Henry A. King & Co.'s special wire from Ladenburg, Thalman & Co., New York: The reduction of the N.Y. Central dividend to 1 per cent. for the March quarter was expected. The street, however, was unprepared for the very unfavorable statement of earnings for the favorable statemen

nouncement of the dividend. Weakness in New York Central and Sugar has accordingly affected the entire market and checked the disposition of prices to advance. The advance which had marked the early hours was lost. There were several important and favorable news items, the last important being that Ohio soft coal roads and producers have made a combination to restrict production and regulate prices. It is also stated that the anthracite presidents are oming to an agreement, and there was accordingly a demonstration of coverings in Jersey Central. New England has has also continued to show strength. The market was steady at the close of the day. There were no gold exports, despite the strength of Exchange, and though London's view of the New York Central figures will be of importance the reaction seems to have run its course.
