to 1/2 higher today than yesterday and

400; oats, 1,014,000, last year, 1,000,000.

and of land about the same as last
year.

George Broomhall, wheat expert, says:
The crops of Europe have come
thru the winter only moderately well, and
sowed with last season. The prospects are
decidedly inferior, but in comparison with
the average prospects of the preceding four
or five years, one would not like to say
that there is much complaint of it. If
we are to give an estimate of the
world's crop of the season 1903-04, I should
place it at about 20,000,000 quarters below
that of the exceptionally large yield of
1902. In this estimate I am allowing for a
crop to be raised in America of 80,000,
100 bushels, upon which year people may
be congratulated, as there seems every pro-
spect of them being able to command a
satisfactory price for it, as they did in the
year 1901, when prices ranged in Chicago
between 50c and \$1.10.
