## PARLIAMENTARY ACENTS ARE SLOW

The cabinet suspended operations tolay in order to enable four of the minsters, Messrs. Paterson, Brodeur, Aylesworth and Lemieux, to accompany
Hon. Mr. Fielding to a banquet in

Montreal.

Hon. Mr. Emerson promises the Intercolonial employees a pension scheme for the coming session.

Fines to Be Imposed

Only 83 applications for private bills have so far been received, just half the number of last session; fifty are for rall-way legislation and ten for divorce. Sew scale of fees has gone into effect. Several parliamentary agents neglected to deposit copies of bills in their charge with the clerk of the house eight days before Nov. 22, and are face to face with a fine of \$5 a day for every day's delay. The sliding scale principle with reference to capitalization of companies will hit some promoters pretty hard. Last session the Chawford Bay & St. Marra Railway company could have got its charter for \$2,000, while this session it will cest \$2,000.

ent parliament.

Alberta's population is about 184,500, which will give that province seven members. After the redistribution at the coming session the two new provinces will be on the same hasis as the propably precedes the early amounce-older provinces, that is, they will only secure increased representation on the conclusion of each decennial consus.

Report From Aspan.

An interesting report has been fee

Report From Japan

An interesting report has been fecived from Alexander Maclean, Canadian agent at Yokohama. The general grain crop of Japan shows an increase of twenty-three million bushels. A syndicate of Japanese is promoting the grinding of wheat, but a large importing firm is recommending dealers to take up Canadian flour. The importations of flour from Canada for nine months were double those of the previous year. Prof. Shiza, director of forestry, has patented an invention for preserving wood, applicable to railway ties, posts, bridge timbers, etc. Tar and creosote are the principal materials used. The invention has atracted great attention.

The Agricultural college has been experimenting in the manufacture of pulp. Latterly the young bamboo plant, or bamboo grass, has been tried with great success.

Flags were flying at half mast on the

TRAINS STORM BOUND.

Topeka, Kas., Nov. 20.—As a result of last night's storm four overland trains on the Rock Island, El Paso division were stalled today in the cuts between Bucklin and Liberal, Kansas. No attempt was made today to run freight trains on that division.

The Santa Fe reported their main line across Kansas open, but several trains are snowbound on the Panhandle division where the snow is from four to five feet deep in the cuts. The weather is moderating.

## SUSPICIOUS SENATOR

Only Half as Many Applications
For Private Bills as Were Received Last Year

Ottawa, Nov. 20.—(Special)—The infux of senators and members for the gession has already commenced, representatives of the East and Far Westbeing as usual the first on the ground.

There is a great demand for seats for the opening on Thursday, and it will hardly be possible to accommodate all who are applying. As usual, the preference is being given to ladies from out of town.

The cabinet suspended operations to-

**Immigration** 

entered at the Scottish Horticultural exhibition at Edinburgh captured the first prize—the gold medal of that organization.

This gratifying news was cabled to the minister of agriculture yesterday afternoon. The information, while meagre as to detail, definitely states that the premier place at this fair, one of the largest held in the old land, has been awarded the fruit grown in British Columbia and shipped over thousands of miles by rail and steamer.

A Remarkable Achievement

When the conditions under which the exhibit was made are considered, the extent of the achievement can be better realized. One of the first difficulties with which Mr. Palmer had to contend was the keeping of the fruit in good condition. He had to exercise the greatest care in transportation. In this he was assisted by the government and the C.P. R. cold storage facilities.

A leady a fine Record in the British leles since it had to be superior excellence of the provided en route. Upon arriving at his destination he had very little time the referent purpose of the first in good in the British columbia.

The department of agriculture has undertaken to exhibit the fruit of such larges scale than heretofore. Leaving the majority of the important exhibitions among which will be that of the majority of the important exhibitions among which will be the case—that Columbia and shipped over thousands of miles by rail and steamer.

OLD AGE PENSIONS.

British Premier Gives Views to Liberal and Labor Delegation.

Hamilton, Ont., Nov. 20.—Street cars are running today on the regular schedule but the people have apparently decided to boycott the company in favor of the strikers. There has been no disturbances and the militia as yet has not been sent for.

After a conference with the police commissioners late yesterday, Mayor Biggar called upon the street railway company and asked that cars be not run in the evening. The company agreed and the police commissioners decided not to call out the militia for the present.

LUCKY SPECULATORS.

London, Nov. 20.—Replying today to a deputation of members of the House of Commons from the Liberal and Labor parties. Premier Campbell-Bannerman said the matter of old age pensions, the premier continued, far from sapping in dependence and undermining thrift, would do just the opposite. Any scheme ought to be universal and must be put into effect by the state, which alone has the means of carrying it out. ONE AT A TIME.
