To Dr. Hodder and twenty-three other Medical Electors of the Division of Midland and York.

GENTLEMEN,—I am deeply sensible of the high honour you do me in inviting me to become a candidate to represent the Division of Midland and York in the Medical Council. I cheerfully accept your invitation in the spirit in which it is offered, and, should I be elected, I will devote my best energies to the faithful working of the Medical Act; to procuring, from time to time, such amendments to the Act as may be requisite, and to promoting the general interests of the profession.

I am of opinion that some more efficient machinery should be devised whereby the public would receive the full benefit of the penal clauses of the Act, and also that the profession should be protected, by limiting the time during which actions for malpractice could be instituted, and that in all such actions a moiety of the jury should be legally qualified medical men.

I am also of opinion that in all cases in which medical men are required to give professional evidence by the Crown, they should receive reasonable compensation.

I have the honour to be,

Gentlemen,

Your obedient servant,

N. AGNEW.

CUTLERS POCKET INHALE

AND

Carbolate of Iodine Inhalants

A REMEDY for all NASAL, THROAT and LUNG Diseases, affording relief in some cases in a few minutes.

This instrument is gotten up on an entirely new principle, and is well adapted to the treatment of all those diseases of the air passages requiring efficient inhalation. It is indorsed by many leading practitioners, and commends itself to all desiring an apparatus.

Dr. George Hadley, Professor of Chemistry and Pharmacy in the University of Buffalo, in a carefully considered report upon its merits, concludes in these words:

"On the whole, this Inhaler seems to me, to accomplish its purposes, by novel, yet by the most simple and effectual means; to be philosophical in conception, and well carried out in the execution."

Always ready, no danger of breaking or spilling, besides being as safe and efficient in the hands of the novice as the adept. Made of Hard Rubber, it may be carried about the person as handily as a pencil case, and used regardless of time or place. Patented in the United States, England and Canada. Over 50,000 now in use in this country.

Price \$2, including Inhalant for two months' use. Neatly put up and sent by mail free, on receipt of price. Extra bottles of Inhalant, 50c. Liberal discount to the trade. Kept by all druggists. Send your address and receive our descriptive circular, post-paid.
