ELECTRIC FANS.

For preventing the frosting of Display Windows in Winter time, there is nothing simpler or more effective than the air blast of an

ELECTRIC FAN directed against the glass.

The Philosophy of the thing is plain.

The evaporative effect of the air current simply prevents condensation of moisture upon the window, and affords relief from an annoyance which generally is sought but only imperfectly attained through various other awkward means.

A large Stock of these FANS on hand which will be sold and installed at a VERY LOW FIGURE.
