## Making Tracks for School.

That's what the boys of London and vicinity are doing now, and during the rainy weather and munny streets at this time of the year, they need a first-class article in footwear to meet the emergency. Bad shoes and wet feet go together, with sickness treading on their heels and the boys making tracks for home instead of school. Our school shoes are durable, waterproof, well-fitting, warm and comfortable. Keep his mouth wet and his feet dry and a boy will always thrive. This latter end will be provided for by buying a pair of these shoes; they will cost less and wear longer than any other shoe offered this season. Can anything be cheaper than a pair of Boys' Boston Calf Bais for \$1, or a pair of Misses' Glove Grain Button for \$1?

## TORONTO WATERWORKS.

An Outbreak of Disease Feared and  
Great Precautions Recommended.

Toronto (Special) Sept. 15.—The accident which recently occurred to the Toronto waterworks conduit has created a great deal of consternation, and an outbreak of disease is possible. Doctors are prescribing the various precautions to be taken, and among them it is strongly recommended that the kidneys should be kept in a state of perfect regularity by means of Dodd's Kidney Pills, a remedy which experience has shown to be equally efficacious in the latest as well as the earliest stages of kidney trouble. It is so stated by the physicians that this season is one in which the kidneys are particularly susceptible to disorder.

## Block Signals.

Referring to the little book on block signals, issued by the New York Central, the Electric Review, which is the recognized authority upon everything pertaining to electrical science, has this to say:

"In the 'Four-Track Series,' No. 17, the passenger department of the New York Central and Hudson River Railroad has published a most interesting story under the title of 'Block Signals on America's Greatest Railroad.' The letter press and illustrations in color are unusually fine. The technical description is by Mr. John P. O'Donnell, a member of the American Society of Civil Engineers. The New York Central has spent more than \$1,000,000 in equipping its lines with the safest and most complete system of block signal devices for handling trains known to railway science. The block signal system is a mystery to the average man, and we can imagine no more instructive or interesting pastime than to take a trip over the New York Central road, with a copy of this book in hand, and observe what is to be seen of the practical working of the block signal system."

A copy of the book will be sent free, post-paid to any address in the world, upon receipt of three 2-cent stamps, by George H. Daniels, general passenger agent, Grand Central Station, New York.

There is no place of recreation better than Somerset Hall on Tuesday, 17th. Exercises commence at 8:17 p.m.
