The rapid advance in bar silver is significant, and corroborates the cable advices, of an alarming scarcity of the precious white metal in London, as well as exceptionally large orders being received almost daily for spot delivery from Russia. India and China. The silver situation is becoming decidedly interesting and the auxiety of the monetary powers in London, England, to buy this metal, is clearly defined in the two cents per ounce daily advance, which is truly phenomenal, and as clearly barometers what is inevitable in the Cobalt share market. Every visible sign would indicate.

BAR SILVER AT 85 CENTS PER OUNCE SOON The most influential silversmiths in New York believe the price will soar to at least \$1.00 per ounce before the end of the year; also, that after the close of the war a further advance of 35% is most likely. The fact that no element of speculation is apparent in the world-wide buying of the metal is conclusive evidence to me.

NO TELLING HOW HIGH THE PRICE WILL GO A careful analysis of the metal situation also makes me positive in the opinion, the Cobait securities have by no means discounted the spectacular advances in bar silver. In other words, this market is the most attractive of all, in so far as profit-making possibilities are concerned, and wherein

A 50% ADVANCE IS ABSOLUTELY WARRANTED Candidly, for the time being, I advise the Investing Public to CONFINE ALL MARKET BUYING TO COBALTS The biggest advance in years is comins, and purchases made in the silver securities of merit will undoubtedly show a higher percentage of profits, within a reasonable time, than I would care to estimate. All I can say is

THE PYSCHOLOGICAL MOMENT HAS ARRIVED **BUY THE SILVER STOCKS AT ONCE!**

Crude Oil to \$4 a Barrel

The growing demand for oil makes \$4.00 crude probable. The real opportunities of America are in the Middle West Oil Fields. Great financiers are making millions by consolidating oil properties and through rich benkers floating new securities, backed by oil properties. These big men know that oil will double in value if war comes and likewise will greatly advance to help build after peace is secured.

The Uncle Sam Oil Company is the pioneer independent. It built the first three independent refineries in Kansas and Oklahoma.

It has capable men at the head of its different departments, and is gaining wealth every week. It is owned by over eighteen thousand stockhoiders, representing every congressional district in the Union. It is the real people's company, that in time is sure to put its red, white and blue tank wagons and auto trucks to delivering Uncle Sam Oil in at least thirty states.

This Company is established. It has demonstrated its ability to protect itself from the treachery and intrigue of the Oil Monopoly gang, having fought its way through persecution to prosperity, and now desires to put in operation the balance of 40 to 50 drills and keep them going until its production is at least ten thousand barrels per day.

The oil fields of Utah, Wyoming, Colorado, Kansas, Oklahoma, Arkansas, Louisiana, New Mexico and Texas have hardly been scratched.

The future of a powerful organization in this great district—that is now able to maintain forty to fifty drills in continuous operation—will certainly mean a gain on this stock of from 10 to 100 times.

Stock that you can secure under the secrifice offer herein will certainly in a

stock that you can secure under the sacrifice offer herein will certainly in a few years pay more in dividends yearly than you need now remit to own it. The Uncle Sam Oil Company now has under headway nineteen (19) different

The Uncle Sam Oil Company in the Hed Wells. We have one property in the Hed Fork district within three miles of our Tulsa, Oklahoma, Refinery that gives great promise of being the richest lease in that territory, and will not surprise our field men if it produces over Two Million Dollars of oil when developed during the next eighteen months. There are three producing sands in this district and besides a deep production possible. The Uncle Sam Oil Company controls about fourteen hundred acres in this Red Fork district. Two new wells started natural at about two hundred fifty barrels per day. We will have in five more new wells on this property within four to fifteen days. We have at least two hundred locations in the deep and shallow gands on this one property. Our chances are good to have from 800 to 2,000 barrels daily of high grade oil in this district within a few weeks.

The pipeline of The Uncle Sam Oil Company is completed and in operation for over 165 miles, connecting the larger percentage of its oil producing property. We will soon have one hundred fifty (150) producing wells and room lett on practically proven grounds for 400 to 500

two states. Surrounding these refineries are The Uncle Sam marketing stations, where our own auto trucks and tank wagons can deliver ten thousand barrels per day direct to the people.

When you join The Uncle Sam Oil Company you make your remittance count for principle as well as financial gain.

count for principle as well as financial gain.

The Oil Monopoly has lately, through friendly bankers, grabbed nearly complete control of practically all other refineries, leaving a clear field for this great, growing independent, that for over ten years has maintained the first independent, direct-to-the-people marketing stations.

Even though the prices of refined oils are from 15 to 25 per cent, cheaper to the people in the states where our marketing stations are located, we can now secure, when refined at small expense at our refiners, about \$2.46 to \$2.60 per barrel.

keting stations are located, we can now secure, when refined at small expense at our refiners, about \$2.46 to \$2.60 per barrel.

On this basis our combined daily production should soon reach (\$5,000) five thousand dollars per day, and it may reach double that sum in 90 to 120 days.

The Uncle Sam Oil Company controls a total of about (20,000) twenty thousand acres of lands and leases in the real oil beit. It is continually offered new development propositions. The land owners of the Middle West know that The Uncle Sam Oil Company has the only independent market—and that we want more production and that we will not "crook" a test hole—but if we find a new field will at once develop it—and under such circumstances a lot of land owners refuse to turn their leases to speculators sneaking for the Trust, but hold for The Uncle Sam Oil Company, which is a household word among independent farmers in the oil belt states.

This Company has work started on three deep tests in the Cushing field—near the centre of the township, that developed a reported fourteen thousand barrel well a few weeks ago.

One of these wells is now 3272 feet and will be drilled to 3800 feet. We have just proved up in two new test wells from 38 to 45 feet of rich Laxton Oil sand on our Cushing property.

In rich Range Seven, which has produced more high grade oil gushers than any other district in the world—The Uncle Sam Oil Company has work under headway on tweive deep wells, through the heart of about four thousand acres of its perpetual oil and gas leases.

The knockers can knock and the henchmen in the pay of the Big Bunch of Rich Schemers can insinuate and attempt to belittle The Uncle Sam Oil Company, but any investor who doubts our word can come and go over the properties and see for himself.

We may have a hundred million barrels of oil in our present lands and leases. Your remittance combined with a hundred more will drill a test on one of our many properties and may open a rich pool that will your out millions. We offer you this stock no

grade oil in this district within a few weeks.

The pipeline of The Uncle Sam Oil Company is completed and in operation for over 165 miles, connecting the larger percentage of its oil producing property.

We will soon have one hundred fifty (150) producing wells and room left on practically proven grounds for 400 to 500 addictional producers.

This oil from this rich, new Red Fork pool that should soon reach from 300 to 2,000 barrels per day is about one-fourth gasoline. This splendid lease is connected with two of our refineries in

Sam Oil Company is Four Hundred Million Shares. The loyal stockholders own their stock at less than four mills per share. Our properties by new development and advances in prices of oil have reasonably increased at least ten times in value—but we can place new capital at big advantage and will let you have stock at the sacrifice offer of six mills per share. The real book value, I believe, Is now about twice that sum, and wells now drilling may increase it several times more.

If you will remit quickly, you will secure the advantage of a dividend allotment which is a conditional stock dividend.

The larger your first remittance the greater will be your allotment privilege.

The Uncle Sam Oil Company is controlled by a Board of Twenty-one Directors—all of whom are large stockholders. The Company is on a check and voucher system. Every dollar is deposited the same day it is received in the name of the Company and paid out only on the legitimate claims by Company check, signed by four different officers.

Weekly development reports are sent to stockholders, keeping them informed in detail.

A big oil stock company can be operated just as honestly as any other business concern. We want only red-blooded citizens as stockholders who will stand by the Company in its big effort for splendid success.

If you will heed the truth when you read it forward your remittance for from \$15.00 to \$1,500.00, and join a real winner before this stock is all sold or greatly advanced, or inclose four cents in stamps and late reports and further particulars will at once be sent to you.

Remember, some of our drills will be digging at the cap rock of production while you read this notice, which will reach about Twenty Million readers. The future will prove that the time to secure this stock is right now.

As part of the consideration the Company reserves the right to approve or reject any subscription to, or transfer of its stock. The stock is non-assessable. Subject to prior raie, remittances will be accepted on the following basis:

Put an X opposite the stock you want and make all remittances payable to The Uncle Sam Oil Company, by check, draft or money order. Write your name and address plainly.
