An attentive audience greeted Mr. Ragan at Shaftesbury hall last night to hear his strated lecture on Here and There in ondon. The course of pictures was very real, and brought to many a one present scenes at once familiar and interesting.

Mr. Ragan spoke well and deserved all the applause he got. Scenes in Ireland will be produced and lectured on to-night.

THE ELECTRIC LIGHT.

It is not Likely to be Dangerous in Toronto

—The Precautions Taken by the Local Company.

As the city council will be called upon to act on the petition of the Toronto Electric Light company, and as there has been considerable talk about the danger from electric wires, a reporter interviewed Mr. Simon Hamburger, the manager of the Toronto Electric Light company, with the following results:

Mr. Hamburger, what wire do you use to conduct the current of electricity?
We use the wire adopted by the New York board of underwriters, and known to the trade as "double covered board unde writer wire.

Do you consider this wire perfectly safe, both as to life and fire?
Yes, where the insulation is perfect and the current not too strong. I can better explain that by saying we are not using anything larger than a 25-light dynamo, and the current of the system we are using is not what is known as high tension cur-

York Times on the danger of electric light wires, and can you give us any information on the subject?
Yes, I have read all of the articles in question, and from what I can learn the feeling in New York city is "that they were written in the interests of the underground companies in New York, who are endeavoring to force the telegraph, telephone and electric light companies to adopt a system which is incomplete and imperfect."

ber of medical students remained in the city and one of the number boarded on Seaton street. Within the household a beautiful daughter dwelt. The twain soon learned to love each other, and this fast ripened into a relationship the result of which the young lady became a mother. This Don Juan immediately left the city and has not since returned, and the probabilities are the girl whose character he best of it while he gloats over the ruin the beauty of gentle human faces round a child; secondly, in the fields, fields meaning grass, water, beasts, flowers and sky. Without these no man can be educated humanly. He may be a calculating machine,

walking dictionary, a painter of dead es, a twangler or scratcher on keys or out, a discoverer of new forms of worms out, a discoverer of new forms of worms oat-gut, a discoverer of new forms of worms in mud; but a properly so-called human being—never. Pictures are, I believe, of no use whatever by themselves. If the child has other things right, round it and given to it—its garden, its cat, and its window to the sky and stars—in time, pictures of flowers and beasts and things in heaven and heavenly earth may be useful to it. But see first that its realities are heavenly.

From a London Corresp.

back, is charming in its simplicity. friend who had been racing for nearly half a century told me that at a race meeting lately Walton went to Fred Archer

a century told me mast to Fred Archer meeting lately Walton went to Fred Archer and said to him:

"T've got £100 to put on a horse for you, Archer. Which shall it be?"

Archer named a horse, the first favorite, at 2 to 1; Wa!ton backed the animal, and it won. Again he asked Archer what he would like to back with the £300 now supposed to be his, and the jockey advised him to wait, as the next race was very uncertain. A good thing, at 6 to 4, followed, and Walton laid £300 to £200 for Archer—what he laid for himself is another matter. There were other races in the course ter. There were other races in the course ter. —what he laid for himself is another matter. There were other races in the course of the day; but before the last race Archer had a "monkey"—£500 in hand. This he advised Walton to lump onto a certain animal which he rode, and he was beaten a short head!

hort head! The electric light bids fair to be the light of the immediate future in English ountry houses, according to the London world. Lord Salisbury, who is of an experimental and scientific turn of mind, was the first to use it in a country house. That was four or five years ago. Then the Duke was four or five years ago. Then the Duke of Sutherland followed the example at Trentham, and now Lord Thurlow is lighting Dunphail house by electricity. Not only are the house, the offices, and the home farm to be thus lighted, but several of the mills on Lord Thurlow's Morayshire waste are to be worked by electricity.

estate are to be worked by electricity. THE WORLD AT LARGE.

Every 821 individuals in England and Wales have a policeman to look after

A-little 3-year old boy at Pittsburg fell a distance of 100 feet and was not injured. Consumptives are cured in France by visiting the wine presses and inhaling fumes of the fermenting juice.

At a sale in Worcestershire, a few days ago, some old tankards and spoons of the period of James II. and Anne were brought in at the almost incredible price of per ounce!

Another mammoth family hotel is to be erected between Fifty-eight and Fifty-ninth streets, on Fifth avenue, New York, to cost \$1,000,000, outside of the interior lecorations and fittings. It is interesting to be instructed by signor Nicolini that there is a "lack of
