WHO INVENTED THE TELEGRAPH ?- To say that Mr. Morse is the inventor of the electro-magnetic telegraph, as many papers do say, is about addidiculous is it would be to call Mr. Hoe the ofiginal inventor of the modern brinting machine, or Peter Schoffer instead of Guttenberg, the inventor of the printing press. Patriotism is all very well, but to falsify historical facts for the gratification of national vanity is not so well: "Mr. Morse has improved an invention which, before him, existed not only in theory, but had been successfully put in operation. The Dane Oersted is the discoverer of electro-magnetism, or he at least was the first to find its scientific laws, (1819.) Its application for telegraphic purposes was first suggested by Protessors Lichtenberg and Gauss, the celebrated mathematician, at Gottingen. An electromagnetic telegraph connecting the observatory at Gottingen with I believe, the university or some other public building, was constructed by them as early as 1833, that is to say, at a time when Mr. Morse had scarcely begun to think of telegraphing, and nearly ten years before his invention was tried. These are facts, and about facts there can be, or at least ought to be, no dispute, all national feelings or national egotism notwithstanding. The inventions of Wheatstone in England, and Steinheil at Munich were simultaneous with, and independent of the invention of Mr. Morse.—N. Y. Tribune.

A TELEGRAPH SERMON.-We have been wondering who would touch the extreme of cable rhetoric. So far as we have yet seen, we think the palm must be awarded to a sermon preached by the Rev. Mr. Grigg, in the Memorial Church, New York, and en-"The Telegraphic Cable between Earth and Heaven," We have not seen the production ourselves, but according to the Providence Journal, one of its figures opens thus:—" When the sulphuric acid of true repentence corrodes the contaminating zinc of innate depravity and actual sinfulness, and the fervent electrical force of prayerful entreaty," &c .-Again he says, "Go to the telegraphic office of the atoning cross," and "touch the wire of penitential prayer.

TO THE INDEPENDENT ELECTORS

OF THE

DIVISION OF ALMA. GENTLEMEN-

AS you will soon be called upon to exercise the Elective Franchise, in selecting a person to represent you in the Legislative Council, and having been honored with the urgent solicitations of a very large and influential number of the Electors of this Division, requesting me that I would allow myself to be nominated as a Candidate—I have consented; and trusting to your intelligence and independence, now

appear hefore you, formally soliciting your support.
Should I consult my own private interests alone, I should certainly decline accepting the candidature; but the reasons which have been urged, and the re-cognised necessity which exists for practical representatives of the commercial interests of the country, in our Legislative bodies, render it imperative upon me to lay aside all private considerations, and yield myself to the guidance of the dictates of my

convictions of duty.

Born and educated amongst you, my sympathies, sentiments, associations, and interests, are identified with yours, and are a guarantee to a large extent, that your interests and opinions will be faithfully represented by me, should I be elected your Representative. But when a man comes before his fellowcitizens, or suffers himself to be brought forward by others, claiming their suffrages, it is justly expected that his principles and views should be made known as fully as possible, in order that the electors may be guided in their choice, by principles, and not personal considerations. Holding these views, and also in obedience to custom, I have now to lay before you my reasons for asking your suffrages, at the approaching election, to represent you in the Legisla-

tive Council. My name has, for some months past, been before you as a probable Candidate, and there are very few amongst you who have not been cognisant of the fact. There has been ample opportunity therefore to make yourselves acquainted with my antecedents, character, &c., and thus prepare the way for action on your part, in reference to the more formal course now taken by me, either to pronounce in favor or against my pretensions. My reasons for appearing before you and asking your suffrages may be expressed by the comprehensive term "Commercial." Agriculture, Manufactures, and Commerce are inseparably connected in their bearing upon the material prosperity of the country; but the two first named occupy the most important position, inasmuch as without production no commerce would exist. It is believed, and I coincide with those who entertain that opinion, that there is a deficiency of practical representation of the above-named interests. We have had a large share of experimentalizing legislation, (if I may so term it) bearing upon our sources of material prosperity; and it is much to be regretted that no definite policy has pre-

vailed, as nothing so retards the placement of capital, so necessary to the erection of large manufactories, and the engagement in large commercial transactions, as uncertainty in regard to the fiscal policy of the country. If the subjects of "Free Trade" and "Protection" were to be fully discussed, not as abstract theories, but as applicable to the circumstances of the country and a definite policy decided upon, there is no doubt that much good would result. I do not besitate to announce it as my settled conviction that "Free Trade," being the normal condition of Commerce, is better calculated to develope the resources of the various countries of the world, than the imposition of restrictions involved in a protective theory—provided such a policy were adopted throughout the world. But it is conceded by the advocates of both theories, that our position, in reference to revenue and other countries, is such as to render our adoption of the "Free Trade" policy in its integrity impossible; and a compromise between the two opposite theories, called "Incidental Protection," has hitherto received approval; but that policy is so uncertain in its duration, and variable in its details, that it has given rise to many evils which might, perhaps, have been avoided. My opinion is, that our position in reference to other countries, more particularly the neighboring Republic, eminently a commercial country, and with which the large majority of our commercial transactions are undoubtedly occurring, is such as to render it advisable to adopt a system of reciprocity of duties; or, in other words, assimilate our Customs Tariff to that of the United States, in so far as it affects such articles as are, or can be, advantageously produced in Canada: such reciprocity of duties, or assimilation of Tariff, to be the well understood fiscal policy of the country, extending even to perfect Free Trade, whenever the United States chooses to adopt such a policy. I do not stop here to enquire how far such a policy on our part would meet the approval of the Imperial Government, or how far our Constitution would allow us to proceed in such a direction; fully believing that any difficulties which may possibly exist, could be overcome. My political position is one strictly independent of either party of the parties known as Ministerialists and Oppositionists; and should I be elected, I shall occupy an independent position; prepared to do my duty to my constituents and the country, without reference to whatever party may occupy the Treasury benches, not lending my vote or influence to factious movements of any kind. There is one great question before the country, upon which it is incumbent on me to declare my viewsviz., the question of "Representation based upon Population." On looking back from the Union of Upper and Lower Canada to the passage of the Act changing the Constitution of the Legislative Council in 1854, we find that the principle of Federalism,

sentation may be, it certainly is not applicable to our circumstances and political position. I am in favor of the most perfect equality of rights, privileges, and immunities of all classes, in reference to Educational and Religious convictions; and pledge myself to use my influence and vote, if elected, in favor of any class who may be found not in the full enjoyment of such equality of rights. I am opposed to all Secret-Politico-Religious Societies. You are aware of the prominent part which I have taken in reference to the Extension of the Harbor in Montreal, and the erection of Docks by means of a Canal debouching at Hochelaga Bay; and in opposition to the plan locating such works at Pointe St. Charles. I shall continue my exertions to that end, and spare no pains to accomplish the object in view.

FREE AND INDEPENDENT ELECTORS OF THE

ELECTORAL DIVISION OF ALMA.

Having been requested by a great many of you to olicit the mandate of the Electors of the flourishing Electoral Division of Alma, I consider that to de cline would be a lack of patriotism on my part, and that it is my duty to try and make myself useful to my countrymen: I therefore demand your suffrages with that confidence which arises from the intimate acquaintance I have of the patriotism which animates a great many among you-confidence which is enhanced by the circumstance that my interests are identical with yours; for besides being a proprietor in the country, I am possessed likewise of extensive property situate at the City in the Wards interested

in the contest engaged. I do not come forward as a party man, but as a man entirely independent. I am altogether free. I do not want to solicit any favor from Government, and have nothing to expect from any administration

I might abstain presently from expounding political principles, as they are known to the majority of you, nevertheless I feel bound to set forth my views on the most important measures.

Being a farmer myself, I shall do all in my power for the improvement and encouragement of agriculture which is the source of the prosperity of this

country.

Trade is in a prosperous condition. Owing to the works executed in the Gulf and Lake St. Peter, and hose projected at Hochelaga, it cannot fail to attract all the product of the West: such a great

cause of prosperity will obtain my attention. Need I tell you that our national industry will be the object of my assiduous care? I shall endeavour to favour our home manufactures and industrial enterprise : for no one derives more benefit therefrom than the farmer.

The colonisation of our secular forest, colonisation destined to stay the tide of emigration of our youth towards foreign countries, shall not be the

least object of my Legislative duties.

To the cause of education I shall devote my constant solicitude. Useless to say that I am opposed and will ever be strongly opposed to the mixed school system.

I shall ever be an indefatigable adversary of Representation based on the respective Population of the two sections of this Province.

Such are, Fellow-Countrymen, my views on those important measures of public interest-questions of considerable moment on the solution of which greatly depends the prosperity of our common country. I have the honor to be,

Jos. F. ARMAND. Riviere des Prairies, July 20, 1856.

and for the relief of consumptive patients in advanced stages of the disease.

We need not speak to the public of its virtues. Throughour every town, and almost every hamlet of the American States, its wonderful cures of pulmonary complaints have made it already known. Nay, few are the families in any civilized comparing the continent without some gersonal experience of its effects; and fewer yet the communities any where which have not among them some living trophy of its victory over the subtle and dangerous diseases of the threat and lungs. While it is the most powerful antidote yet known to man for the formidable and dangerous diseases of the pulmonary organs, it is cloothe pleasantest and safest remedy that can be employed for unfants and young persons. Parents should have it in store against the insidous enemy that steals upon them unprepared. We have abundant grounds to believe the Cherry Pectoral saves more lives by the consumptions it prevents than those it cures. Keep it by you, and cure your colds while they are cutable, nor neglect them until no human skill can master the inscrible canker that, fastened on the vitale, eats your life away. All know the dreadful fatality of lung disorders, and as they know too the virtues of this remedy, we need not do more than assure them it is still made the best it can be. We spare no cost, no care, no toil to produce it the most perfect possible, and thus afford those who rely on it the best agent which our still can furnish for their cure.
