

THE ACADIAN.

WOLFVILLE, N. S., AUG. 2, 1907.

Sanctum Suggestions.

THE ACADIAN would be glad to receive and publish suggestions from citizens with reference to the establishment of new industries in our town.

An independent newspaper is not likely to receive any boquets from newspapers that are not independent, remarks the St. John Times. This is very true, and we may further add that we have noticed that the most severe criticism of an independent paper's independence invariably comes from those who are bound hand and foot to party affiliations.

The news which was received on Wednesday that the Judicial Committee of the Privy Council had dismissed with costs the appeal in the Townsend liquor case was received with great satisfaction in this county. The decision is regarded, and justly so, as a great triumph for the temperance cause. This case has been before the courts for nearly two years, and its favorable termination will be a great incentive to those engaged in the promotion of the temperance reform.

With reference to the Chamberlain policy of closer union within the empire, the Malaya (India) Times says:— "Though Joseph Chamberlain may be stricken and laid low—only for a time, let us hope—his dream lives in the united demand of the colonies for a realization of their proper position in the political economy of the empire. The colonies demand, without one dissenting voice, that they now, and before it is too late, be made integral parts of an undivided and indivisible empire."

The Chatham delegates to the Maritime Board of Trade which meets at St. John August 22nd will bring up for discussion the advisability of an export duty on pulpwood. No subject with which the Board will be called to deal is of more pressing importance than this, and we look confidently for a strong resolution impressing upon the provincial and federal governments the wisdom of prompt action to prevent the drain which is now depleting our forests, and robbing our workmen for the benefit of foreign competitors in the production of pulp and paper.

An Open Letter to the Board of Trade of the Maritime Provinces.

As there will soon be a meeting of the Maritime Board of Trade in the city of St. John, and at that meeting the subject of the export duty on pulpwood, or finance, can be legitimately, and should be intelligently, discussed and acted upon, each local Board should therefore be prepared to give instructions to its delegates regarding the subjects which they wish brought up for discussion.

Several subjects have been mentioned in the local press, but there is one of great importance to the Maritime Provinces that has not yet been mentioned for discussion, and that is the rapid destruction of our young spruce forests by the exportation of pulpwood to the United States.

Sir William Van Horne has sounded a note of warning that every Canadian should read and digest, showing that while pulpwood is only worth \$6 per cord at the port of shipment, if converted into pulp it would be worth \$19, or into paper \$37.80. Should we not then insist upon a heavy export duty on logs, pling and pulpwood and by this means encourage the manufacture of pulp and paper where we have the raw material to work upon, with plenty of unemployed waterpower to develop for the purpose?

There is another phase of the subject which we in this part of Nova Scotia must consider, and that is the consumption of our spruce woods in the manufacture of barrels for the export of apples and potatoes. The demand for staves and heading is largely increasing, and raising in price each year, and the trees from which the stock is cut is about the same as that used for pulp.

At the present day the yearly consumption of spruce in this county of Kings must be more than double the annual growth of the forests. How long then will it be before we shall be without spruce timber for any purpose, unless something is done to conserve our forests.

Taking these points into consideration it is not the duty of the Maritime Board of Trade to pass a strong resolution asking the Dominion Government to impose an export duty on all manufactured products of the forest, heavy enough to ensure the manufacture of logs and pulp wood into lumber and pulp before it is exported, thus doubling the value of the logs, and trebling the value of the pulpwood to the country when exported to other countries.

Since writing the above, the Halifax Herald has published an able article on the subject which should be read by everybody, as it covers the ground completely.

Thank you for space, Mr. Editor, I am,
A MEMBER OF THE WOLFVILLE BOARD OF TRADE.

PATERSON'S
Cambridge Wafers

Appointments at Acadia Seminary.

The appointment has been made of Mr. J. C. Ringwald to the position of director of the department of music at Acadia Seminary. The following brief sketch of Mr. Ringwald's career will be of interest to many of the readers of THE ACADIAN:

Mr. Ringwald's musical education began with his father, J. M. Ringwald, and was continued in the teacher's seminary, Nagold (Germany), from which school he was graduated. After several years of teaching and concert work he entered Leipzig conservatory where he studied with Jadasohn, Piatti, Papperitz, Homeyer and Braving, at the same time attending lectures at the University. During his course he was appointed Assistant Organist at St. Peter's church, and, later, assistant organist at St. Thomas' church, made famous through J. S. Bach, the great composer and organist. After his graduation from the conservatory Mr. Ringwald appeared with great success in many concerts in Leipzig and other German cities, meantime continuing his teaching. Coming to America he was appointed to give a recital at the annual convention of the New York State Music Teachers' Association in Saratoga, June, 1900, at which he was enthusiastically received. He has been teaching piano since with great success and has appeared in many concerts and recitals with marked favor.

To assist Mr. Ringwald the following appointments have been made:

Miss Fortia Starr is a graduate of Acadia Seminary, a pupil of Teresa Carreno and Ernst Jedliczka in Berlin. She holds the degree L. V. C. M. of the Royal Victoria College of Music, London. Her teaching experience has been gained at Acadia and more recently at the Pennsylvania State Normal School, Bloomsburg, where last year she was at the head of the music department, with four assistants. Numerous testimonials set forth the excellence of her work which is guaranteed also by the fact that she was reappointed to the position for the coming year. Miss Starr will be warmly welcomed back to Acadia.

Miss Anna Roth, a sister of Miss Louise Roth who has achieved so large a place in the musical life of Acadia as teacher of violin, has been appointed as third assistant in piano-forte. Miss Roth has been a piano-forte teacher all her life, having studied with able instructors. Among these may be mentioned Justina Smith, at present supervisor of Music in the College of Industrial Arts, Texas, Mary Auld and Elizabeth Kindsfoos. These all speak of her work in the highest terms.

Other Appointments—The department of physical education will be conducted according to the plans laid down by Miss Munsey. Miss Jeannah work at the opening of the term is a graduate, with high standing, of the Sargent school of physical education, and comes with the strongest recommendations both from Dr. Sargent and from Dr. Carl Schrader. She is spoken of as an enthusiastic worker, an inspiring teacher possessing a pleasant personality.

Miss Margaret Keever, who will teach stenography and typewriting, has been for two years teacher in these branches at Mt. Allison academy and commercial college. The Pitman system of shorthand which has been so successfully taught by Miss Webster will be continued by Miss Keever. Miss Keever comes highly recommended.

Miss Sarah Patterson, whose work as nurse was so much appreciated last year, has now so far recovered from her illness as to be ready to assume her duties at the opening of the term. Parents may feel that their daughters' health is perfectly safe-guarded in the hands of so experienced and capable a nurse as Miss Patterson.

For an Impaired Appetite.

To improve the appetite and strengthen the digestion try a few doses of Chamberlain's Stomach and Liver Tablets. Mr. J. H. Seitz, of Detroit, Mich., says: "They restored my appetite when impaired, relieved me of a bloated feeling and caused a pleasant and satisfactory movement of the bowels. Price, 25c. Samples free. At Raul's Drug Store."

Hints for Pancake Making.

A good way to prepare the pan for pancakes, fritters and such things, is to put the butter in a clean cloth, and rub the little bundle all over the pan. The heat, melting the butter, will let just enough through the cloth to butter evenly and prevent waste. For the pancakes themselves, there is an increasing use of Blended Flour, which good cooks agree, is without an equal for making light, tasty pancakes. It can be had from any good mill—and is a scientific blend of Ontario fall wheat and Manitoba spring wheat. Freed, as it is from waste matter, this Blended Flour is richer in flavor, and of lower value than either of the wheats could give alone. It contains just the proportion of those elements in flour which prevent the food becoming soggy and indigestible.

The blending of flour is an old trick, thought good housekeepers by their mothers and grand-mothers. It is convenient to have this by-no-means easy task shifted from our burdened shoulders onto the broader, sturdier ones of the dustless millers of to-day. And they should certainly do the blending more accurately, with all the modern machinery, than could be accomplished by the most painstaking work at home.

Careful housekeepers are using Blended Flour for bread and pastry.

This is For You.

We are offering for the next few weeks some very special low prices on **FOOTWEAR**.

Every shoe in our large stock is to be sold at reduced prices.

Now is the time to secure Bargains in **SHOES**—ours is the store for low prices on Honest and Reliable goods.

No old stock at our store made in some Pre-Historic Age, but new and up-to-date goods.

Trunks, Grips and Suit Cases at Cut Prices.

The Feasibility of the Town Plot Aboiteau.

It has been objected that the aboiteau is not feasible, on account of quick sands at the bottom of the river at the proposed site. This is a mistake. Instead of the quicksand bottom which had to be overcome in the case of the piers across the Pettedioiac at Moncton, where, as I have been informed, the piers sank 75 feet on the Moncton side, or at Charlottetown, where the situation was very much worse; or, as in the case of our own renowned Canard aboiteau, where the poor foundation caused the main trouble and consequent re-building, thereby proving ruinous to some of those concerned,—instead of these difficulties we have at Town Plot a smooth, solid rock practically all the way across the river, thus making it possible to estimate almost the exact amount of the proposed structure.

When the question of an aboiteau first arose, I had prepared, by Mr. Stabb, of Wolfville, a competent engineer, a plan of a structure at Port Williams, composed of rubble masonry, with a solid cement core six feet thick. It was made from actual measurements, and intended to withstand wave pressure. Its contents were estimated at 16,800 cubic yds., representing, at \$5 per yard, a total cost of \$84,000. The reader will bear in mind that the piers at Port Williams could not be used in the construction of an aboiteau without the entire suspension of traffic, to which the public would scarcely agree. Now the measurements taken at Town Plot require 25,000 cubic yards of concrete similar to that computed for the Port, and at the same cost per yard would amount to \$125,000. If, however, a Government in conjunction with the aboiteau were secured, as previously stated, the cost would be very materially reduced,—say 15 or 20 per cent. In a letter before me from Mr. McColl, Government Engineer, is a rough estimate of the same, from measurements taken by his assistant, Mr. McKenzie, in which he places the figure at \$150,000. He is very careful to state at the same time that this being a very important structure, no engineer could give an exact estimate on it without very full investigation of the locality, etc. I believe, however, that when the investigation takes place, and all the conditions and facilities for gathering materials cheaply are understood by Mr. McColl, his estimate will not be found in excess of Mr. Stabb's which was made high by request, so that it might not appear to disadvantage in comparison with other engineers' estimates, including that of the Government.

The pore one examines this scheme, the more feasible does it appear. Not only is the Town Plot site naturally favorable, but the facilities for securing stone, sand, and cement, are equally surprising. All the materials can be secured at the lowest cost. When the people in this county are sufficiently interested to make their just claims upon the Government for the cost of a bridge at the point named, it will be an easy matter to induce all the other interests to join in supporting the undertaking. Some time of course must be allowed to the process of arousing the desired interest, but the signs are encouraging, and the intelligence and clear advantage of the people must win in the end.

G. B. BRADY.
Greenwich, July 31st, '07.

The Canadian Magazine.

The holiday equipment would be well supplemented with a copy of the August number of The Canadian Magazine, which contains a good supply of short stories and excellently illustrated travel articles. The art features are exceedingly good this month, the wash and pen drawings being above the average. With one or two exceptions, for instance, an article entitled 'Party Government,' by Prof. Goldwin Smith, the number contains light, warm weather reading matter.

Eczema.

For the good of those suffering with eczema or other skin trouble, I wish to say, my wife had something of this kind and after using the doctor's remedies for some time concluded to try Chamberlain's Salve, and it proved to be better than anything she had tried. For sale at Raul's Drug Store.

The St. John Telegraph, and its evening edition, The Times, have been bought by a syndicate consisting, it is said, of prominent New Brunswick Conservatives.
