He decated above, without interfering with other measures intended to have a more radical effect. Price 25c. a box.

Market Notes.

Codfish: With Labrador Soft break ing all price records, sales ex vessels were made last week at \$14.50 and in several cases a higher figure than this was paid. The exports to Saturday were 64,867 quintals, which included a heavy cargo of Labrador soft to Europe. This total holds the week's re cord since the war.

Codoil: The best price offering at present is \$370, with \$360 the regular price. Those who held back for an advance have lost considerably and without any possibility of recouping themselves, as there is no likelihood of common oil taking an upward turn especially if peace terms are signed by the coming of the New Year. Re-

fined has not improved any and sales were made at \$2.50 per gallon. Herring: Bonne Bay opened the fall fishery with a take of 35 barrels from nets on Wednesday, while at Rocky Harbor, near there, 25 barrels were landed; 36 plants are ready for the fishery at Springdale, N.D.B., and some 70,000 barrels are stored in readiness. Scotch pack commands \$18 per barrel and splits \$8, with demand good. Provisions: A request has been made by United States and Canadian farmers that the Food Controllers these countries set a higher value on their production of wheat. If this is done prices of flour cannot help but quiry into the motor car accident, in advance. Owing to the lack of bar-

rels a large percentage of flour is now being packed in sacks, a change which will add between 30 and 40 cents per barrel to present mill figures. Standard flour is selling in St. John's at \$14.40 to \$14.60, with total imports only a little over half of last year's.

Pork and Beef prices are unchanged. though another push up has taken place in the Chicago market, and from this we may expect an equivalent advance, locally, at any time. An advance of one cent per pound in Sugar has been allowed by the local Control Board on the last shipment of 2,000 barrels, which is the monthly allotment for Newfoundland. A prevailing scarcity of granulated is expected, but

Vaccination. A supply of vaccine has been received from Toronto, and will be supplied to medical men on appli-

cation to the undersigned. The vaccine is given in two doses, hypodermically, and, as some reaction generally follows the first dose, the patients are advised to rest for twenty-four hours after inoculation. The second dose is given two or three days later. It is recommended to make the injection in the lax tissue below the clavicle, and all antiseptic precautions must be taken. The temperature must be taken immediately before inoculation, and if any symptoms of commencing sickness appears, the

dose should not be given. In the first instance it would be well to use the vaccine on those who are specially exposed to the infection-those waiting on the sick in infected houses, undertakers, and others who require special protec-
