

MINERS' LEADER MAY OPPOSE SAM GOMPERS

A. F. of L. Pledged Support To
Fight of Packing House
Workers.

DENVER, Colo., June 15.—The American Federation of Labor, in convention here today, unanimously pledged its support to the packing-house workers of the United States in their fight against further wage reductions.

The "big five" packers were condemned of attempting to reduce almost a million workers and their dependents "to a degrading state of poverty with all its attendant deprivations" and thus cause an "unfortunate condition that because of its far-reaching results will also impede the progress of the nation."

Appeal For Moorey.
In making an appeal for organized labor to keep up its fight to free Thos. Moorey and Warren K. Billings, convicted in connection with the San Francisco "Preparedness Day" bomb plot, John Moorey, a brother of Thos. Moorey, told the convention that these men were kept in prison by a "criminal conspiracy on the part of the State of California."

Lewis vs. Gompers.
Interest in whether John Lewis, president of the United States Mine Workers of America, would oppose President Gompers for re-election continued a high pitch today. Lewis continued to maintain silence, but it was learned that he had established headquarters at a local hotel, where representatives of the mine workers from all sections of the country are located. Practically all the executive board members of the organization were reported to be in the city.

COTTON OPERATIVES RETURN TO WORK AGAIN ON MONDAY

MANCHESTER, Eng., June 15.—The Textile Workers' Association, which represents all branches of cotton operatives, voted for a resumption of work, 266 against 227, and arrangements are being made for a return to work next Monday.

The compromise was based on an immediate wage reduction of forty-six pence to the pound sterling, and a further reduction of seven pence at the end of six months. It also provides for a reduction of sixty per cent in the rates for piece workers and another ten per cent six months hence. There is a proviso that should either side to the controversy desire a revision of the agreement three months' notice must be given.

MAY ATTEND SITTINGS

SIR LOUIS DAVIES, chief justice of the supreme court of Canada, will probably attend the sittings of the judicial committee of the privy council in England this summer. In the event of his deciding to go, Sir Louis stated that he would sail about June 21 for the old country.

REMOVAL OF EMBARGO WOULD MEAN CHEAPER MEAT, SAYS TRADERS

English Witnesses Declare
They Have No Fear of
Disease.

LONDON, June 15.—By Canadian Associated Press.—Witnesses today before the cattle embargo commission were representative English meat traders, who unanimously asked for the removal of the embargo on the ground that the prices of meat would go down. They also stated that they had no fear of disease "being introduced into the United Kingdom through Canadian cattle which they asserted were exceptionally free of disease."

PREMIER WILL NOT SPEAK.
MILTON, Ont., June 15.—Premier E. C. Drury and Mrs. Drury will attend the U. F. O. picnic here on Saturday, but the premier will not give an address, owing to throat trouble, he having been advised by his physician to cancel for two weeks engagements to speak in public.

LORDS' ACTION LEADS TO NEW PEACE RUMORS

Suggestion Made That Smuts,
Grey or Derby Open
Negotiations.

LONDON, June 15.—Adjournment of the debate in the House of Lords yesterday after weighty arguments by Lord Buxton and Viscount Bryce in favor of amending the Home Rule act and entering into negotiations with the moderate Sinn Feiners, together with the announcement that the Government would reply on Tuesday brought out new peace rumors today. Suggestions are also made that advantage should be taken of the presence of the Dominion Premiers in London to make renewed efforts to reach a settlement of the Irish difficulties.

Endeavor To Negotiate.
The idea generally favored is that some prominent men like Jan Christian Smuts, premier of the Union of South Africa, Viscount Grey and the Earl of Derby should be designated by the Government to meet a delegation representing the Northern and Southern Irish parliaments and endeavor to negotiate an acceptable compromise. Although nothing definite can be learned as to an impression that the Government is about to make some new attempt in this direction.

EMPLOYERS LOSE HOPE OF SETTLING PRINTERS' STRIKE

Fight Will Be Long One,
Says Secretary of Toronto
Typothetae.

TORONTO, June 15.—Conferees with the unions concerned in the strike of the printing trades not having resulted in an amicable settlement of the dispute, the resignation of the negotiating committee of the Toronto Typothetae was accepted at a meeting of the employing printers tonight. This means the abandonment by the employers of any hope of a settlement.

The employers present, who claimed that they represented 90 per cent of the entire printing production of Toronto, reaffirmed by a standing vote their determination to operate in future on the open shop principle, and to have absolutely no individual dealings with the various unions involved in the strike.

Secretary W. A. Sutherland of the Toronto Typothetae stated tonight that it was expected that the fight would be a long one, and the employers were making their plans accordingly.

MODERATE DRINKERS ENEMIES OF HUMANITY SAYS REV. H. DOBSON

Declares Movies and Comic
Papers Are Controlled by
Liquor Interests.

WINNIPEG, June 15.—Rev. Hugh Dobson, of the social service branch of the Methodist church in Canada, told members at the Manitoba Methodist conference morning session that moving picture shows and comic papers are largely in the control of the liquor interests and that Canadian newspapers every week are saturated with false reports from "wet" sources.

Mr. Dobson charged moderationists with being backed by liquor interest. He called members of a moderation program, "enemies of humanity." "There is more harm in moderate drinking than there is in convivial drinking with actual drunkenness," he asserted.

ABOLISH GRAIN CONTROL.
BERLIN, June 15.—The compulsory delivery of 2,500,000 tons of grain by German producers out of this year's harvest is provided for in a bill adopted by the Reichstag today after a stormy debate. The bourgeois parties, advocating the measure, were solidly opposed by three socialistic factions. The latter demanded a national reserve stock of 4,500,000 tons, which would amount to a continuance of the present system of government control. The present action is the first step in abolishing official control and rationing of grain.

ECZEMA
You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritation. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c stamp for postage. See a box; all dealers or Edmondson, Bates & Co., Limited, Toronto.

HOUSE OF INDUSTRY IS CHIEF TOPIC OF COUNCIL DISCUSSION

County Legislators Adjourn
Sessions To Visit Institution
Personally.

WESTERN MAN ARRESTED

Wabash Firemen Held by St.
Thomas Police For Regina
Authorities.

ST. THOMAS, June 15.—The Elgin House of Industry was the chief topic and subject of discussion, which kept the members of the county council on their feet pretty well all the forenoon of today. The mover of the resolution, Reeve Thomson, Rodney, for an investigation of the landed conditions there, was tendered more than the compliments of several of the members. The reeve, however, confessed that he has no grudge against Supt. Gooding, nor found fault with his way of conducting the institution. The purchase of the land complained of was not the doing of Mr. Gooding, and the Rodney reeve had it from ex-Warden William Tolmie that the farm was not what it should be. Reeve MacIntyre, Southwold, strenuously defended both the capabilities of Mr. Gooding as a manager and grazing qualities of the land. Mr. McIntyre objected to the everlasting criticism of the "things" at the House of Industry, when other items of more moment to the interests of the county were not given a thought. He considered it a fair and just thing that the responsible party for the failure of the farm to meet the expectations of some of the members. When the 50-acre farm was bought it was thought to have been a good investment. The land was supposed to be satisfactory for the purpose of its purchase, and the reeve still believed the land to be all right.

Several other of the councillors protested against the publicity given to the institution "which will be of some damage to its already good reputation," when a resolution carried that the council at once visit the House of Industry and get a personal insight into the conditions alleged to be found there. The members drove out in the afternoon and were given considerable information by Supt. Gooding as to the situation complained of by Reeve Thompson.

Aged Resident Dies.
Augustus Howse, a life-long resident of South Dorchester, died at the Amasa Wood Hospital last evening in his 84th year. Two sons and a daughter survive. John of Strassburg, Sask., Frank of Winnipeg, and Mrs. H. A. Roberts of St. Thomas. Mrs. Smuck of Aylmer, Mrs. Bingham, Orwell, are sisters and John of Copenhagen, a brother. Interment will be in Mapleton cemetery on Saturday afternoon.

Charged With Forgery.
Arrested on a charge of forgery on an order from the police at Regina, George Rice, a Wabash fireman, is held until the arrival of an officer from that city. The forgery is alleged to have been committed some months ago.

Beats His Wife.
Charles Murphy of Vienna, was allowed out on a bail bond today amounting to \$2,000, after he had been charged with beating his wife, Minnie. He will come up on Wednesday.

Stringfellow-Brackin.
The marriage of Pauline Smith Brackin, daughter of Mr. and Mrs. Edgar A. Smith, 42 Rosebery Place, and Henry Arlsey Stringfellow, of New York City, took place this afternoon at the home of the bride, Rev. J. W. J. Andrews, rector of Trinity Church, officiating. The wedding march was played by the Stringfellow Orchestra. Mr. and Mrs. Stringfellow will leave on a wedding trip to China, Japan and the Philippines, and on their return will reside in New York. About 50 guests were in attendance.

WINDSOR CHILD IS MYSTERIOUSLY HURT

Police Do Not Think Injury
Caused by a Bullet.

WINDSOR, June 15.—An investigation conducted by Inspector of Detectives Reid of the Windsor police, failed to throw any light on the manner in which Aubrey Robertson, aged 13, of 26 Bridge avenue, sustained a severe wound in her head. A piece of metal, presumed to be a bullet, is lodged in her head, but how it got there is unknown.

The little girl was found lying unconscious in an automobile near a private garage a short distance from her home. Several other little girls were near her at the time, but they did not notice anything wrong with the Robertson girl until she suddenly collapsed.

Inspector Reid questioned various persons in the vicinity, but no one heard a revolver shot or saw anything suspicious. The inspector is of the opinion that the wound in the girl's head is larger than could be caused by the ordinary revolver bullet, and that she may have fallen against some sharp steel object which penetrated the head.

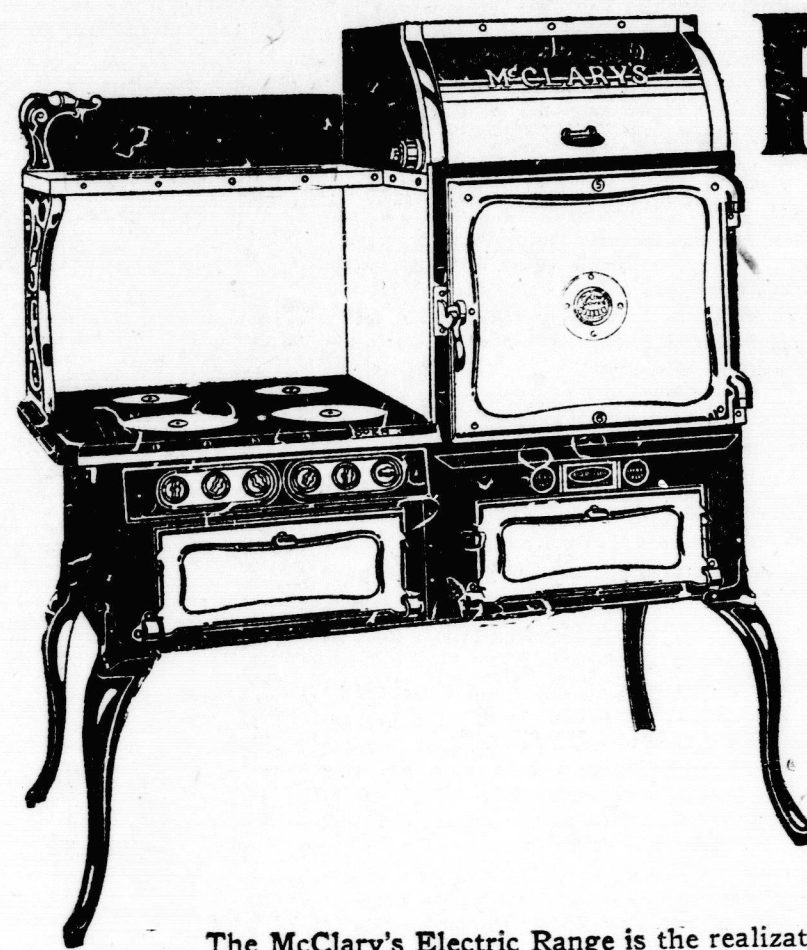

**BETTER TIMES IN
SIGHT; RAIN CHEERS
WESTERN FARMERS**

Calgary Man Foresees Heaviest
Buying Season in
History of West.

Mr. T. H. Yull, managing director of the Federal Advertising Agency, received the following telegram from the Farm and Ranch Review of Calgary, Alta., last evening:

"Delighted to inform you of a heavy general rain in Western Saskatchewan and Southern Alberta last night. Conditions previously were quite promising, but this rain, coming at a most favorable moment, practically assures satisfactory crops. Northern Alberta also excellent. Farmers are jubilant and industries should prepare for the heaviest buying season in the history of the West."

McClary's Electric Range

—Result of years of study, research and experiment in McClary's own laboratories and workshops.

—A tested and proven electric range, admitted to full fellowship in the big family of reliable McClary's products which for over 70 years have made the name McClary's known and welcome in Canadian homes from the Atlantic to the Pacific.

Not merely "as good" or "good enough", but the very best that science and skill and conscientious endeavor could produce, is the *McClary's Electric Range*.

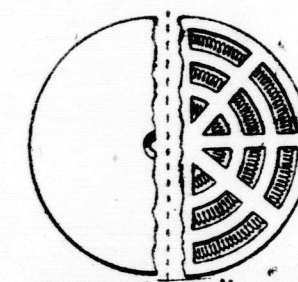

Now that ample electric power is assured the householders of Ontario, the installation of the cleanly, convenient, economical electric range becomes a practical possibility in thousands of homes.

The McClary's Electric Range is the realization of that possibility—the very highest and latest development in electric range construction.

With exclusive features which increase the efficiency, extend the life and make operation of the range simplicity itself.

McClary's name and reputation stands behind the McClary's Electric Range, which means that McClary's not only believe but *know* that their Electric Range is the very best that can be produced.

Two Vital and Exclusive Features McClary's Protected Element McClary's Seamless, Jointless Oven

McClary's Ordinary
Protected Element
Exposed Element

over, or grease is spilled, it is almost impossible to clean them without damage.

Besides, they may become fused and burn out. Salt or salty grease or water are particularly harmful.

So McClary's, after much experiment and research, have devised a Protected Element which is practically indestructible—*absolutely* protected from grease, water, dirt or damage.

—Not only is the Element protected, but it heats as quickly and holds the heat longer than unprotected Elements.

The "Element" is to an Electric Range the same thing that a "burner" is to a gas range—it is the "flame".

The McClary's Protected Element is a disk of porcelain, in which are embedded the small coiled wires of high resistance alloy, safe from grease, dirt or any other damage.

In ordinary Elements these wire coils are exposed, and when pots boil or grease is spilled, it is almost impossible to clean them without damage.

McClary's Electric Range oven is built with a lining of one piece of sheet steel without a single seam or joint.

Because cooking vapours under heat pressure are forced through seams into the mineral wool (asbestos) insulation or packing.

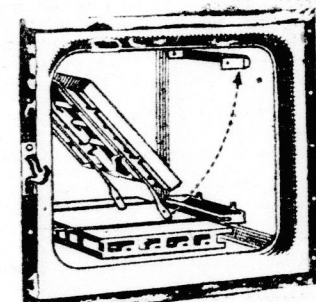

—Where they condense, collect and putrify, giving out stale, dead odors when the oven is cold, and tainting food with the fumes of decayed matter.

—Is the reason why the McClary's Electric Range oven is made in one solid piece without a joint or seam on the inside, and nicked for easy cleansing.

In order to clean it, all the racks and holders are instantly removable, leaving the walls perfectly clear, and the Elements in the top and bottom of the oven are hinged so they can be swung out of the way for cleansing.

The corners of the oven are rounded so that nothing can collect or remain hidden.

The McClary's Electric Range oven is a proven, tested, scientifically built oven.

Note rounded corners
and moveable
Elements

Has Everything a Good Range should have

WARMING OVEN:—A real warmer, with its own heating element, because no heat escapes from the cooking oven to heat the warming oven.

SLATE BLOCK CONNECTION:—No soldered wiring—no electrician required to remove—take out three small screws and it is disconnected.

SIGNAL LIGHTS:—To show when current is on or off—saves waste.

SWITCH BUTTONS:—Plainly marked "Full".

"Medium", "Low" and "Off"—absolute control of cooking heat.

FUSES:—Instantly get-at-able—in cupboard under main cooking top.

EXTRA PLUG:—For iron, toaster, or similar appliance.

THERMOMETER:—Choice of compensating or mercury thermometer—indicate exact temperature of the oven, giving complete control of roasting or baking.
