Union Jack On Bunker Hill. Charlestown, Mass., herself wrapped in glorious June sunshine, established two records on Monday last. The Bunker Hill parade was held under clear skies, and in this parade a British flag was held aloft, for the first time since the more or less victory of the Continentals.

Furthermore, the British, represented by a bare-kneed Celt in the person of Lieut. Col. Percé A. Guthrie, commander of the 25th Overseas battalion, marched up the hill and clasped hands with a captain of the 9th regiment. All animosities as to Bunker Hill were apparently swallowed up in a

"Potato Pen" Is New Discovery.

Forty-two bushels of potatoes in the season of 1916 from a plot of ground only 8 feet square, or an equivalent of over 25,000 bushels to the acre of ground space used, was the feat of R. E. Hendricks, a resident of Kansas City, Mo., says H. M. George in the Free Press.

This achievement was made possible by the use of an entirely new and original method which, when generally introduced, promises not only to revolutionize the potato production industry throughout the world but to solve the problem of an unending source of cheap food supply for the nations of the earth.

Mr. Hendricks had often watched the potato pile in the cellar bin, which every spring sent out its shoots through every possible crack and crevice. Sometimes these sprouts would crawl out along the floor a distance of seven feet in order to reach the light. From this beginning he conceived the idea that if this pile was removed out into the open and given soil and fertilizer, the potatoes would grow and multiply.

Three years ago he built what he called a "potato pen," which was nothing more or less than a huge potato hill, the sides of which were supported by a loosely constructed inclosure, built after the fashion of an old rail fence. Within this inclosure, only 8x8 feet in size, he planted his potatoes. Within this inclosure, only 8x8 feet in size, he planted his potatoes. Within this inclosure, only 8x8 feet in size, he planted his potatoes.

Up to this time Mr. Hendricks has conducted his experiments unknown to but a few of his most intimate associates, but owing to the present food shortage, and the nation-wide campaign to speed up food production, he decided to give up his discovery for the free use of people everywhere.

The details of the construction and management of the potato pen, as described by Mr. Hendricks, outline a plan by which anyone having access to a plot of ground no larger than a flower-bed can raise all the potatoes needed for an average family for a whole year. The potato pen may be built eight feet wide by any length, just so they are built strong enough to keep the sides from spreading. Most any kind of good stout material can be used. It might lumber or boards are used the center with wires. Rich earth must be on hand in sufficient quantities to fill the pen to the top.

The "potato pen" is built 6x8 feet, inside measurement, and is 6 feet high. The pen is built as each layer is placed and planted. You can use 1x6 inch boards for the ends and sides, leaving a 1/4-in. space between the boards for the potato sprouts to come through. Start the pen with a six inch layer of dirt. Then mark off the plot a foot apart each way, allowing six inches of space for dirt all around between the outer row of potatoes and the inside of the pen. Plant a potato seed at every cross line or intersection of the plot, eight hills to the layer of dirt. Then put an inch or two of dressing over the potatoes and sprinkle good with water. Then lay six inches more of dirt, mark off as before, plant, and dressing and water again. Repeat this operation with enough layers to fill the pen to the top. To keep the dirt from falling out of the pen as the layers are placed draw up old straw or hay against the cracks and crevices.

As the pen rises, place on the fourth layer of dirt in the center of one side, about two feet above the ground a "moist tester." This is made of any piece of timber about the size of the arm, a piece of 4x4 inch by 3 feet long, placed so it will protrude from the pen about a foot. After the potatoes have been planted three weeks loosen the tester, pull out and run your hand in to determine the moisture. By so doing you will know how much water to use on the pen. After the tester has been once removed this can be repeated once or twice a week. Watch the tester and keep the dirt in proper condition.

The pen should be near a water supply so that it can be well watered during the dry weather. It should be watered from the top about twice a week unless rainfall is sufficient. The "moist tester" will always enable the grower to determine the proper moisture conditions. The top layer of dirt should be sloped gently toward the center so the ground will absorb and set shed rain, but care should be taken that mud be prevented from forming on top and baking to a crust. When the earth is dry the mound should be sprinkled on the top and sides.

The potato vines will grow in the top and sides of the pen (the narrow way to the light), emerging through

Address of Welcome.

Following is the address of welcome which Rev. G. W. Miller, on behalf of the town, read to Pte. Paul W. Davidson on the occasion of his homecoming last week:—

Private Paul Davidson, 13th Royal Canadian Highlanders. DEAR PAUL: It is a happy moment of my life when, at the request of the Mayor, on behalf of the people of Wolfville, I address to you a few words of welcome on your return home.

It is a happy moment of my life when, at the request of the Mayor, on behalf of the people of Wolfville, I address to you a few words of welcome on your return home.

Germany struck with finished purpose and design at the world's tremor. Her unscrupulous ambitions have been slowly and clearly revealed. She challenged everything that free men hold dear.

You were among the good men and true all over our land who, with high resolve, took up the challenge and as a member of the 40th Battalion sailed for England in October 1915. In July following you were in France, had pressed and bleeding France, fighting as a member of the Royal Canadian Highlanders, a battalion that has proved its loyalty and in hard fought fields covered itself and Canada with glory imperishable.

We regret that the fortunes of war were such that on the 4th of September in dislodging the enemy from his entrenchments on the Somme, in the first great drive, you received so severe a wound.

We are glad your life has been spared and that we have the honor of bestowing a civic welcome upon you today. You can read in the faces of the men, women and children gathered here in such large numbers how sincere and affectionate is our welcome.

We are not here to pity you, pity is farthest from our thoughts. If life has anything it means service. He that we are proud of you and in good fellowship to welcome you.

She Bears The Burden.

Vancouver World: The wonderful efficiency of the British war machine on the west front points to a hitherto almost unrealized fact. It is this: That the burden of the war is now borne to the largest extent by the British armies. The fact becomes daily clearer and clearer that had Britain ignored her honorable obligations and remained out of the war, Germany would now be undisputed master of Europe.

Consider the situation, Russia, after efforts unprecedented in her history, after battles in which her heroism never shone brighter, is no longer a fighting factor. She has lost 1,500,000 men prisoners and as many killed. Though she has still unopened reservoirs of recruits she has not the equipment for them. She will fight again it is true but at the moment she is helpless and it is useless to attempt to hide the fact.

France, who has written a page in the book of glory that will never fade, could not hold at this moment the western front without the British assistance. Her losses in men have never been published but it is no secret how great they are. While Britain was preparing, France bore the brunt of the hammerblows of the highly efficient and thoroughly prepared German army. She deflected the army. She had to pay the price.

Italy has done magnificently. Her arms made in the face of almost insuperable difficulties of terrain have been astonishing. But Italy's campaign is altogether devoted to one enemy, Austria, and with Russia, out of the war for the moment the Dual Kingdom is able to meet Italy's advance with unexpected strength.

There remains Britain, or rather the British Empire. It is on the nations beneath the British flag that at this juncture in the war the burden of defeating the forty-years-prepared might of Germany now falls. The British Empire is bearing the burden. The battle of Messines testifies how nobly. Every material demand of the war is being met in the most efficient fashion. There is only one thing the Empire lacks; and that is men. Men are the absolute need of the hour. Britain's men are all, even assuming that Russia cannot recover herself this year and resume fighting, can still beat Germany. But to do it Britain must have men. She has every thing else. She has a war machine far superior to the enemy's, but without the men the machine is useless.

A good cook should be given a wide range.

Does it Pay?

Does it pay to go to school? This is the age when we are asked the financial question in connection with about everything. Does it pay? Does it pay to go to school?

Too many boys, and there are girls too as well, leave school when they are about 14 or thereabouts and go to some trade or occupation, imagining that they will come out all right. In many cases their parents are to blame. It is a sad mistake when a boy leaves school at 14 before his mental makeup is properly developed. If the boy and girl too, will be the gainer in the end if they stick at their studies until sixteen at least, that is if they intend following out a mechanical occupation, trade or such like.

In Massachusetts the State Board of Education has been making some investigations of the weekly earnings of children who left school at 14 until the end of their 25th year, and it has compared these with those who remained at their studies until they were through the high school.

The results make a significant reading. Those who left school at the age of 14 began at \$1 a week, and when they reached the age of 25 they were receiving \$12 a week. On the other hand, those who went through high school began work at \$10 a week and after 25 years were receiving \$31 a week.

The Educational Review goes into the question and calculates that the total earnings of the elementary school boy in the eight years were \$5,722.50, while those of the high school in the 8 years were \$7,377.50.

So you see, boys, it pays to go to school, to be diligent in and attentive to your studies. And it will pay you in the long run to keep going to school and mastering all you can until you are 16, at least. If you can go to college, all the better.

Much is said and written these times on preparedness. A first class education prepares a young man, or woman either, for the duties of life and the possibility for a successful and honorable career.

Does a liberal education pay? It does.

The extraordinary good rice crops in the Far East have ended all possibility of the renewal of the exports of American flour to that part of the world for the present. The crop in Japan is so good that it has forced Japanese flour prices, and the result is that the Japanese rice is now being sold on the Hongkong market for about 50 cents gold per bag cheaper than either American, Canadian or Australian flour can be sold.

HEAT FLASHES, DIZZY, NERVOUS

Mrs. Wynn Tells How Lydia E. Pinkham's Vegetable Compound Helped Her During Change of Life.

Richmond, Va.—"After taking seven bottles of Lydia E. Pinkham's Vegetable Compound I feel like a new woman. I always had headaches during the change of life and was also troubled with other bad feelings common at that time—dizzy spells, nervous feelings and heat flashes. Now I am in better health than I ever was and recommend your remedies to all my friends."—Mrs. LENA WYNN, 2812 E. O Street, Richmond, Va.

While Change of Life is a most critical period of a woman's existence, the annoying symptoms which accompany it may be controlled, and normal health restored by the timely use of Lydia E. Pinkham's Vegetable Compound. Such warning symptoms are a sense of suffocation, hot flashes, headaches, backaches, dizziness, drowsiness, nervousness, and a general feeling of weakness and irritability.

For these abnormal conditions do not fail to take Lydia E. Pinkham's Vegetable Compound.

For Delicious Strawberry Preserves

tell your grocer to send you

Lantic Sugar

"Pure and Uncolored"

Packed in original sacks or cartons

The accurate weight of LANTIC SUGAR in original packages is a great help in preserving as it enables the work to be done without weighing the sugar. For strawberry preserves in light syrup use 4 quarts of berries to a 2-lb. carton of LANTIC SUGAR. For richer preserves increase the proportion of sugar according to taste.

PRESERVING LABELS FREE—Send us a Red Ball Trade-mark cut from a bag or carton and we will send you a book of 54 ready gummed printed labels.

2 and 5-lb. Cartons—10, 20 and 100-lb. Sacks

Atlantic Sugar Refineries, Limited
Power Building, Montreal

Diversified Farm Pays Best

A well diversified business pays best for the man operating a general farm in Ohio, according to recent demonstrations of the agricultural college extension service. It will pay better during a long period to have several main sources of income rather than just one. The average labor income on a number of farms where there was but one or no main source of income was but \$227. Where there were two main sources of income, the labor income was \$351; where there were three, it was \$761; and where there were four or more, it was \$1,029. The labor income is what the farm furnishes the operator for his labor and management after paying all farm expenses and after deducting 5 per cent on capital invested. In addition, the family has what the farm contributed toward the living.

In the event of a referendum, as some suggest, who would vote against occupation? Every jaundiced, anti-British racist in the land would vote against it. Every fanatical-mouthed crank (infested with pro Germanism) would vote against it. Every man of alien origin in the West would vote against it. The Bourasans and the Lovages and the Choquettes and the Lyncots would vote against it. Every one of the precious heap in Quebec who think we have "done enough for England," would vote against it. Every miser in the country who has refused to contribute to the Patriotic or Red Cross funds would vote against it. Every genteel young slacker of the "silk stocking brigade," hiding behind some woman's petticoats, would vote against it. Every politician and shiner hilling in the back holes of the country, would vote against it. In Canada's part in this world crisis to be left in the hands of this motley collection of racists, politicians, misers slackers and pro-Germans?

Laugh and Grow Fat

"Laugh and grow fat" is an old saying laden with value for nervous people in particular. Drop the worry habit and use Dr. Chase's Nerve Food and you will soon get the nervous system restored to good condition. Digestion will improve, appetite will return and you will find such symptoms as headache and sleeplessness disappearing. Some women martyr for the purpose of obtaining a listerine who can't get away. Morality is always ready to monopolize the spotlight.

Wolffville Astonished by Merchant's Story. A merchant relates the following: "For years I could not sleep without turning every hour. Whatever I ate caused gas and sourness. Also had stomach catarrh. ONE SPOONFUL buckthorn bark, glycerine, etc., as mixed in Adler-Lika relieved me INSTANTLY." Because Adler-Lika flushes the ENTIRE alimentary tract it relieves ANY CASE constipation, sour stomach or gas and prevents appendicitis. It has QUICKEST action of anything we ever sold. A. V. RAND.

Applicant (remotely): "But I have very poor freight." Recruiting Sergeant: "That's nothing. We'll put you right in the front line where you'll have no trouble of seeing the enemy." "I'm doing my best to get ahead," asserted Cholly. "Well, heaven knows you need one," remarked Dolly.

This Ointment Possesses Power to Heal the Skin

Two Cases Which Prove the Extraordinary Healing Power of Dr. Chase's Ointment.

The use of Dr. Chase's Ointment is wonderfully satisfactory because you can actually see the results accomplished. It is surprising what change can be wrought about in a single night by this great healing ointment. "Mr. George Beavis, 113 James street, Peterboro', Ont., writes: 'As a healing ointment, I consider Dr. Chase's the best obtainable. I had a large running sore on my leg, and although I had tried all the prescriptions of two doctors I was unable to get any relief from the pain or to get the sore healed. One day my drug-gate handed me a sample box of Dr. Chase's Ointment, and I used it with such good results that I decided to give the ointment a fair trial. Although I used four boxes, and am glad to be able to say that the cure on my leg is entirely healed up. My skin's like experience with Dr. Chase's Ointment I have recommended it to many people.'"

Mrs. W. W. Oliver, Port George, Annapolis Co., N. S., writes: "I am going to tell you my experience with Dr. Chase's Ointment. There was a spot came on my face something like a mole, but it kept getting worse. I had finished one box of the ointment but this skin trouble had gone, and has not bothered me since. I cannot praise Dr. Chase's Ointment too much, and you are at liberty to publish this letter." If you have never used Dr. Chase's Ointment send a two-cent stamp for a sample box, and mention this paper. Price sixty cents a box, all dealers or Edmanston, Bates & Co., Limited, Toronto.
