Sig. To be used for the more chronic forms of marginal blepharitis.—*Col. and Clin. Record.*

LAKEHURST SANITARIUM

OAKVILLE, ONT.

FOR THE TREATMENT OF

INEBRIETY

(Habitual and Periodical.)

MORPHINE, and other

DRUG HABITS and

NERVOUS DISEASES

PHYSICIANS generally now concede that these diseases cannot be treated with entire success (except under the conditions afforded by some FIRST-CLASS SANITARIUM. Such an institution should be a valuable auxiliary to the practice of every physician who may have patients suffering from any form of these complaints, who are seeking not relief merely, but entire restoration to health. The treatment at LAKEHURST SANITARIUM rarely fails to produce the most gratifying results, being scientific, invigorating, thorough, productive of no after ill-effects, and pleasant to the patient. The usual time required to effect a complete cure is four to six weeks.

LAKEHURST PARK is a well-wooded expanse of several acres extent, overlooking Lake Ontario affording the utmost privacy if desired, and the surroundings are of the most picturesque description. The Sanitarium is fully equipped with every necessary appliance for the care, comfort, convenience and recreation of patients. Terms upon application to
