Thompson Radio

The Neutrodyne principle plus Thompson Radio Experience has produced the ideal radio receiver.

THE CONCERT GRAND.

MODEL S-70—\$37

Equipped for either dry or storage battery operation. The only six-tube neutrodyne, this model is seldom used at full power as it provides a quality of tone never before attained in Radio reception. The beautiful two-tone mahogany finished Cabinet is an outstanding example of the Cabinet maker's art, and represents in concrete form the experience, the research, the developments of famous Radio Engineers.

THE PARLOR GRAND.

MODEL S-60—\$230

A five-tube neutrodyne receiver providing two stages of radio frequency, detector and two stages of audio frequency amplification. This model, enclosed in a one an infinite sense of control as the fingers carefully call the air voices from the distant corners of the Globe. This model will fit into the family circle like a welcome friend who brings glad news and happy moments. The two-tone mahogany finished Cabinet with sloping panel, is artistic in design.

THE GRANDETTE.

MODEL V-50—\$190

A five-tube neutrodyne receiver providing two stages of Radio frequency, detector and two stages of audio frequency amplification. This model, enclosed in a beautiful mahogany finished streamline Cabinet, will readily harmonize with furnishings of any period. It is equipped to serve all home radio reception requirements as to distance and volume.

All prices quoted are for receivers without accessories.

THE THOMPSON SPEAKER—\$35.00

The Thompson Speaker is the only Speaker—within its price range—that can function efficiently on Sets using five or more tubes.

Chrysler Power Plus Chrysler Economy

Its tubular front axle—big and amply strong for its job—is another important bit of testimony to the thoroughness of Chrysler Six engineering. This axle is actually 34 per cent. more rigid—it has approximately 400 per cent. more strength to resist the up-and-down strains—than an I-beam of the same weight. Its resistance to horizontal or fore-and-aft strains is 870 times greater; its resistance to the twisting strains is 188 per cent. higher. Exceptional riding is assured by the Chrysler spring suspension and six-ply special high-speed balloon tires.

The Chrysler Six

Anyone can build a powerful car by building a large gas-eating motor, but the Chrysler gets 68 horse-power and over 70 miles an hour out of a motor which gives better than 29 miles to the gallon of gasoline. Anyone can build a heavy car that holds the road—but the Chrysler, which can actually be driven in comfort at 60 miles an hour over rutted roads or cobble streets, is far from being a heavy car. The Chrysler Six brings its owners entire absence of a vibration period at any speed; a crankshaft, whose seven bearings absolutely preclude whip and distortion; a new type of combustion chamber that burns all the gas; a new way of distributing the gas equally to all cylinders; an air-cleaner for the carburetor; an oil-filter which cleanses all the crankcase oil every 25 miles.
