Homeopathic Hospital.

Communications relating to business and subscriptions to be sent to the Business Manager, care Sterling Publishing Co., 37 St. Gabriel St.

Manuscripts, new items, etc., should be addressed to the Editor Record, care Sterling Publishing Co., 37 St. Gabriel St.

HOW TO HELP THE HOSPITAL.

Give, and influence your friends to give, money or any of the immediate articles which may be found mentioned from time to time in our "Hospital Wants" column. A hospital is insatiable in its needs, and while almost anything may come handy, money is always the most practicable gift, no matter how small the amount. The running expenses exceed the revenue by thousands of dollars, and the difference has to be made up by the contributions of generous friends.

Any contribution may be sent to the treasurer, Mrs. Walter Patton, at 125 Bayle Street, or may be left for her at the hospital, 44 McGill College Avenue.

Mr. Adam Miller is the authorized collector for the hospital, and a kindly welcome and generous response to his visits are hoped for.

EXTRA NOTES:—"There is a little matter that some of our subscribers have seemingly forgotten entirely. Some of them have made us many promises, but have never kept them. To us it is a very important matter—it is necessary in our business. We are modest and don't like to speak about it."

ANNUAL OCTOBER SALE.

The Woman's Auxiliary have completed arrangements for the annual October housekeeper's sale. Mrs. De Forest Smith, Mrs. J. T. Hagar and Mrs. Von Rappard, with Mrs. Dr. Griffith and Mrs. Dr. Morgan are an efficient committee whose names are synonymous with success.

Tuesday, Oct. 18th, in Beauman's Hall, St. Catherine Street, where the sale was held last year, has been chosen, and it is hoped donations to any of the tables will be freely sent in, as money is urgently needed in all departments of the hospital work.

There will be a good supply of preserved fruit, where housekeepers may supplement any deficiency in their winter store of useful household articles. There will be an apron and fancy table, home-made cake and candy tables and five o'clock tea. Tickets may be obtained at the hospital or from members of the committee.

The brain is the most complex structure in the human body. In the adult man it weighs from 48 ounces to 50 ounces. In the new born child it weighs from 10 ounces to 14 ounces. At the age of seven it already averages 40 ounces. Beyond the age of 40 it slowly, but steadily, declines in weight—at the rate of about one ounce in ten years. The average weight of the female brain is less than the male. In the adult it amounts to about five ounces less. Degree of intelligence corresponds to some extent with brain weight, but to a greater extent with complexity and depth of convolutions.

The *Drugist Circular* says that oil of eucalyptus applied with a camel's hair brush over the surface of chilblains or soreness of the feet gives prompt relief.
