with case : and with Spanish and Italian he at one time had considerable acquaintance. He sometimes amused himself with poetical composition, and name of his pieces of descriptive poetry, suggested hy natural scenery in this country, are vigorous, true, and elegant. If all this be true, as those who knew him best will arouch it to be, he was no com-mon man.—But, of all which I have ascribed to him, if his modesty and simplicity of nature would have allowed any part to be true, he would in simplicity and humility have said, I lay myself and all else at the foot of the Cnoss.

Casting this tribute upon his fresh grave, and yielding to a sentiment which he would not have disowned, I will say, Heu! quanto minus est cum reliquis versari, quam tui meminisse.

At an auction sale at Peitermaritsburg in the Klip River," protested against any interference by ment and the River St. Francis, the British government in the sale of lands—that they, the delegates, had purchased their territory from Panda, and that no other power than theirs could sell or alienate it. As soon as the news of the proceedings reached government, a messenger was despatched to the Kiip River with a copy of the Queen's proclamation, setting forth that the territory which they claim as a republic, is British. In case British rule was not acknowledged, trouble was apprehended.

During the liest week in August, says the paper we quote from, copious rains have fallen generally throughout the western districts. The crops every where look healthy, and there is every prospect of a righ and abundant harvest.—N. Y. Herald.

WEST INDIES .- We are in receipt of files of the West Indian to the 13th ult.

The Coolies in the West Indies seem to be giving some trouble, and from the accounts the West In-

dian publishes from Jamaica papers, it is admitted on all sides to be a total failure. It is now proposed to try white immigration again,

only restricting the immigrants to the mountainous districts, thus to prevent their falling victims to rum and the climate. Some extensive smuggling establishments had

were proved to have been largely engaged in the business. The custom house forces were to be increased .- Mercury.

Mexico.-From Mexican sources, a report has spread that the American troops, after taking the city of Mexico, had numerous severe contests with innumerable swarms of Leperos who inhabited and surrounded the capital. These finally obtained the advantage over the American troops who were driven from the city.
It is further stated that Santa Anna had returned

to the Capital with 10,000 regular troops: that fighting had been resumed, and was still going on desperately. The rumor of Santa Anna's resignation is confirmed by those accounts, but the Mexican people were not disposed to receive it, and again placed him at the head of the army.

PROF. MORSE AND THE SULTAN .- A letter from Constantinople in the N. Y. Evening Post, states that Dr. Smith, of South Carolina, chemist & geologist to the Sultan, has procured a complete set of Magnetic Telegraph apparatus used by Prof. Morse, and presented it to his Majesty. The system of Prof. M. was fully explained to the Sultan by Dr. S. and Mr. Hamlin, an American missionary, who has charge of a seminary for young men on the banks of the Bosphorus. The Sultan was delighted, and is said to have decreed to Prof. Morse a diploma, in the Turkish language, and a diemond decoration. It is also stated that he has determined to present to the Professor a sum of money, but of this important services rendered by this medical officer, the correspondent of the Post has some doubts .-Protestant Churchman.

PICTURE OF A VOLCANIC ERUPTION.—A traveller who ascended Mount Etna in order to take Talbotype drawings of its scenery, placed his camera on the edge of the crater, in order to get a representation of that interesting spot. No sooner was the camera fixed, and the sensitive paper introduced, than a partial eruption took place, which drove the traveller from his camera in order to save his life. When I fatal malady which afflicted that town in the sumthe cruption ceased, he returned to collect the fragments of his instrument, when to his great surprise and delight, he found that his camera was not only uninjured, but contained an excellent picture of the crater and the eruption .- Prot. Forwarding .- (Kingston Chronicle and News.) We are happy to perceive that produce is at length coming forward. Several cargoes have during this week entered the port. We noticed more particularly the arrival of the Jane & Eliza, the Prince of Wales and steamer England, with cargoes. The latter vessel brought about 3500 bls., consigned to J. H. Greer & Co., and we were informed this morning that these gentlemen have about 10,000 bls. in transitu for Montreal.

COLBORNE, CANADA WEST .- A Correspondent of the Cobourg Star describes the following work of public utility recently undertaken at this port: "Mr Samuel S. Cole has put out nine good and sub-stantial piers, 365 feet in length and Steet water, well loaded with stone and now ready for planking. He intends opening out a road direct to Colborne, and building store-houses sufficient to store all the flour and other produce required for shipment. Next year he intends adding one hundred feet more piers, which will give from 12 to 13 feet of water at the end of the pier when completed. There is now eight feet of water at the end of the pier, with good anchorage and shelter for ressels from South, South-west, and North-west winds. The Pier runs out nearly East into the lake."

TESTIMONIAL TO DR. BARRETT, 77th REGIMENT. -The citizens of St. John's have acknowledged the during the late prevalence of typhus fever, by the presentation of a piece of plate—a silver pitcher weighing fifty-nine ounces-bearing the following

MEGASTIC AGRICULTURAL SHOW, ON THE 6th AND 7th Inst .- Leeds, about forty-five miles from Quebec on the south shore, and the majority of the townships in the county, are comparatively but new settlements, mostly composed of Immigrants from the British Isles, and those who have recently visited the county speak of the progress of the settlement in the highest terms. A correspondent who was present at the exhibition remarks:

That the occasion was one to be remembered. especially as being the first in the county; all appeared in high spirits; the sun rose upon that morn with more than usual splendour, which materially tended to elevate the tone of good feeling which existed on the occasion. The judges, you will perceive from the list, were Messis. Tozer and May from Quebec; Edward and M'Naughton from

Lothiniere, the adjoining county. "The display of horned Cattle was most excellent, many of them exhibiting points of high breeding-and were in excellent condition-the oung cattle appeared uncommonly healthy and thriving. The show of Horses was highly creditable to the county, and especially to the enterprising proprietors of the stock, who have taken so much pains to improve the breed of horses in this county.

45 The Sheep exceeded the most sanguine expectation of their numerous admirers, and were lecidedly of a very superior breed. "The ploughing match did great credit to the

competitors, especially the Junior Class, who re-ceived great praise for the workman-like manner in which the work was done."

We have to express our thanks for a copy of MANUAL OF THE TEMPERANCE SOCIETY, by the Rev. C. Chiniquy, translated from the French by P. O. Demaray, Student at Law. It is neatly printed by Lovel & Gibson, Montreal, and is for sale at Messrs. Coté & Co., in this city.

Since the 13th instant the weather, in this part of the country, has continued favourable to agricultural operations.
