CONFIDENCE IN GOVERNMENT.

John Morley's Amendment Defeated by

327 Votes to 276.

London, Feb. 16.-By a vote of 327

to 276 the House of Commons to-night

defeated John Morley's amendment to

the address in reply to the speech from

the throne censuring the government's fiscal policy. The division took the form of a vote of want of confidence in the government, which impelled many. Un-

enists who totally disagree with the

idea of protection to vote to keep Pre-

nier Balfour in power. While Mr. Balfour's absence was keenly felt, it was

perhaps a source of strength to his

party, as without a declaration from the Premier, many of his supporters felt

justified in upholding the government. Joseph Chamberlain also was absent. A

John Redmond, the Irish leader, said

the Irish party voted against the gov-

ernment solely to forward the cause of home rule. He added the same action

would be taken against every government until Home Rule is secured. Neither the speeches to-night nor the

division can be taken as an accurate

indication of the probable trend of the

British opinion on the fiscal question.

In the lobbies of the House of Com

mons it was frankly admitted that votes were given to the government which may

be counted on the opposite side when a general election on the basis of free

trade vs. protection occurs. A large crowd heard the debate. Scarcely a
