That is what a great many people are doing: They don't know just what is the matter, but they have a combination of pains and aches, and each month they grow worse.	 "I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome. S. DANA HATES, State Assayer, Mass." The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1878; at the Contennial, Philadelphia, 1876; at the American Institute, New York, and at State Fairs throughout the country. No other article of human food has ever received such high, emphatic, and uni- versal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world. NOTE—The above DIAGRAM illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedler. A pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedler only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound inove than ordinary kinds, it is far more economical, and, besides, affords the advant- age of better work. A single trial of the Royal Baking Powder will convince any fair minded person of these facts.
