LENNOX ARRIVES FROM FAR EAST

Encountered a Heavy Gale For Three Days on Way Here From Yokohama

SHIPMENT OF SEALSKINS

Catch of Japanese Sealers Taken in North Pacific Consigned to London

With 5000 tons of general cargo, including 2 casks of sealskins taken by Japanese sealing schooners in Bering sea and the North Pacific consigned to the London market, silk, tea, matting, curlos, and various other merchandise, including 290 tons for Victoria, the C.P.R. steamer Lennox, Capt. F. McNair, again reached port yesterday morning, from Hongkong and way ports. Capt. McNair, speaking of his voyage, said: "We left Hongkong at 8 p. m. on Sept. 15; Nagasaki at 9 p. m. on Sept. 17; Kobe at noon on Sept. 20; Yokkaichi at 5 p. m. on Sept. 21; Shimizu at 8 p. m. on Sept. 22, and Yokohama at 11 p. m. on Sept. 24. Little worthy of note other than the ordinary run occurred during the voyage. A few large whales were sighted but judging by the experience of the whale we killed and broke a blade of our propeller on the last voyage they all gave us a wide berth. FRUIT ENTERPRISES

American lawn tennis experts who are going to try and capture the Davis cup from the Australians.

The passengers who embarked here were Major Pole-Soppett, bound to Auckland; S. P. Clapp, Miss F. Grace, and the west south and back again to the west south west with very high sea until Oct. 5. The barometer fell to 29.20. Moderate weather was experienced—during the balance of the voyage. The steamer signalled off Cape Beale at 3.20 p. m. on the 9th and had very hazy, smoky weather up the straits and anchored at William Head at 11.45 p. m. The steamer was Voyage. The steamer signalled off Cape Beale at 3.20 p. m. on the 9th and had very hazy, smoky weather up the straits and anchored at William Head at 11.45 p. m. The steamer was fumigated at William Head yesterday morning and proceeded to the outer wharf.

things in fire protection appliances was submitted to the criticism of experts here when a new fire engine—a patent turbine petrol machine—underwent a series of tests at Weybridge. The new appliance is the first of its find, and in order to make the demonstration more interesting a horse fire engine, belonging to the Weybridge of the Trigade, was put into action. The chief feature of the new appliance of the new appliance is the first of its to the pump, which is driven by the same engine that drives the car, and consequently the large boiler so familiar at the rear of the steam fire engine is done away with. After pumping from hydrants into the river Thaines at a very high pressure the motor and the horse engine "played" together by pumping from the river. In this test the new appliance was seen to be well ahead of the steam engine. Pumping 450 gallons of water to the minute, the large of the motor and the horse engine. Pumping 450 gallons of water to the minute, the large of the motor and the horse engine. Pumping 450 gallons of water to the minute, the large of the seam engine. Pumping 450 gallons of water to the minute, the large to the minute, the large was seen to be well as the protection of the remaining crant of the seam engine. Pumping 450 gallons of water to the minute, the large was seen to be well as the car, and consequence of the seam engine. Pumping 450 gallons of water to the minute, the large to the seam engine. Pumping 450 gallons of water to the minute, the large to the marine department was at a very high pressure the motor and the horse engine. Pumping from the river. In this test the minute, the large to the marine department was a vancouver.

Mr. W. E. Scott, of the Board of the stand protection will be continued at Quebec, and the marine department was a very high pressure to the minute the large to the department was a very high pressure the market of the seam of ahead of the steam engine. Pumping 450 gallons of water to the minute, the motor engine sent a spray into the air about 140 feet high, which was considerably higher than that pumped distinguished itself. The steam engine had to cease pumping owing to shortage of coal, while the petrol engine continued its labors, and even pumped three sprays of water through 500 feet of hose to 120 feet into the air. It was explained that the new appliance would continue to pump so tong as there was petrol, which was caster to carry than coal. The new machine is capable of covering forty miles an bour. Its weight with all accessories is 2 tons 5 cwts.

FISH IN FRASER

Unexpected Run of Cohoes and Other Varieties of Salmon at End of the Season

New Westminster, Oct. 9.—That the salmon run on the Fraser river is far from over for this year is indicated by the catches the fishermen are making at the present time. The season is drawing to its close, but the run of salmon is heavier today than early in the canning season. A new run of cohoes was reported in the river this week, coming up the North Arm from English Bay. The fish are small, but of first class quality, and large catches are being made. Dog salmon are also commencing to run freely and the steelheads are about due and one of the largest runs of this variety of fish experienced for several years is predicted by old time Fraser river fishermen. A good run of fish was not looked for by the canners this year, and preparations were only made for a small catch, consequently some can-

looked for by the canners this year, and preparations were only made for a small catch, consequently some canneries are having to close down on account of having packed the full limit for which they made provisions and no more cans being available. The fish that will thus be enabled to pass up river and reach the breeding grounds should enable the hatchery guardians to secure a full supply of eggs, and enable them to thoroughly re-stock the river, thus benefitting the industry by the ensuring a perpetuaity of the various species of salmon for which the Fraser river is noted.

nas attended the fruit growing industry. Mr. Lindmark, the mayor of that thriving town, said yesterday that it was only three or four years ago that they realised that they could grow good fruit. Now they have 10,000 apple trees planted, and the whole industry is going ahead by leaps and bounds.

DELTA'S CASE THROWN OUT AS MEMBER OF Justice Clement Holds That Suit Against Railway- Was Brought By Wrong Parties

New Westminster, Oct. 9.—Mr. Justice Clement has thrown out the case brought by the municipality of Delta versus the V. V. & E. realiway to force the latter to provide a new highway before taking possession of a certain section of the old Ladner road to be used for right-of-way purposes. His honor's reason for so doing was on account of the action being brought by the wrong parties, instead of by the attorney-general.

It appears that the railroad company, after securing possession of the old road and laying out a new section, unsatisfactory to the settlers, showed every little regard for the interests of the lahdowners, and neglected to settle regarding the purchase price.

A short time ago the municipality brought suit for the owners to compel the railway company to vacate the old premises until such time as a new road, free from all encumbrances, might be provided. This action was also thrown out by the court.

George E. Martin, legal representative for the land owners, received notice yesterday morning that measures would be adopted to appoint a succession to the late Judge Cane for the arbitration board, while it is further to understood that the railway company intends proceeding with the expropriation of the land, the owners to be paid in accordance with the ruling of the beard.

Revelstoke is going ahead fast these days, due largely to the success which has attended the fruit growing industry. Mr. Lindmark, the mayor of that

seen, but had not been able to visit, he appeared to have seen not one, but four countries. What great political architects, therefore, they were, whose imagination and force could leap what was then two thousand miles of wilderness and units them all to a federderness and unite them all in a feder derness and unite them all in a federation. He was thinking not of today so much as of the future. With the growth of population and trade she would have interests in every part of the world. Canada would be great. Even so, some other nations would have two or even three times the population of Canada. How would she defend those interests? Will she alone compete with millions of men or scores of battleships? Or would Canada be content to take a back seat —a back seat in peace as well as in war. Power is shown not only in war, for wars among great nations are few, but much more in peace. A nation is like a bank; it is credit on which it trades, but it must have power, like a

cash reserve, in the background ready to use if need be. "Look," Lord Milner continued, "at what is happening in Europe while you and I are sitting here, Great changes are taking place. National boundaries are being altered. Ap international compact of great moment is being set aside."

Canada was unique in being one of a group of great countries. Together that group can command credit and respect, with strength and security based upon it. To Canada there would then be less strain than she would otherwise experience. Canadian would otherwise experience. Canadian all be depended upon as customers of Canadian flour, whereas the slightest enquiry of authoritative sources as to member perhaps herself in the future the chief and head of the great group of British states, than alone. Realizment. Now he hopes perhaps to truc-Canada was unique in being one of
