ebrites attended. The object of the meeting was to receive information, to quicken personal christian sympathies and to promote the edification of christian people. This is the seventh conference of the kind, the previous ones having been held respectively in London, Paris. Berlin, Geneva, Amsterdam and New York.

The famous MacRae case of heresy is sausing much stir in Gourock and indeed in Scotland generally. Mr. McRae's congregation refused to obey the Presbytery and the greater number of them stand by their former minister who is now su-pended by his Synod. If Mr. McRae will insist upon preaching hertical doctrine he will surely see that he annot be permitted to do so as a minister of the U. P. (Inrch. He should bin some other sect or become an independent.

Great storms have occurred during the nonth of August in various parts of the rorld and some lives have been lost. In Buctouche, New Brunswick, a tornado wept over some miles of country and ences, forests, houses and crops were estroyed in its course. In this Provice great hail storms occurred, but forinately did no great or widespread amage. The newspapers record sevral hornible murders in the Dominion, s well as lesser crimes Several parts the Province have been visited with le advance guard or perhaps we should by the wing of an army of "tramps." his pheromenon is common enough in Britain and the United States, but hithto this country has been generally beaking free from them. They constitte a troublesome, if not dangerous ass, and we could well do without em. There is another class the couny could afford to do without and that is e wandering smooth tongued horde of ents who annoy decent people by 1ryg to impose on them by selling useless ticles through the country. People ould be on their guard against them,

and give them a wide berth. It is a foolish thing to sign one's name to any paper ordering an article one never wanted and of no use whatsoever. We do not say by any means that all so-called agents are men of imperfect veracity; but the experience of our readers will we fear lead them to the conclusion that many of them are far from being trustworthy.
