Relying on Figures.

The grain growers around Regina do not seem to be certain whether politics is a cement that holds them together or a bone of contention that

Mr. Andrew MacBeth, in giving his report to the Regina local of the Saskatchewan Grain Growers, spoke plainly, and said a serious mistake had been made in entering the political field, because as politicians they were not sticking together nearly as well as they did as farmers. He used these membership figures to the community are seeking divorce

1922 16,508 It is hard to see where Mr. Mac-Beth finds cause to arrive at his conclusion. Figures gathered in the neighboring province of Alberta show that there has been a decrease in membership of the U. F. A., but when the provincial election came

the farmers won hands down. The fact that a man's dues are not paid is not very good evidence that he has ceased to act and believe along certain lines. The proportion of Liberals or Conservatives who pay dues to their respective organizations is small, but that does not mean that they are not on hand when to be a fine open winter probably rethe word is passed that an election ferred to the open door of the furis in the air.

Our Sense of Security.

Men who are working to corne the "flu" germ say it is so small that it must be magnified 1,000 times be-

fore it can be seen under the glass. When one of the first and worst "flu" epidemics was sweeping the country some bright chap made an lately is the selection in Paris of a easy living celling masks made of woman of 58 as the winner in a gauze that were supposed to keep beauty contest. the germs from getting a chance to

place to fill and a great work to do. When it gets warm, and we are thinking of ice rather than coal, these same students of research are apt to lapse back into the class of faddists in the mind of many people. Some of these patient pluggers who are working away all the time

will come out some day with the location of a hard coal deposit, or the formula for making our soft coal more fit for domestic use.

This will come from some man's perseverance rather than via the sustained interest and backing of the

Better To Drop It.

It would cause no surprise were the Provincial Government to let the adolescent school act rest until they are a little more positive of the

general direction in which it is going to take them. Municipalities should also be asked for an estimate of the added expense they are going to face when the act gets to the full 18-year age limit of

its operation. There is nothing to indicate that the Drury administration, apart out." from the minister of education himself, is particularly taken with the

adolescent school act. Its big weakness is in the fact that it has to be interpreted by so many different officers in various sections. The human equation is multiplied in this way. One officer may have tact and everything in his favor, while in the next center the enforcement may be handed over to a man who would

sunrise. make a rumpus of the whole thing. There are thousands of men in Canada who by their performance The Estevan (Sask.)
