BELL'S REAPING MACHINE.

The Pablic exhibiton of Mr. Bell esping machine, for the inspection o griculturists and others interested, ook place on the farm at Inchmichael, on Thursday last, according to announcement. The day was all that could have een desired the hea: of the sun's rays being and Sir P. M. Thriepland, Bart., were present, and took a lively, interest in the several trials, or rather demontrations Hugh Watson, Esq., of Keillor.

The machine has already been sufficients ly described. If it were like a cart. we may say that the cart goes before the hor see but is quite true that the machine does. When approaching the spectator all that is seen is a kind of fan wheel in al. nachine before them, and that the revoluion of the wheels upon which it moves communicates the various actions by which ta operations are performed, including that of the shears by which the corn iscut, the fan wheels by which it is thrown on the canvass front of the machine, and the mo-

Mr. bells Engages the woman at £2 each for the harvest, which he calculates is neither, ore nor less than two shillings a-day (without victuals)-the men are paid half a-crown per day. With these figures, our agricultural friends can readily com nute for themselves the cost of reaping as acre with the machine. Some gentleman on the field calculated it at Sa., which would give a saving of at least 7s. per acre, tak ng wheat, barley, and oats together, at the prices they are generally contracted for. Mr. Watson informed us that, taking everything into consideration, it would be pute safe to state the saving as at least one half. At irosent some inconvenience must be felt in the working of the machine on account of the furrows in which the land is generally cultivated; but it is obvious that, with so great a gain in the to adapt cultivation to the working of the the practicability-and his past experience leads us to place every confidence in his opinion-of all the crops on a farm being cut by a machine, but he believes that, in an average of seven years, only a very small
