

Cod Liver Extractive
(Reconstructive)

Wine
(Stimulant)

Iron Peptonate
(Tonic)

These Three are What Make

STEARNS' WINE

The Ideal Reconstructive Stimulant Tonic

Specially valuable during the hot weather when Cod Liver Oil is indicated but cannot be given with success.

Stearns' Wine is readily assimilated, and for *nursing mothers, weak, delicate women and girls, feeble old folks, and convalescents*, Stearns' Wine has no superior.

We have just printed a very interesting little brochure, giving in detail the process of manufacture of Stearns' Wine, *from the fish in the sea to the wine in the glass*. Ask us to send it to you.

We feel confident if you once knew the real value of Stearns' Wine you would use it freely in your practise.
