Corner WATER and SPRINGDALE STREETS.

R-34 Not a "Blimp."

Is it a blimp? If not, what is it? This question was asked whether the R-34—which raced across the Atlantic and across the newspaper headlines—was a blimp. The answer, given on the best authority, is that it is not a blimp.

A blimp is a non-rigid airship, and a blimp is a term applied to the British "R" type of airship developed in the war to hunt submarines. The rigid dirigible is a limp sort of thing, and makes its way through the air without any aluminium structure

such as supports the sides of the R-34. Hence the B—limp, or "blimp." In spite of its blimpishness, however, the blimp is able to make good speed for the gas in its envelope is under high pressure, which holds the shape of the bag. All the naval dirigibles—the C-5, which was blown to sea from Newfoundland; the C-4, now at Rockaway; the C-8, blown up at Camp Holabird, Md.—are or were blimps.

Major G. H. Scott has added to the literature of the blimp discussion by declaring that the blimp is a "fletted" rigid—that is, a rigid dirigible with the bones taken out.

What does the "R" of R-34 stand

for? Too simple! "Rigid" of course, unless it stands for something else.

THE SIGN OF THE CARIBOU!—The Boys who faced the Bullets, the Boys in Blue, who defied the submarines—all patriotic citizens, report yourselves in a Soldiers' Tent. Regatta Day. Invigorating Drinks of all kinds—including our Special Hop Beer. Smokes various and varied. A Comrade solicits your custom. H. A. TOMPKINSON, Private Royal Nfld. Regiment.—aug9,31

MINARD'S LINIMENT CURES DIPHTHERIA.

Blazers of Air Trail.

1500—Jean-Baptiste Dants made flights with a glider of non-vibrant wings in Perugia, Italy.

1742—Marquis De Bacqueville used imitation flapping wings from house on Seine to garden of the Tuilleries.

1842—Henson patented monoplane to be driven by steam engine. Wing span, 140 feet.

1871—M. A. Penaud built toy model which flew 131 feet in garden of the Tuilleries.

1876—Penaud designed airplane with two propellers.

1896—Prof. S. P. Langley's steam-driven monoplane model flew over Pontomac successfully for 3000 feet at twenty to twenty-five miles an hour.

1896—Lillenthal flew biplane glider previous to fitting it with 2½ horsepower engine; killed in flight.

1900—Wilbur and Orville Wright experimented with gliders with arched surfaces and adjustable rudder in front. Glided 600 feet.

1902—December 17—Wright brothers fitted a biplane glider with sixteen horsepower motor, made first successful sustained flight in world.

1906—September 13—Santos Dumont made first officially recorded European airplane flight.

1907—October 26—Henry Farman, Englishman, flew Voisin 2500 feet in fifty-two and five-tenths seconds in a straight line.

1909—August 8—Orville Wright surpassed French records for duration, distance and height in flights in France.

1908—October 10—Orville Wright made flight of one hour's duration with one passenger.

1909—July 25—Bleriot crossed the English Channel from Calais to Dover in thirty-seven minutes.

1909—September 29—Wilbur Wright flew around Statue of Liberty.

1913—June—Brindejon flew from Paris to Warsaw stopping at Berlin, covering 933 miles in eleven hours including stops.

1914—July—Successful trials of the "America," ordered by Rodman Wamaker for trans-Atlantic flight.

1914—1918—War period.

1919—Harry G. Hawker and Commander Mackenzie Grieve cross considerable portion of Atlantic in Sopwith plane.

American seaplane, N. C-4, completes a stop trans-Atlantic flight from Rockaway Beach, New York, to Plymouth, England, in 59 hours and 56 minutes.

Capt. John Alcock in Vickers Vimy Biplane crossed the Atlantic, covering the distance in 16 hours and 22 minutes.

The British dirigible, R-34, successfully crosses the Atlantic in a return voyage, in 183 hours, flying from Scotland to New York and back.

Jimmy Wilde Boxing Freak.

The career of the Welsh fighter, Jimmy Wilde, who weighs 105 pounds, yet knocks out champions 20 pounds heavier, has aroused great curiosity among the boxing element in the United States. Referee Eugene Corri, of the National Sporting Club, visualizes Wilde in the following description:

Picture, if you can, a child-man dressed as a sergeant-major. Then you have Jimmy Wilde, the greatest boxer of all countries, the pugilistic puzzle of all the ages.

He stands a few inches more than five feet, his face is hairless, he has little, dull, sleep eyes; his voice pipes; it is a baby squeak. Fully dressed, he weighs a mere trifle more than seven stone (98 pounds). This is the atom who in more than 100 fights has pounded, pummelled and literally mesmerized men in a way that has left us all gasping.

I date from the long ago; all the fighters of all the countries for the last 35 years I have known, and yet I can recall no counterpart of this fistic pigmy.

Wilde may not be judged by any standard, for his ways, his career, explodes all preconceived notions. He is not of any school; he is a pupil of no man. His style is wrong. It is a thing apart; no textbook governs it. He fights without a guard; his long, skinny arms hang limp by his side; he is flatfooted; he slithers around in a way so casual, so leisurely, so indifferently that you watch him open-mouthed. He invites murder.

He is the murderer—he is the demon—he is uncanny—he is a freak.

A Penny Note.

The smallest bank note ever issued in Great Britain was for the sum of one penny, and was issued in 1828. About fifty years ago the then holder of it brought it back to the Bank, and after some little bargaining asked and received £5 (\$25) for it.

There is a wide gap in value between the lowest and the highest bank-notes ever issued. The highest represents £1,000,000. Only four of these million pounders were issued—from a plate which was destroyed. One of them was in possession of the Rothschilds; Coutts, the banker, received another. The Bank of England retained the third, and the fourth became the property of Rogers, the banker-poet, who had it put into a gold frame on his parlor wall.

Summer Time Needs

We can suggest just what you want for every occasion. Practical and essential things for sports wear, for seashores, lakeside or for a good old-fashioned time on the farm or in the country.

Slip-On Sweaters

C. MACKENZIE HARVEY, Aug. 9, 1919 Hon. Treas.

ARGYLE HELD UP.—The s.s. Argyle has been held up at Placentia the last few days, owing to some of the firemen having left the ship.

When Tennis Was a Crime.

Modern folk are accustomed to regard tennis as an innocent enough sport, likewise bowls and shove-ha'penny, which is still a popular game in the Navy; but our ancestors even went so far as to pass a law against these mild forms of recreation. In 1544 the "bowyers, fletchers, stringers, and arrowheaded-makers of this realm" petitioned Henry VIII. of matrimonial fame, to prohibit "Sundry newe and crafty games as . . . syldehrithe, otherwise called shove-groote, tennys and bowles, practised within this realm to the great hurt and lett of shotinge and archerie."

It appears that the lads of the village preferred to exercise their cunning at "syldehrithe" when, in the opinion of the bow and arrow makers, they would have been better occupied in shooting at the butts on the village green. However, King Henry granted the petition, moved, no doubt, by a passage mourning the decay of good archers. . . . "who have not only defuded this realm against the cruel malice and danger of their enemies in tyme paste, but also with little numbers . . . have done many notable actes and discomfytures of warre against the infidels." The fine old English fighting spirit which rings through this passage must have appealed to

bluff King Hal, and Act of Parliament was duly passed making the "newe and crafty" games illegal, and rendering players thereof liable to a penalty for each offence of 6s. 8d.—a considerable sum in those days.

Presumably the "bowyers and fletchers" went on their way rejoicing, all unaware of the danger which threatened their craft from another quarter. They had not reckoned with a certain Friar Bacon, whose discovery of gunpowder was destined to bring about the "decay of archerie" for good and all.

Work for the League.

ANGLO-ARGENTINE TROUBLES.

BUENOS AIRES, Aug. 4.—Diplomatic relations between Great Britain and Argentina, as a result of the purchase by Argentina of the German steamship "Bahia Blanca," are delicate according to La Nacion. In tomorrow's edition, the newspaper will say:—"Regarding rumors which from the beginning, have been founded on more than supposition we have received versions, the gravity of which are self-evident and according to which the return to London of Sir Reginald Tower, British Minister, to Argentina and the departure of Francisco Alvarez De Tolado, Argentine minister to England from London are not disconnected.

Good Food Does Make a Difference

The presence in Grape-Nuts of all the nutriment of the wheat and barley from which this delicious food is made, including their vital mineral elements, often spells health instead of illness.

Grape-Nuts

is a wonderful health builder.
