

LAWLOR'S CELEBRATED SEWING MACHINES.

PRICE \$35 with attachments.

THE NEW LAWLOR FAMILY MACHINE

Is unequalled in light running, beauty and strength of stitch, range of work, stillness of motion and a reputation attained by its own merits. It is the cheapest, handiest, best technically constructed machine, most durable and the least liable to get out of order of any machine now being manufactured. A complete set of Attachments with each Machine.

Examine them before you purchase elsewhere.

PHYSICIANS & CHEMISTS.

NOURISHING BLOOD

The Blood imparts to the system elements which are ESSENTIAL to its existence. When these are insufficiently supplied, its energies begin to flag. There is loss of flesh, the muscles grow flaccid, the reflexive powers lose vigor, every function is disturbed, every organ weakened. There is no question that the **HEALTH OF THE WHOLE BODY DEPENDS ON THE CONDITION OF THE BLOOD**, hence the necessity of using a medicine like

PHOSFOZONE!

the effects of which are speedily apparent in a gain of bodily vigor and mental energy.

H. R. GRAY,

Oct 24-3m St. LAWRENCE STREET.

GRAY'S CASTOR FLUID,

A most pleasant and agreeable Hair-Dressing—cooling, stimulating and cleansing.

Promotes the growth of the Hair, keeps the roots in a healthy condition, prevents dandruff, and leaves the Hair soft and glossy.

DR. A. C. MACDONELL,

90 CATHEDRAL STREET, Montreal. [46-52]

NO CURE NO PAY

Catarrh, Bronchitis, Consumption, Asthma, Epilepsy, Piles, all Blood Diseases, permanently cured. Pay after it is made. State your case, enclosing 3 cts. stamp, to Howard Medical Institute, Providence, R.I. (by mail)

THE MIC-MAC REMEDY A SPECIFIC FOR SMALL-POX.

ANOTHER VICTORY FOR MAJOR LANE.

A HOPELESS CASE OF SMALL-POX CURED BY THE MIC-MAC REMEDY.

To MAJOR JNO. LANE, GREENFIELD, MASS.

DEAR SIR—I telegraphed for a package of your Small-Pox Remedy on last Monday, which I received the following day. I would have instantly responded and forwarded the money, but thought I would await the result of its trial. I prepared the medicine myself so as to render everything secure; and I am proud to be able to state that it produced almost instantaneous relief. It was a malignant case of Small-Pox—in fact, there was no hope of recovery expressed on any side; but by the application of your famous Remedy it easily yielded. Enclosed I send you a five dollar bill. Please acknowledge.

Your truly, Rev. W. A. HENSBERRY.

Price \$5 per package.

Sent to any part of the Dominion, post paid on receipt of price—a liberal discount to Clergymen, Physicians and Charitable Institutions.

B. E. MCGALE, Dispensing Chemist, 301 St. Joseph Street.

J. EMERY CODERRE, M.D.

EXPECTORATING SYRUP

Of Dr. J. Emery-Coderre, Prof. Materia Med. and Therapeutics.

DR. J. EMERY CODERRE'S EXPECTORATING SYRUP is prepared under his direct supervision and with the approbation of the Professors of the School of Medicine and Surgery of Montreal, Medical Faculty of Victoria University. For the last twenty-five years the Expectorant Syrup has been administered with the greatest success in Coughs, Bronchitis, Catarrh, Affections of the Lungs, Hooping-Cough, Croup—in the latter case it is necessary to take first an emetic, &c.

Infants' Syrup,

PREPARED BY DR. CODERRE.

"THE INFANTS' SYRUP" is prepared with the approbation of the Professors of the Montreal School of Medicine and Surgery, Medical Faculty of Victoria College. This Syrup can be given, in all confidence, to Infants, in cases such as Colic, Diarrhoea, Dysentery, Painful Dentition, Inability to Sleep, Coughs, Colds, &c.

Dr. J. Emery Coderre's Tonic Elixir.

THE TONIC ELIXIR is prepared under the immediate direction of Dr. J. Emery Coderre, and has been administered with the greatest success for more than 20 years, in diseases requiring the use of Tonics. Its use can be continued without any inconvenience, in complaints such as Chlorosis, or Green Sickness; Leucorrhoea, or Whites; Dysmenorrhoea, or difficult courses; Anaemia, or thinness of the blood; General Debility, Involuntary Seminal Losses, Scrofula, Ringworm, and other Diseases of the Skin, &c., &c.

CERTIFICATES.

"We, the undersigned Physicians, after carefully examining the composition of the Expectorant Syrup of J. Emery Coderre, M.D. certify that it is prepared with medical substances suitable for the treatment of diseases requiring the use of expectorants.

"We, the undersigned Physicians, after having examined the composition of the INFANTS' SYRUP certify that it is prepared with proper medical substances for the treatment of Infants' Complaints, such as Colic, Diarrhoea, Dysentery, Painful Dentition, Coughs, Colds, &c.

"We, the undersigned Physicians, after having examined the composition of the TONIC ELIXIR, as above, certify that it is prepared with medical substances for the treatment of diseases requiring the combined use of tonic and alterant agents.

May 30 '77

NATURALISTS' PORTFOLIO.

THE SUNFLOWER.—The sunflower will absorb impure gases quicker than any other known plant and will evaporate as much as a quart of water daily. On the banks of the Scheldt a landowner who sowed the plant extensively on his estate escaped altogether the miasmatic fevers which prevailed on the estates all round him.

PECULIARITIES OF SMELL.—The insensibility of certain eyes to particular colours, and of certain ears to particular sounds, appear to have their counter part in the insensibility of certain noses to particular odours. "Thus, a gentleman who is fond of sweet scented flowers, states that he does not recognise the peculiar odour of the syringa, although roses, violets, mignonette, &c., produce their normal effect on his olfactory nerves.

A DOG STORY.—A poor fellow, a carter named Colville, residing at Crossgates, near Dunfermline, left home some time ago accompanied by his dog. He did not return that day, but on the following afternoon, the dog arrived home in a very excited state, and acted in a most eccentric manner, apparently endeavouring to attract the attention of the inmates. Seeing that the animal continually rushed off in the same direction, and that he evidently wanted some one to go with him, Colville's friends resolved to follow him, fearing something had happened. The dog led them straight away some distance to a dismal coal-shaft, where it stopped and refused to go any further. The worst being now conjectured, grappling-irons were procured, and eventually after much trouble, the dead body of Colville was brought to the bank.

AGES OF ANIMALS.—A bear rarely exceeds twenty years; a fox fourteen or sixteen; lions live long. Pompey lived to the age of seventy. The average of cats is fifteen years; a squirrel and hare seven or eight years; rabbits, seven; elephants have been known to live to the age of four hundred years; a dog, twenty; pigs have been known to live to the age of thirty years; the rhinoceros to twenty; a horse has been known to live to the age of sixty-two, but averages twenty-five or thirty; camels sometimes live to the age of one hundred; stags are long-lived; Currier considers it probable that whales sometimes live one thousand years, ravens frequently reach the age of one hundred; an eagle died at Vienna at the age of one hundred years and four; swans have been known to live three hundred years. Mr. Mallerton has the skeleton of a swan that attained the age of two hundred years. Pelicans are long-lived. A tortoise has been known to live to the age of one hundred and seven.

SHETLAND.—Heathland, or Shetland, is a wonderful archipelago, consisting of more than a hundred islands. The sea-coast on the mainland is broken up and indented with deep bays, locally called "voes." In Cornwall similar places are called "zawns." Round the majestic cliffs and towering headlands the turbulent surges caused by the currents of the ocean are called "rousts." In England similar places are called "races," as the "Race of Portland," &c. The sheep, as well as the ponies, are very small in Shetland. The sheep give the wool from which the shawls are made. In the high latitude of Shetland the light of day at midsummer never totally disappears, and the smallest print can be read at midnight, when the lingering rays of the preceding day mingle with and give way to early dawn of the morrow. During winter the nights are proportionally long and dreary, and in the month of December the sun is not above the horizon more than five hours and twenty minutes.

PARSLEY.—Parsley was held in high esteem by the Greeks. At banquets they bound their brows with slight sprigs, and also adorned with them the graves of their deceased relatives. In the Isthmian games, at Rome, the victors were crowned with parsley. It was formerly supposed that this plant originally came from Sardinia, because that island is represented on ancient medals as a female, beside whom is a vase containing a bunch of parsley; but it is, in fact, a native of all damp and shady spots in Greece, and even of the southern provinces of France. From the beautiful green of this plant is formed an elegant decoration to certain dishes garnished with it. To the poor man's soup it adds a luxury, and it contributes to the elegance of the finest dinners. A branch of laurel and a parsley crown are the attributes which would now a days suit the god of banquets. These plants have been employed for nobler purposes; but in the age of gastronomy, it will not do to insist too strongly on what was done in the heroic ages.

AN ELECTRICAL PLANT.—A plant possessing natural electrical powers is said to have been discovered in Nicaragua, and a short description of it is given in a Belgian horticultural journal. It is a species of "Phytolacca," and has been christened "P. electrica," in consequence of its curious properties, which are so strong as to cause a sensible shock, as from a galvanic battery, to the hands of any persons attempting to gather a branch. The needle of the compass is affected by proximity to the plant. There is a curious shrub called the "compass plant," which has long been known to exist in the prairie lands of the Western States of North America, and which takes its name from the peculiarity that the edges of the leaves are invariably turned north and south, while the surfaces face east and west. This curious property enables travelers, by simply feeling the leaves, to ascertain their direction in the darkest night, the plant itself having, it is said, a perceptible general inclination towards the Pole. The cause of this fixity of position in the leaves has never been discovered; some authorities attribute it to the effect of light on the varying sensitiveness of the two sides of the leaves, while others seek for the reason in electricity. The latter hypothesis has not been generally accepted, but if the alleged discovery of the electrical plant in Nicaragua is authentic, the probability of such an influence being at work in the compass plant is greatly increased.

ADVENTURE WITH A SHARK IN INDIA.—Eight or ten large fish had been taken, and the chase had wandered some two or three hundred yards from the spot where the shahis had left their guns, when suddenly a shriek was heard from one of the men who searched the bank with their feet; he was seen to fall back into the water, and a huge serpent uncoiling himself from his cold lair, and raising his head above the surface, took his course down the centre of the stream, lashing the water into foam, while the villagers fled in every direction. Not so the gallant shikarees; closing together as the monster approached, they cut at him vigorously and severely wounded him. A terrible tussle now ensued; turning upon his assailants with open mouth, he attempted to seize one of them, but was repelled by a shower of blows and several fresh wounds. He then once more sought safety in flight but was pursued by his active enemies, and being disabled by a well-directed cut that broke his spine, was dragged to land amid the shouts of all present. The shahis had indeed charged into the river to help the shikarees, but their guns being left behind, their knives were of little use in such a melee, and the victory belonged solely to the two swordsmen. The snake proved to be a very large rock snake (a species allied to the boa), and measured nearly twenty feet in length; while the thickest part of his body was as large as a stout man's thigh. An attempt was made to preserve the skin but the numerous wounds, the heat, and the closeness of the weather, and the want of arsenical soap rendered their efforts unavailing.

OUR RETAIL ESTABLISHMENTS.

THE EXTENSIVE CLOTHING HOUSE OF

J. G. KENNEDY & CO.

It has been the aim of the Commercial Review, in the exhibits with which our city abounds, to mention only those establishments that can be fairly called representatives of their trade. And while as a general rule we have taken only those which do a wholesale business, we have not overlooked those in the retail trade which, from the magnitude of their operations, deserve especial mention. Within the last few years a great change has taken place in the clothing trade. Ready-made goods are now produced in as fine fabrics and as good styles and make as are the most of custom-made suits. In fact there are many of our best citizens who buy ready-made clothing entirely, and none of their acquaintances are aware that their stylish suit do not come from a fashionable tailor. Especially has this feature of the trade been apparent during the hard times and when economy was a necessity. The most extensive retail clothing house in this city is that of Messrs. J. G. Kennedy & Co., No. 31 St. Lawrence St. We had the pleasure of visiting this establishment a few days since, and we can safely assert that a larger floor or more stylish stock of clothing would be hard to find. The building occupied by them is four stories in height and is filled to repletion with every class of goods in the clothing line, comprising men's boys' and youths' ready-made clothing in every variety, Canadian and Scotch tweeds, cassimeres, dockings, &c. On the first floor is the stock of over coats, suits, &c., in the latest styles and makes, and sold at prices to suit the most exacting. Indeed it would be difficult to find a customer who could not be suited in his department. The measuring and cutting department is also on this floor. Here the finest custom-made clothing can be obtained at minimum prices. The 3rd and 4th floors are devoted to clothing of every description. They carry at all times a fine stock of tweeds, broadcloths, &c., in bales. Their clothing for excellence of quality and first class workmanship and finish cannot be surpassed. We commend any of our readers who really want superior, well fitting, stylish, and durable custom or ready-made garments at bottom prices to pay this house a visit they are sure to be suited by going to this fine establishment.—Advt.
