G. D. Harle,  
Secretary-Treasurer,  
Students' Union.

# Careers

## WITH CANADIAN CHEMICAL COMPANY, LIMITED

This advertisement will be of most interest to graduates in chemistry, chemical, mechanical and electrical engineering and engineering physics.

What interests you most about a career? *Opportunity* should. Opportunity not only for advancement, but opportunity for professional growth through varied and interesting experience. We firmly believe in diversified experience and, luckily, we can offer it in our fully integrated operation. We find it's best for you (makes life more interesting and provides greater opportunity) and best for us (we end up with senior people who are fully experienced in our business). Now, let's have a crack at answering some of your questions.

**What do we do?** Canadian Chemical Company produces basic organic chemicals, cellulose acetate flake and acetate yarns, fibres and staple.

**Where do we do it?** At Edmonton. We have three plants on a 430 acre site. The first produces chemicals—alcohol, ester and ketone solvents, acetic acid, glycols, pentaerythritol, formaldehyde and other organics. The second produces cellulose acetate flake. The third, acetate and Arnel yarns and fibres.

Sales offices are located in Montreal, Toronto and Vancouver.

**What is our future?** Very bright. (It just happens to be true.) We think of ourselves as a young, progressive, fast-growing Canadian firm with world-wide affiliations. The record bears this out. So does the operation of our Edmonton plant. And the fact that our engineering department is one of the largest and most diversified in Canada.

Our raw materials are basic Canadian natural resources: petroleum by-products from Alberta and cellulose from the forests of British Columbia. Our markets are worldwide, and through our affiliates we have a strong alliance with companies in the textile, chemical and plastics industries:

**What would you do?** As a qualified chemist or engineer you could be working on *product development, research, process engineering, plant design, construction* or some aspect of production. This is exciting work in many completely new fields. As a chemist or chemical engineer you could choose also a career in *sales* or *technical service*.

**What else should you know about us?** Lots more. You can get more information and literature by writing to Department "A" at 1600 Dorchester Blvd. West, Montreal 25, Quebec. Or to the Personnel Department, Canadian Chemical Company, Limited, P.O. Box 99, Edmonton, Alberta.

**CANADIAN CHEMICAL COMPANY, LIMITED**  
MONTREAL • TORONTO • EDMONTON • VANCOUVER

**Chemcell®**  
PETROCHEMICALS

## Corbet Locke on block again

CALGARY—Corbet Locke is on the block again.

The outspoken incoming editor of The Gauntlet, student newspaper at the University of Alberta, Calgary branch, will be discussed by the UAC student council in the near future. According to usually reliable sources, more applications will be sought for the position of Gauntlet editor next term—a post awarded to Locke last month.

Locke has stated: "it appears that certain individuals, for personal reasons, are attempting to cast me as a Caesar, and to use this characterization as my Achilles heel—something they can cut off."

"These individuals are using and abusing UAC's council to challenge my competence and integrity. It don't think such drastic measures should be used to achieve such dubious personal ends."

"As far as I am concerned I am not anti-administration, anti-council, anti-Alan Arthur (Gauntlet editor), or anti-anything necessarily. I am pro-UAC and pro the things I believe in."
