

## 11

## A SYSTEM OF MECHANICAL PHILOSOPHY,

By the late JOHN ROBISON, LL.D., Professor of Natural Philosophy in the University, and Secretary to the Royal Society of Edinburgh. With Notes and Illustrations, comprising the most recent Discoveries in the Physical Sciences. In 4 vols. 8vo. with numerous Plates.

By DAVID BREWSTER, LL.D., F.R.S.E.

\*.\* A copious Article on the HISTORY and OPERATIONS of the STEAM ENGINE has been completely revised by the late JAMES WATT, Esq. and his SON, of Soho; who have also made many additions; so that it is now become the only account which can be relied upon. This subject is illustrated with eight large and original Engravings.

## A COPIOUS GREEK GRAMMAR.

By AUGUSTUS MATTHÆ,

Translated from the German, by the late Rev. E. V. BLONFIELD, M.A., Fellow of Emanuel College, Cambridge. 2 Vols. 8vo. A NEW EDITION, will be ready in a few days.

## 13

## THE LIFE OF THE RIGHT HON. R. B. SHERIDAN. 4to.

By THOMAS MOORE, Esq., Author of *Lalla Rookh*.

## 14

## THE BOOK OF THE CHURCH. 8vo.

By ROBERT SOUTHEY.

## 15

## THE CENTURY OF INVENTIONS OF THE MARQUIS OF WORCESTER,

From the original MSS. with Historical and Explanatory Notes, a Biographical Memoir, and an original Portrait, 8vo.

"A practical mathematician who has quickness to seize a hint, and sagacity to apply it, might avail himself greatly of these scantlings. It is extremely probable that Savery took from the Marquis the hint of the Steam Engine, for raising water with a power made by fire, which invention alone would entitle the author to immortality."—*Grang. Biog. Hist.* Vol. v. p. 278.

"Here it may not be amiss to recommend to the attention of every mechanic, the little work entitled a *Century of Inventions*, by the Marquis of Worcester, which, on account of the seeming improbability of discovering many things mentioned therein, has been too much neglected; but when it is considered that some of the contrivances, apparently not the least abstruse, have, by close application, been found to answer all the Marquis says of them, and that the first hint of that most powerful machine, the steam engine, is given in that work, it is unnecessary to enlarge on the utility of it."—*Trans. of the Society of Arts*, vol. iii. p. 6.
