get rid of the condition. Rheumatic patients are nearly all strong and robust before being attached by this ailment, and therefore it is so hard for the man to understand why he should suffer the agonies of such a condition. When a man gets rid of such a condition he feels that a heavy burden has been lifted from his life, and he starts right out to make up for lost time both in money and pleasure. When a man comes to my office suffering with the above condition he is given a most careful examination, and he is given treatment that he feels is giving him great benefit.

Quick and Lasting Results Assured the Ailing Man
