The Quantity of a Crop

For feeding or marketing depends on the amount of

PHOSPHATE

available to ripen it, even though we have an abundance of nitrogen, potash and moisture present sufficient for the largest conceivable crops.

The Quality of a Crop

also depends upon the same ripening influence. This principle has proven sound in practice in the use of

ALBERTS'
THOMAS-PHOSPHATE POWDER

Wallace & Fraser

58 Canada Life Building

2-4-18

Toronto

IF PEOPLE ONLY KNEW

the advantages of using metal roofing, constructed on our patent "SAFE-LOCK" principles, they would not accept a substitute.

OUR "SAFE-LOCK" SHINGLES

interlock each other on all four sides—leaving no openings for snow or rain to get in. They are easily put on by anyone—are practically fire and lightning proof and give a building a neat, finished appearance. We can tell you more. Ask for free catalogue and samples.
