Late Manager Sirmoor Iron Works.
Late Inspector of Dykes, British Columbia.
For several years Consulting Engineer to the Government of B. C.

All works with mines transacted, reports made, assays supplied. Plans estimates and specifications for general engineering purposes made and works managed and supervised.

Hints on Amalgamation and the General Care of Gold Mills.
By J. W. ADAMS—Illustrated.

A Practical Book for Practical Men. Should be in the hands of every mining man and metallurgist.

All previous works on gold metallurgy have devoted most attention to the theories, mechanics, chemists and history of gold milling. This book tells what to do and how to do it. It is not based on laboratory tests, but on the *Practical Results* obtained by the author in an experience of *Over Twenty Years*, and tells how best to employ that which is already for use, not in any one locality, but all over the world.

The articles from which this book is compiled first appeared in our columns, where they secured widespread interest. We have undertaken its publication at the suggestion of prominent men in the mining world who wished to have the valuable information therein contained in more permanent form. Cloth bound \$1.50.
