To Trifle With Catarrh Is to Risk Consumption.
 Usually it comes with a cold. Being slight it is neglected—but the seed is sown for a dangerous harvest, perhaps consumption. To cure at once, inhale Catarrhozone. It destroys the germs of catarrh, clears away mucous, cleanses the passage of the nose and throat. The hacking cough and sneezing cold soon disappear, and health is yours again. Nothing known for colds, catarrh and throat trouble, that is so curative as Catarrhozone. It cures by a new method that never yet failed. The one dollar outfit includes the inhaler and is guaranteed to cure. Smaller sizes 25c. and 50c., sold everywhere.

Hr. Grace Notes.
 Caplin are in abundance in this vicinity just now and codfish are fairly plentiful.
 Dr. Paterson was in town on Friday on a visit to Mr. O. V. Travers who has not been well for the past few days. We are glad to report that Mr. Travers is very much improved.
 A special train arrived last evening with a large number of members of the Knights of Columbus. A number of the members also arrived by steamer from Bell Island, and a meeting was held in the Academy Hall at night.
 Rev. Dr. Whelan, of North River, was in town yesterday, as were also a number of other clergy.

On Sunday next and the following Sunday the congregations of St. Andrew's (Presbyterian) and the Methodist Churches will have their first touch of union. Owing to Mr. Holmes—of the Methodist—being absent at Conference at Grand Bank, the services will be held in the forenoon at St. Andrew's and in the evening at the Methodist Church, Rev. Mr. Coffin, of St. Andrew's, officiating at both churches. The services will no doubt be heartily enjoyed.

His Lordship Bishop Jones preached at Christ Church last evening. The church was filled to its utmost capacity, and the service was greatly enjoyed by the large audience.

The schr. Studland leaves this afternoon for Dead Island, Labrador.
 Among the visitors to town yesterday we noticed Mr. P. J. Summers, who has many friends here, and all were pleased to welcome him to town. It is said that shopkeepers are arranging for the regular summer weekly holiday to begin this week.

Only for the great care taken by the train hands yesterday while the special train was being made ready, there would surely have been an accident as a very large number of children were at the station and about the track watching the unusual performance for a Sunday. Some of the lads even jumped on and off the train while the latter was shunting. The train hands by their watchfulness averted an accident.

 Hr. Grace, June 18th, 1916.

Restore the flavor of scorched milk by standing it in a pan of cold water to which a pinch of salt has been added.
 Minard's Lintment Cures Diphtheria.

Avondale Notes.
 From present appearances it looks as if a beneficent Providence will be a blessing of the coming season. More attention than usual is given by our people to the cultivation of farm crops due, no doubt, to the increased cost of commercial commodities to almost double, and in some cases treble their former value—and prospects look bright for bountiful rewards for our people's industry in this direction.
 Nearly all fishermen and labourers have repaired to the scene of the summer's operations. We think a larger exodus than on former occasions in springtime has gone to build up Uncle Sam. It is regrettable in this instance to see the fisheries of our country that are so very remunerative deserted by men who have spent the whole of their earning tenure in their prosecution, and whose fathers with far less facilities than present-day methods afford knew no other occupation and produced therefrom comfortable homesteads with always a full cupboard. In some cases the scarcity of men to constitute the planter's crew is the fault, while others are lured from our staple industry by reports of the shekels to be amassed in the big Presidency.

To meet the growing demands of their business the "Kennedy Co." are building a new and more commodious store. The erection is to be a three-storey one and the manager of the business, Mr. George Kennedy, M. H. A., is having the work done on plans that will ensure the greatest convenience in the extensive trade in which the premises has always dealt. Mr. Nicholas Lacour is the foreman, and about fifteen labourers are employed.

Dr. Jones is attending to the exterior renovation of his residence and surgery. The painting is green and white which contrasts admirably with the foliage and flowers that adorn the surrounding ground and premises.

Recently Mr. John Moore resigned his work as Sacristan of the Church at Avondale. Mr. Moore spent more than forty years in the teaching profession in different places in the country, and during his long tenure at Avondale he acted in the above capacity with the coveted commendation of four separate pastors and the congregation of parishioners as well.

Yesterday flags and hunting adorned the residences and hill-tops of Colliers, and the occasion was one amply meritorious to draw largely on the people's joy and thanksgiving. For on that date was there not one of their number in the person of Mr. P. Hearn endowed with the plentitude of Holy Orders? Rev. Fr. Hearn is the son of the late James and Mrs. Hearn, merchant, of Colliers. "Master" Hearn, as the father was always familiarly called, after completing his studies at St. Bonaventure's College, taught school in his native place, and under his tuition his eldest children first saw the light of love. The illustrious son who strove assiduously and yesterday won the nuptial wreath from heaven by being the first from the settlement to receive ordination to minister to God, is the youngest son of the family, and like his late lamented father spent some time in teaching at Colliers after qualifying in the Associate in Arts degree at St. Bonaventure's College. About five years ago he proceeded to Rome to complete his studies for the Priesthood. We congratulate Rev. Fr. Hearn on his initiation in the sacred ministry, and extend to Mrs. Hearn and the other members of her family our hearty felicitations on the signal favour with which heaven has blessed them.

Incidentally, too, we may add that though a primer scholar well nigh a quarter of a century ago when the present venerable prelate, the Rt. Rev. Monsignor Veitch—whose life is now full of years and fuller still if possible of labours, was appointed to the parish of Conception Harbor, of which Colliers forms a part, yet we have vivid recollections of the status quo then prevailing generally, and in the mental wanderings of an absent citizen, we can derive both pleasure and an incentive—the former on the new order of things wrought since that time, and the latter in the energetic means to that end.
 W. N.
 Avondale, June 18, 1916.

Finger nails that are manicured every week will retain their delicacy and lustre longer than those that are neglected.
