

New Style Bodies

Realizing the popularity of the automobile style seats during the past season, we have designed several new style Manitou and Strathcona Cutters with commodious and comfortable proportions, and are building this season the nicest line of cutters ever offered to our customers. These cutters are illustrated as Nos. 294 on page 19 and 295½ on page 16.

The new Manitou body will be regularly furnished on Nos. 277, 293, 294, 300 and 301; the new Strathcona body on Nos. 295½, 296½ and 297.

While we have made extensive preparations for an increased trade in these popular lines, we strongly advise our dealers to place their orders early to ensure delivery.

Automobile Doors

The new automobile doors as shown on the Manitou, Strathcona and No. 282 Cutters are quickly attached and provide considerable comfort in stormy or cold weather. They are made of heavy gauge sheet steel, strong and durable. We thoroughly recommend these doors and they are listed at an exceedingly low price.
