### Songs We Used to Whistle and Sing

The following song sent in by a couple of subscribers, has been asked for on several occasions:

Put My Little Shoes Away. Mother dear come bathe my forehead for I am growing very weak, Mother let one drop of water fall upon my burning cheek.

CHORUS: I am going to leave you mother so member what I say, Then do it, won't you please mother, put my little shoes away. Santa Claus gave them to me with a lot of other things And I think he sent an angel with a

pair of shining wings. CHORUS: Soon the baby will be larger and they will fit his little feet, Then won't he look so nice and cunning as he walks along the street.

Lieut.-Col. and Mrs. C. W. Belton, of Kingston, and formerly of this city, announce the engagement of their daughter, Florence Beryl, to Mr. Edgar Howell Shuttleworth, the marriage to take place in

Mrs. R. C. Eckert, of 434 Queen's evenue, with her daughter Anna, and sons, Clayton and Hubert, leave New York on Friday for a three months' trip to England and the Continent.

### THE PROPER CARE OF A PIANO -MOTHS AND RUST ARE FOES

Extremes of Heat and Cold To Be Avoided-Wipe Keys With Alcohol to Prevent Yellowing

otherwise careful housewife, for the the piano is dusted, with a cleth damp-The piano is often neglected by the simple reason that her attention is seldom, if ever, called to its care. It seems to some if the tuner arrives periodically and the instrument is carefully dusted that is all there is to the care of the

However, the plane is a very delicate instrument, as all musicians know, and lime and bran water. It should be aprequires very watchful care. The first plied and allowed to dry slightly. It consideration is the position of the piane. should then be rubbed off with a cloth, Often the only object in placing a piano and magnesia powder applied to the keys is to have the best light fall on the music rack. But the piane should not be placed too near the outer wall, the fireplace or radiator, as it is subject to the influences of the atmosphere. Avoid Extremes.

Extreme heat and extreme cold are very harmful to the piano. If one wishes. to have a musical instrument in the best of condition and to keep it so, an even temperature should be maintained in the room where it stands. If there is too much moisture in the atmosphere the wires become rusty, if there is too much heat the musical adjustment will be inlured as well as the wood in the case. The rusting of the wires can be pre-

vented by sprinkling them with lime or by placing a bag of unslacked lime in the interior to absorb the moisture. When the atmosphere becomes too dry it is well to have a plant in the room that requires plenty of water. A jar of water kept in the room helps by evaporation. Heavy articles should never be placed on the top of the piano nor should music

The keys should be wiped daily, when ened with alcohol. If this plan is followed there is less likelihood of their turning yellow. If the keys are soiled a cloth dipped in whiting and rubbed with alcohol will be found excellent for cleaning them. When the keys have become very yellow and need to be bleached try

until dry. In a few minutes the keys can be polished to a high lustre. Prevent the Moths.

Then care should be taken to prevent moths getting into the piano. Prevention s always worth while. In this case the carpet under the piano should be sprinkled with camphor and ground moth balls placed on the floor underneath. A bag of camphor balls should be suspended from a nail driven in the outside of the plane.

If moths do get into the piano make a mixture of benzoline and turpentine, using seven parts of benzeline to one of turpentine and add a drop or two of lavender water. Use a small scent spray or an old syringe to squirt this into the

piano. Dealers in pianes say that the best way, as, well as the most satisfactory way to clean a piano is to simply wash it in lukewarm water, drying each part briskly and rubbing it thoroughly just after it is washed, A chamois skin can be used to advantage here. This method leaves the polish absolutely uninjured.

## Cynthia Grey's Mail-Box

· [Correspondents are requested to make their inquiries as brief as possible, and to write on one side of the paper only. It is imppossible to give replies within a stated time, as all letters have to be answered in turn. No letters can be answered privately.]

From Young Housekeeper.

Dear Miss Grey .- I have always noticed in your paper, how good you were to answer all the questions asked you. Have never troubled you before, and hope I will not make you tired answer-

There is a good deal of the "business woman" about the housekeeper of the modern generation, yet she has not discovered the mysterious means of "catching the market." She reads with dismay that vegetables, meat, flowers -everything she requires-is "up." Or the joyful news is flashed to her that all her needs, even the luxuries she promises herself, are "down." But always the price is the same when it comes to the actual ordering of what she must have

In the spring your blood needs cleansing and enriching, largely because your diet has been chiefly There is a high water line around heavy and your life mostly indoors during the winter. There sible to remove," said Mrs. Newlywed.

"Wet a flannel cloth with kerosene oil and thoroughly rub the tub," said Mrs. Neighbor. "Wash with scalding water in which some washing soda has been dissolved. Dry thoroughly, and the tub will have a beautiful polish."
