The Gadfly.

The scheme for the purchase of an experimental farm for horticulture is still the football of every political adventurer who is seeking votes for himself or his party. Surely another election must be near. The logical and antiquated method has been overlapped this time and only one farm has been selected, the Sharp farm at Kentville, but then the campaign is young.

The executive of the Fruit Growers are no doubt a very respectable if not a wide awake body of old gentlemen, and when domiciled near a nest of political wire-pullers they could be led around examining old farms with absolute ease, and to make doubly serious their fantastic liberality when selecting the old Sharp farm near Kentville. The Board of Trade of that city made the identical by same selection.

These enterprising selectors should have visited the Pine Woods or Brewster Plains where better land could have been procured at a somewhat smaller outlay, that is providing the wire-pullers insisted on Kentville as the center of gravity. However, Canning and Wolfville have been gloriously overlooked and the same error is being repeated.

Kings county needs good roads and railroads far more than experiments for horticulture. All the tree worms and fruit pests known to civilization have in recent years centered around the farms upon which these chief executive fruit growing experimenters fail to flourish, and say up-to-date farmer wants to give the whole outfit a very wide path. The tax payer is being fooled and defrauded all the time. These exploiters and exhibition people are doing it.

For that Dull Feeling After Eating. I have a real Chamberlain's Stomach and Liver Tablets for some time, and can testify that they have done me more good than any tablets I have ever used. They are far superior to pills but cost no more. Get a free sample at Rand's drug store and see what a splendid medicine it is.

Executive of Fruit Growers Unanimous on Farm.

Kentville, Dec. 8.—The executive of the Fruit Growers' Association in conference to-day, have unanimously agreed to recommend the purchase of the Sharp farm here for the establishment of an experimental farm for horticulture. If any member of the executive had doubts as to the wisdom of such a move at adverse conditions of market, it is safe to say that at the close of the political conference they learned for the first, a fact in connection therewith previously unknown to them; that is, that the Board of Trade of Kentville at an informal meeting held on Monday evening last took strong ground fully in accord with the decision made to-day.

The peculiar properties of Chamberlain's Cough Remedy have been thoroughly tested during epidemics of influenza, and when it was taken in time we have not heard of a single case of pneumonia. Sold by Rand's Drug Store.

Children's Colds Must be Cured

There is nothing less weak lungs and consumption in later life. Did you ever think of it in this way? It is the neglected cough and cold that leads to the dreadful lung disease, consumptive or later. From repeated attacks the lungs are weakened and there comes pneumonia or consumption. Because it is prepared from linseed, turpentine and other simple but wonderfully effective ingredients. Dr. Chase's Syrup of Linseed and Turpentine is particularly suitable as a treatment for children's coughs and colds. Croup, bronchitis and even whooping cough yields to the influence of this great medicine.

Mrs. Della Cheney, Inverkip, Ont., writes: "Dr. Chase's Syrup of Linseed and Turpentine cured my little girl of whooping cough when the doctor had given her up and since then we always keep it in the house as a treatment for coughs and colds. It is the best medicine we ever used." This is the best getting round statements such as this.
