> THE CUNARD LINE-WITHDRAWAL OF THE STEAMSHIPS FROM BOSTON. -The folowing letter, says the New York Times of December 19th, is Cunard's reply to a communication from a native and citizen of Boston, who, at the request of several prominent merchants of that city, has recently visited the Provinces of Canada for the purpose of ascertaining the direction in which the great volume of American produce, increasing year by year and destined for European markets, can most satisfactorily be turned in order to insure to the shippers the greatest degree of despatch:

DEAR SIR.-I have to acknowledge the receipt of your communication on the subject of trans-Atlantic transportation, from which I gather that it is the general impression that if the proper inducements had been offered by our line of steamships vast quantities of produce would have gone to Boston for shipment, which port, with the proper inducements, you say shippers would prefer to any other. I must confess I am at a loss to know what is meant by proper inducements. We do not require in New York to make arrangements in Canada, or in the Far President failed to return it West, for freight, and during this last autumn, when we have been sending an average of 2,500 tons of freight every week, for 10,000 tons per month, in our ships rross this port, we have been unable of the country for ten years and of to get 500 or 600 tens once a forthight State of Virginia for three years. I do not know what Boston may be in the future as a place of shipment—I have only to deal have taken freight from Boston at 5s. per with the present. I have received 'communications from Philadelphia and Baltimore clearly proving that those ports offer greater inducements for Atlantic steamers than any others. I have no doubt that the writers fully believe what they wrote, but the trade was to be built up and the experiment to be made

at our expense and not theirs. I am very glad to hear that at last arrangements are being made to make through connections between Boston and the West, but I cannot admit that the reason why produce has not been shipped from Boston has been that we have not offered the proper inducements for taking sometimes frieight free, and we have not had to take stone ballast.
