Holy Communion and Breakfast, 9 a.m., Evening Prayer and Forum, 7 p.m. All services are held at St. George's Church, immediately west of the new residences.

## Prof. Fancies Sexy Chinese Pigs, Draws Federal Government Ire

An interest in sexy Chinese pigs has put the federal government on the trail of Department of Animal Science professor Dr. W. Combs.

The Federal Veterinary Service, upon hearing Dr. Combs wished to import the early ma-

turing North China pig, immediately took measures to stop him. Dr. Combs was told he could not bring the pigs into Canada.

China is a foot-and-mouth disease area.

Dr. Combs denies he has made any attempt to bring the pigs into Canada.

**IMPORT PROHIBITED**

"All I did was ask the Farmers' Union trade delegation to see if the breed was still in existence. I was well aware I couldn't import animals from foot-and-mouth areas like China."

Dr. Combs said he first heard about the pig, which reaches sexual maturity at three months of age, in a 1944 copy of the Journal of Heredity.

As comparable western pigs mature in seven months, important economic advantages would accrue if the Chinese pigs could be imported, says Dr. Combs.

# CAREERS WITH Chemcell

Chemcell (1963) Limited with annual sales of over 90 million dollars, ranks as one of Canada's major producers of chemicals, synthetic fibres and fabrics. The head office is located in Montreal and the two operating divisions, Canadian Chemical Company and Canadian Celanese Company, together employ over 6,000 personnel in plants, laboratories and offices across Canada.

The keynote of Chemcell is growth and diversification. Started by a petrochemical operation launched in 1955, Chemcell's history has been marked by a continued expansion of capacity, diversification into new products, and a steady growth of markets and earnings.

**CANADIAN CHEMICAL COMPANY**

The main plant at Edmonton, Alberta produces a wide range of organic chemicals — solvents and intermediates — which serve a host of industrial uses such as the manufacture of paints and lacquers, pharmaceuticals, cosmetics, plastics, adhesives, herbicides, etc.

At Two Hills, Alberta, Western Chemicals, a recently acquired subsidiary, produces inorganic chemicals including chlorine, muriatic acid, caustic soda and calcium chloride.

Canadian Chemical has a modern research centre at Edmonton. Sales offices are located in Montreal, Toronto and Vancouver and extensive

export sales are handled by agents throughout the world.

**CANADIAN CELANESE COMPANY**

The Canadian Celanese division manufactures a wide variety of synthetic textile products, including the chemical intermediates which receive further processing. The end products include fibres in both staple and continuous filament form, cigarette filter tow, woven and knitted fabrics and tufted and woven carpets. Cellulose acetate and polypropylene are the principal fibres processed. The main plant and research centre is located at Drummondville, Quebec, with other Quebec plants at Sorel, St. Jean and Coaticook.

A plant producing cellulose acetate flake and fibre is located in Edmonton in conjunction with the chemical operation of Canadian Chemical Company. Sales offices are maintained in Montreal, Toronto, Winnipeg and Vancouver.

**Types of Graduates Required:**

The diversity and growth of Chemcell provides the opportunity to fully utilize a broad range of skills at the graduate and post-graduate levels. Requirements include chemistry; chemical, mechanical, electrical and textile engineering; physics and engineering physics. As a chemist or engineer, you may work on research, product development, process engineering design,

construction or production; or your qualifications and interests may suggest a career in marketing or technical service.

Requirements also occur in other disciplines, notably commerce, mathematics and business administration and graduates are utilized in such functions as accounting, data processing, operations research, planning, marketing, industrial relations, etc. Post-graduate requirements occur most often in research.

**Salaries and Employee Plans:**

Our salaries and benefit plans are designed to meet part of our overall objective of attracting and retaining a highly qualified work force.

**Opportunities for Advancement**

Chemcell is a growth Company and personal professional growth can be achieved through varied, interesting and challenging experience in a fully integrated and highly diversified operation.

Our representatives will be visiting your campus and we cordially invite you to make an appointment for an interview through your placement officer.

For further information, just write to: Administrative Officer, Chemcell (1963) Limited, 1155 Dorchester Blvd. West, Montreal 2, Quebec.

**10% Off to U of A Students**
