LACONIA, N. H., Nov. 25.—Thos. Samon,

an Englishman aged 36, left his house on

Saturday wheeling a trunk, which he took

to the house of an acquaintance, Jas. Ruddy.

He stopped there for the night, taking his

trunk up stairs. Shortly after 4 in the

She was bleeding profusely and was unable to rise. On entering the house flames burst out from the doors and windows, but were some extinguished. The officers found lying upon the kitchen floor the bodies of Ruddy and his infant child, both cut in a horrible manner and covered with the contents of a feather bed which had been saturated with kargana and set on for

Both bodies were distigured by the flames past recognition. In the bedroom was found the trunk mentioned and the lifeless body of Mrs. Ford, which was identified by her husband. One of her limbs had been chopped off. The detached member and the remaining leg were bound to the woman's body with a clothes line. The bedclothes had been saturated with oil, piled on the body and an attempt made to set them on fire, which failed.

woman, he was also arrested. Several sus-picious circumstances tend to show his

guilt. There was no evidence of Mrs. Ford's murder, and it is thought her death was ac-

cidental at Sar on's hands; that wishing to conceal the body he took it down stairs in a runk, thence to Ruddy's, whence perhaps he could carry it from the house curing the night; that Ruddy refused to assist him, when a struggle ensued. The supposition is Mrs. Ford died either from strangulation or dragging, as she frequently

Thereupon the farmer related a sad tale. It appears the missing man's correct name is Frank Meyers, aged about 35 years, and has a wife and five small children, the youngest being an infant only a few weeks old. Some weeks ago he seld out by auction all his farm stock and implements, and then sold his forty acres in Metcalfe to his next door neighbor for \$1000. He massed all the proceeds and visited Glencoe, where he had an interview with a rather dressy girl 16 years of age, who was living there with her aunt. THE MEDICAL STUDENTS.

DR. WILD DISCOURSES TO THEM OF VARIOUS THINGS.

as Well as Patience, Sympathy and Religion—A Good Time Coming When Doctors Will Not Be Needed. At half-past six last evening long lines medical and other students poured into he Bond street church, having been provided with special passes of admittance. A large number of dectors were also present. The text read "They that be whole need not a physician, but they that are sick"-

Matthew, 9th chap., 12th v. He announced his discourse as a sort of nedical theology, and went on to remark that all the great estates run one into they be separated. The old motto of "Man, know thyself" was discovered over the portal of an old temple. Man is fearfully and wonderfully made in his mechanism; he is nature's greatest puzzle; he is his own best enigma. The medical students had chosen an ancient and honorable calling—one that calls for the brightest intellects, the bravest hearts and the most powerful minds. Skill and nerve should be yoked together in the doctor. The responsibilities resting upon him are so great—whether in treating the infant, the human bud whose tendrits are rooted in its mother's heart, the youth who has a bright future before him, or the parent who has his family depending upon him—mistakes or rashness will not be overlooked. The doctor reminds one of the engineer who has cherge of human life. Both should be clear headed, sober and careful. Skill must be attained by a thorough knowledge of what the medical art contains or is composed of. Ignorance and bombast will not avail. The best nervine is a thorough preparation and qualification for the work to be done. Opporthey be separated. The old motto of "Man, nervine is a thorough preparation and qualification for the work to be done. Opportunities stands over against qualifications.

Everybody expects that a minister should be good and pure in his life; policemen should be courageous, a tailor should wear good clothes, and a doctor should have clear eyes, a clear countenance, a steady nerve and the very expression of health. He will also need patience, not only with the patient, but sometimes with the nurse, and here the preacher took occasion to point out the great need that exists for a government training school for nurses.

that sometimes exists to keep the patient on his bed for the sake of the fees. Present loss is future gain if the sick man lives. The Chinese only pay their doctors when they are well, and that might be a good plan to adopt here. A physician should not throw a man into a fever for the sake of welling him out of it.

The preacher believed that the science is now ties, for the reason that the science is now so extended that one mind cannot master it in all its branches. Our civilization has produced a multitude of new diseases. Quinsy is now divided into many things. He believed we would come to the old Egyptian plan of having a doctor for a special It was very good of you, and I am afraid I have done the part very scant justice. It will never forget you. Turning to the medical schools, he was of Turning to the medical schools, he was of opinion that the local government should establish chairs of physiology, comparative anatomy and vital chemistry in some of our universities. He also deprecated the present system of having two medical examinations, and strongly urged that they should be merged, as a two-fold examination was unjust to the student. He finally exhorted his hearers to be christians, to dispense the balm of Gilead, and in that way do as much good to their fellow men as they do by good to their fellow men as they do by their medical skill. The subject announced for next Sunday

evening was "The presence of a God outside of the Bible." He asked his infidel friends to hear or read what he said and disprove it if they could. "Take hold of the sermon nd not of myself. Tear it into ten thou and pieces if you can, and if you cannot bow down before your God and worship

was over, and their answer seemed to content her.
Toronto has seen Adelaide Neilson and Mrs. Rousby in the Hunchback, and though every appearance of the Lily on the stage was the signal for loud applause, the universal verdict seemed to be that Mrs. Langtry was most perfect when she was not acting at all—that is when she came before the curtain after each act in response to loud repeated calls, and bowed her happy thanks to the audience in a charming school girl fashion, which was absolutely irresistable.

At 8.10 in the evening a World reporte At 8.10 in the evening a World reporter was standing at the door of the Grand opera when a tall, dark young man, six feet high, with a slight stoop in his shoulder and coal black hair and slight moustache, approached him. "Is this the academy of music?" he asked.

"No," answered the reporter, "this is the Grand opera."
"But is this where Mrs. Langtry acts to.

"But is this where Mrs. Langtry acts to night?"

"Yes ; it is." The stranger seemed about 23, he wore a morning coat and yellow calfskin gloves.

Then he passed in amongst the orchestra chairs, and at the same time a gentleman who had met Mr. Gebhardt several times in New York approached The World re-

PORT PERRY IN FLAMES.

Ald Asked from Toronto-Ready for the At 1.15 this morning Ald. Farley, chair man of the fire and gas committee, received a telegram from the reeve of Port Perry a telegram from the reeve of Port Perty stating that the whole of that village was in flames and asking for aid. Mr. Farley at once gave orders for a detachment of the brigade to get ready with the Bay street at teamer. Word was sent to the Grand Trunk offices for a special train, but an answer was received that it would be 3.30 before a train could be supplied. Ald. Farley then telegraphed the reeve, with instructions to reply if a train leaving at that hour would be of any use.

At 3 a.m. Ald. Farley received a second telegram that the fire was spreading. It

had reached the telegraph office, and no further telegraph communication could be had. The telegram asked for aid immediately.
