Protest growing over recombinant research

SAN FRANCISCO (ENSCUP) - While many researchers express fear that recombinant DNA research could create disease-causing bacteria strains, such an organism was created two years ago but quickly destroyed.

According to *Science Magazine*, a New York researcher in a General Electric Laboratory linked together a bacterium consisting of E. Coli, which normally resides in the stomach, with a cellulase gene. Cellulase is an enzyme that digests cellulose which provides the bulk needed

by the body for proper storage and formation.

If the bacterium ever got loose, the magazine says, "The result could be a large number of people with chronic, maybe fatal diarrhea." The researcher said he destroyed the new bacteria only when he realized its potential danger.

AND NOW FOR SOMETHING COMPLETELY DIFFERENT

Now... more than ever the RCMP offers a rewarding career

If you've ever considered a career in law enforcement, now's the time to talk to the Royal Canadian Mounted Police. The opportunities have never been greater.

For instance, the RCMP is accepting applications from both men and women, married and single. And the salary scale has increased considerably. It starts at \$12,750. per year (\$245. weekly) with regular increases to \$17,625. (\$339. weekly) in the first four years.

If accepted as a member of the Force, you'll receive intensive training in all aspects of police work such as law, investigation, first aid and community relations. Then you'll be posted to a detachment where there's every chance to put your knowledge and talents to work; to earn promotion and, equally important, be proud of what you're doing for yourself and for Canada as a member of one of the finest police forces in the world.

So if you're a Canadian citizen 18 or over and in good physical condition, think about a career with the RCMP.

Call or write your nearest office or use the coupon. We'd like to tell you more.
